A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries, and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently, he is a consultant and CEO at Jain PharmaBiotech.

Prof. Jain's 478 publications include 30 books (6 as editor + 24 as author) and 50 special reports which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. He has also written a textbook of gene therapy, which is the first book on this subject to be translated into the Chinese language. A book on gene therapy companies was published in 2000 by John Wiley & Sons and the 2018 version is included in a special report on gene therapy available from Jain PharmaBiotech Publications. Other recent publications include "Handbook of Biomarkers" (Springer 2010, Chinese ed Chemical Press 2016, 2nd ed 2017), Handbook of Nanomedicine (Springer 2008; Chinese ed, Peking University Press 2011; 3rd edition Springer, 2017), and Applications of Biotechnology in Oncology (Springer 2014).

TABLE OF CONTENTS

0. Executive Summary	13
1. Introduction to Animal Biotechnology	15
Introduction	15
Historical evolution of animal biotechnology	15
Basics of biotechnology	16
DNA	16
RNA	16
Genes.....	17
Single nucleotide polymorphisms	17
Copy number variations in the genome.....	17
DNA sequences.....	18
Gene expression	18
Gene regulation	19
Proteins	19
<i>Functions of proteins</i>	<i>20</i>
<i>Recombinant proteins.....</i>	<i>20</i>
Animal genetics	21
Molecular genetics	21
Twinning in cattle.....	21
Pig genetics.....	21
Genetic studies in dogs.....	22
Animal genomics	22
Avian genomes	22
<i>Chicken genome</i>	<i>22</i>
<i>Turkey genome.....</i>	<i>23</i>
The mouse genome.....	24
The cat genome.....	24
The dog genome.....	25
<i>Sequencing of the dog genome.....</i>	<i>26</i>
<i>Comparison of genomes of healthy and diseased dogs.....</i>	<i>27</i>
<i>Analysis of DNA copy number variation.....</i>	<i>28</i>
Marsupial genomes	28
Genome of the Tibetan antelope	29
Livestock genomics	29
<i>Bovine genome.....</i>	<i>30</i>
<i>Bovine SNP map</i>	<i>31</i>
<i>1,000 Bull Genomes Project</i>	<i>32</i>
<i>Bovine stomach microbiome genes.....</i>	<i>32</i>
<i>Camel genome</i>	<i>33</i>
<i>Goat genome.....</i>	<i>33</i>
<i>Horse genome</i>	<i>34</i>
<i>Pig genome.....</i>	<i>35</i>
<i>Sheep genome</i>	<i>36</i>
Fish genomes	36
<i>The Salmon genome.....</i>	<i>36</i>
<i>Genome of the Northern snakehead</i>	<i>38</i>
Whale genome	38
Genomes of non-human primates	39
<i>Chimpanzee genome</i>	<i>39</i>
<i>Genome of the rhesus macaque.....</i>	<i>39</i>
<i>Genome of gorilla</i>	<i>40</i>
Priority genome list of the National Human Genome Research Institute	40
Animal proteomics	41
Applications of proteomics in animals	41
<i>Caseins in goat milk</i>	<i>42</i>
<i>Lactic acid bacteria.....</i>	<i>42</i>
<i>Applications of proteomics in animal healthcare</i>	<i>42</i>
Bioinformatics	42
Biomarkers and animal health	44
Personalized medicine for pet animals.....	46
Monoclonal antibodies and animal health	46
Antigenomics.....	46
Nanobiotechnology and animal health	47
Stem cells and animal biotechnology	47
Rescuing extinct animals with stem cells.....	47
Animal biotechnology in relation to other technologies	48

2. Application of Biotechnology in Animals	51
Introduction	51
Applications of animal genomics.....	51
Bovine ankyrin 1 gene and beef tenderness	51
Chicken breeding based on genomics	52
Genomics of disease resistance.....	52
Genomic selection to exploit gene-environment interactions.....	52
Genome wide associations and milk production in cows	53
Low cost genotyping for genetic improvement in dairy cattle.....	53
SNPs and longevity in dairy cattle	53
Share genomic data to improve cattle breeding programs.....	54
Statistical genomics to improve breeding	54
Genetic engineering and gene editing.....	54
CRISPR/Cas9 gene editing in animals	54
Disease control by genetic engineering	55
Improvement of livestock by genetic engineering.....	55
Limitations and precautions for genetic engineering	55
Transgenic animal technology	55
Cloning animals	57
<i>Nuclear transfer technology.....</i>	<i>57</i>
<i>Nuclear bisection for cloning.....</i>	<i>58</i>
<i>Zona-free cloning method.....</i>	<i>59</i>
<i>Abnormalities in cloned animals.....</i>	<i>59</i>
<i>Cloning from embryonic cells.....</i>	<i>61</i>
<i>Cloning of rabbits.....</i>	<i>61</i>
<i>Cloning the rat</i>	<i>61</i>
<i>Cloning the horse.....</i>	<i>62</i>
<i>Cloning the cow</i>	<i>62</i>
<i>Cloning the dog</i>	<i>62</i>
<i>Cloning in primates</i>	<i>63</i>
Episomal vector-mediated gene delivery	63
Lentiviral transduction of male germ-line stem cells	64
Lentiviral transgenesis.....	64
Retrovector-mediated production of transgenic animals	64
Sperm-mediated gene transfer	64
Animal models of human diseases	65
Gene editing in large animals	66
Cloning of gene-edited dogs as models of human genetic diseases.....	67
Production of recombinant proteins.....	67
Transgenic pharmaceuticals	67
Proteins from the milk of transgenic animals	68
Advantages of milk as source of transgenic proteins.....	69
<i>Therapeutic proteins from rabbit milk</i>	<i>70</i>
<i>Recombinant human antibodies from cows.....</i>	<i>70</i>
<i>Therapeutic proteins from goat milk</i>	<i>71</i>
Chicken transgenesis for production of biopharmaceuticals.....	71
Concluding remarks about production of transgenic proteins in animals	72
Companies involved in production of transgenic pharmaceuticals	72
Transgenic food products	73
Milking genetically modified cows.....	73
Genetically modified fish	73
<i>Genetically engineered salmon</i>	<i>73</i>
<i>Gene transfer approaches to enhance growth of other fish species</i>	<i>74</i>
Cloned animals as sources of milk and meat.....	74
Animal feeds from transgenic plants	75
Transgenic modification of plants to increase nutritional value of animal feeds.....	75
Transgenic disease models	75
Technologies to create transgenic disease models	75
<i>Gene manipulation techniques.....</i>	<i>76</i>
<i>Embryonic stem cells for gene targeting</i>	<i>76</i>
<i>Homologous recombination</i>	<i>76</i>
<i>Transgenic animal models of human diseases.....</i>	<i>77</i>
Transgenic models for studying human drug metabolism and toxicity	78
The Human Genome Project and the role of transgenics	78
Genomic and proteomic analyses of transgenic animal models.....	79
Concern about health and welfare of transgenic animals	79
Safety of transgenic technology	80
Concluding remarks about use of transgenic animals.....	80
RNA interference technology	80
RNAi versus antisense	80
Applications of RNAi in animal biotechnology	81

Xenotransplantation	81
Pigs for xenotransplantation	82
<i>Genetically engineered pigs for transplants</i>	82
<i>Risks of xenotransplantation</i>	83
World Health Organization and xenotransplantation	83
Ethical aspects of animal biotechnology	84
3. A Biotechnology Perspective of Animals Diseases	85
Introduction	85
Infections in animals	85
Viral infections.....	86
<i>Avian viral infections</i>	86
<i>Avian influenza</i>	86
<i>Animal biotechnology implications of H1N1 influenza</i>	89
<i>Animal corona viruses and human SARS</i>	90
<i>Avian coronavirus</i>	90
<i>Acute lymphoproliferative disease of cattle</i>	91
<i>Bluetongue virus</i>	92
<i>Canine virus infections</i>	92
<i>Classical swine fever</i>	93
<i>Developing new treatments against FMD</i>	93
<i>Equine viruses</i>	94
<i>Feline virus infections</i>	95
<i>Foot-and-mouth disease</i>	95
<i>Porcine reproductive and respiratory syndrome virus</i>	97
<i>Rabies</i>	97
<i>Rinderpest</i>	98
<i>Schmallenberg virus</i>	98
<i>Virus infections in fishes</i>	99
Bacterial infections.....	99
<i>Bovine tuberculosis</i>	99
<i>Brucellosis</i>	100
<i>Mycoplasmal pneumonia</i>	100
Fungal infections.....	100
Protozoal infections	101
<i>Coccidiosis</i>	101
<i>Neosporosis</i>	101
<i>Toxoplasmosis</i>	102
<i>Trypanosomiasis</i>	102
Nematodes.....	102
Infections that cross the species barrier.....	103
Complications of bacterial infections and antibiotic use in animals	103
Transmissible spongiform encephalopathies (TSEs)	104
Inter-species transfer of prions.....	104
Scrapie.....	104
Bovine spongiform encephalopathy	105
<i>Epidemiology of BSE</i>	105
<i>Biomarkers in the urine of BSE infected cattle</i>	106
<i>Human health implications of BSE</i>	106
<i>Breeding animals protected against BSE</i>	107
TSE research.....	107
<i>Prion gene haplotyping</i>	107
<i>Pharmacological approaches to TSE research</i>	107
<i>Molecular diagnostic approach to TSE research</i>	108
<i>RNAi for knockdown of the bovine prion gene</i>	108
Chronic wasting disease	109
<i>Chronic wasting disease in wildlife</i>	109
<i>Chronic wasting disease of the cattle</i>	110
Genetic disorders in farm animals	111
Genetic predisposition to acquired diseases in animals	111
Diseases of pet animals	111
Canine anemia	111
Canine autoimmune diseases	112
Canine neuropsychiatric disorders.....	112
<i>Canine obsessive-compulsive disorder</i>	112
<i>Canine dementia</i>	113
<i>Canine epilepsy</i>	113
Canine glaucoma	113
Canine cardiovascular disease	114
<i>Heart failure</i>	114
<i>Cardiac complications of canine babesiosis</i>	114

Diabetes	115
<i>Role of biotechnology in management of diabetes</i>	115
Arthritis	116
Cancer in dogs.....	116
<i>Biotechnology-based anticancer therapeutics</i>	116
<i>Cancer clinical trials in dogs</i>	117
<i>Canine Comparative Oncology & Genomics Consortium</i>	118
Preventive veterinary medicine	118
Prevention of introduction of foreign animal diseases.....	118
Producing transgenic cattle resistant to BSE	118
Zoonotic diseases	119
Global impact of zoonotic diseases	119
Viruses that emerge in animals and spread to humans	119
Collaborative management of animal and human health	120
Vaccines for zoonotic viral diseases	120
4. Molecular Diagnostics in Animals	123
Introduction	123
Nucleic acid technologies	123
The polymerase chain reaction	123
<i>Basic Principles of PCR</i>	123
<i>Target selection</i>	124
<i>Detection of amplified DNA</i>	124
<i>Real-time PCR systems</i>	124
<i>LightCycler PCR system</i>	125
<i>Molecular beacons</i>	125
<i>Applications of PCR in veterinary medicine</i>	125
Fluorescent in situ hybridization.....	126
Immunodiagnosics	128
Enzyme-linked immunoassays	128
Bovine Gamma Interferon Test	128
Antigen diagnosis of trichinosis.....	129
Parachek™ for the diagnosis of Johne's disease	129
Antibodies for differentiation between vaccinated and infected animals.....	130
Biochip/microarray technology	130
Applications of microarrays in animal biotechnology	131
<i>Cattlearray3800 for functional genomics</i>	131
<i>eSensor™ electrochemical biochip</i>	132
<i>FR 48 microfluidic biochip</i>	132
<i>SNPchiMp v.3 for standardizing livestock SNP data</i>	132
Biosensors	133
Immunosensors.....	133
<i>Biosensor for ovulation prediction in dairy cows</i>	134
Flow cytometry for animal diagnostics	135
Molecular imaging in animals	135
Veterinary cytogenetics	136
Applications of sequencing for veterinary diagnostics	136
Role of sequencing in detection of cancer biomarkers	136
DNA sequencing for study of bacterial epidemics	137
Role of sequencing in epidemic of Shiga toxin-producing <i>E. coli</i>	137
Role of sequencing in the study of genetic disorders in animals	137
Applications of molecular diagnostics in animals	138
Canine DNA testing	139
<i>Use and abuse of genetic testing of dogs</i>	139
Cat pedigree determined by gene tests.....	140
Diagnostic aids to selective breeding	141
<i>Selection of desirable traits</i>	141
<i>Gene variations and fat content of beef</i>	142
<i>Using genetic markers for improved milk production in dairy cattle</i>	142
<i>Application of bovine genomics for improving milk yield</i>	142
<i>Recognition of hereditary syndromes</i>	143
Genetic markers in animals	143
<i>SNP genotyping in animals</i>	143
<i>SNP genotyping for selective breeding of chicken</i>	143
Animal identity and parentage analysis.....	144
Animal species identification in food	144
Diagnosis of infections.....	145
<i>Bacterial infections</i>	145
<i>Diagnosis of fungal infections in animals</i>	145
<i>Diagnosis of viral infections</i>	146
<i>Molecular diagnosis of avian influenza</i>	148

<i>Molecular diagnosis of swine influenza</i>	149
<i>Diagnosis of parasitic infections</i>	149
<i>Detection of natural or bioterror threats to livestock</i>	150
<i>Detection of Tritrichomonas foetus DNA in cattle</i>	150
Molecular diagnosis of prion diseases	151
<i>Bovine spongiform encephalopathy</i>	151
<i>Testing for BSE in living animals</i>	152
<i>Prions in urine</i>	153
<i>Diagnosis of chronic wasting disease in wildlife</i>	153
Developing new tests for prion diseases.....	153
<i>Differentiation among various types of TSEs</i>	154
<i>Protein cyclic amplification</i>	154
<i>Antibody tests for prion diseases</i>	154
<i>Scrapie genotyping</i>	155
<i>A real-time ultrasonic method for prion protein detection</i>	155
Companies involved in developing molecular diagnostics for TSEs	155
Diagnosis of genetic disorders	156
<i>Genetic screening of companion animals</i>	156
<i>Genes associated with exercise-induced collapse</i>	156
<i>Preimplantation genetic diagnosis</i>	157
Diagnosis of cancer in animals.....	157
<i>Diagnosis of skin cancer</i>	157
<i>Diagnosis of canine mammary carcinoma</i>	157
Diagnosis of food-borne pathogens	158
Introduction	158
Molecular diagnostic methods used in food-borne infections	159
Detection of Listeria-contaminated foods	159
<i>Optical biosensor for detection of Listeria</i>	159
<i>Real-time PCR for detection of Listeria</i>	160
Detection of Salmonella	160
<i>MicroSEQ® Salmonella Detection Kit</i>	160
Detection of toxoplasmosis.....	161
<i>E. Coli</i> detection	161
<i>DuPont Bax system</i>	161
<i>MLG method for detection of multiple STEC strains</i>	161
<i>MicroSEQ® E. Coli Detection Kit</i>	162
<i>RapidFinder™ STEC</i>	162
A genomic approach to study of animal food-borne illness in humans	162
Limitations of use of molecular probes in food analysis	162
Companies with technologies for food pathogen detection.....	163
Biotechnology-based novel diagnostics for aquatic animals.....	164
Detection of chemicals in foods of animal origin.....	164
Companies developing molecular diagnostics for animals	165
5. Biotechnology-based Veterinary Medicine	167
Introduction	167
Biotechnology versus pharmaceutical products	167
Role of biotechnology in drug discovery and development	168
Biological therapies in veterinary medicine	168
Cost of veterinary vs. human drug discovery and development.....	168
Advantages and disadvantages of testing biotech products in animal models.....	169
Biotechnology-based antiparasitic drugs	169
Non-antibiotic strategies for control of infections in animals.....	169
Probiotics.....	170
<i>Potential role for probiotics in the human gut</i>	170
<i>Potential role for probiotics in animals</i>	170
<i>Probiotic bacteria for control of pathogens in cattle</i>	171
Nonantibiotic drugs for infections in animals.....	172
<i>Immunomodulation as an alternative to antibiotics in infections</i>	172
<i>Cathelicidins: effector molecules of mammalian innate immunity</i>	172
<i>Bacteriophage therapy for antibiotic resistance</i>	173
Biotechnology for treating tendon injuries	173
Use of growth factors to facilitate tendon injuries.....	173
Productivity enhancers	174
Bovine somatotropin for increasing milk production in dairy cows	174
Increasing milk production in cows by feeding propionibacteria.....	175
Use of growth factors	175
Transgenic plant products for use in animals.....	176
Biotechnology-based vaccines	176
Modern vaccines without viral non-structural proteins.....	177
Plant-derived vaccines for use in animals	177

Nano-bead vaccine adjuvant	178
Genetically engineered vaccines.....	178
<i>Application of nucleic acid vaccines in veterinary medicine</i>	178
<i>DNA vaccines</i>	178
<i>DNA vaccine for tuberculosis</i>	180
<i>DNA vaccines for West Nile encephalitis</i>	181
<i>DNA vaccines for cancer</i>	182
<i>Gene-based vaccine for Marek's disease</i>	182
<i>Genetic engineering of live rabies vaccines</i>	182
<i>Genetically engineered vaccines for equine encephalitis</i>	183
<i>Genetically engineered vaccines for Johne's disease</i>	183
<i>Rational engineering of virus capsids to produce FMD vaccine</i>	183
<i>Vaccines against avian influenza</i>	184
<i>Vaccines against parasitic infections</i>	185
Recombinant marker vaccines	185
<i>Marker vaccines for foot-and-mouth disease</i>	185
<i>Marker vaccine for Newcastle disease</i>	186
<i>Vaccines for classical swine fever</i>	186
Vaccines for tick control.....	187
Vaccination to protection swine from H1N1 influenza virus infection	187
Vaccination of cattle to prevent <i>E. coli</i> transmission to consumers in meat	187
Vaccines for bacterial equine respiratory infections.....	188
Use of RNAi to develop vaccines for viral infections in prawns	188
Companies developing biotechnology-based vaccines	189
Biotechnology in treatment of parasitic infections.....	189
Biotechnology in the treatment of CNS disorders in pet animals	190
Paraplegia due to acute spinal cord injury in dogs	190
Personalized approach to Niemann-Pick type C1 in cats	190
Role of biotechnology in veterinary oncology	191
Personalized management of dogs with high-grade B-cell lymphoma	191
VDC-1101 for treatment of lymphoma in dogs.....	191
Cell Therapy.....	192
Umbilical cord blood stem cells	192
Application of stem cells in veterinary medicine	192
<i>Use of stem cells to repair tendon injuries in horses</i>	193
<i>Stem cells for spinal cord injury in dogs</i>	193
Gene therapy	194
Gene therapy vectors	194
Gene therapy by mitochondrial transfer	195
In utero gene therapy	195
Gene editing.....	195
Genome engineering by using TALENs	195
Genome editing by using CRISPR system	196
<i>CRISPER system for creating animal models of human diseases</i>	196
<i>CRISPR-Cas9 system for producing tuberculosis-resistant cows</i>	197
<i>CRISPR-Cas9 for inactivation of pig retrovirus for xenotransplantation</i>	197
Applications of gene therapy in veterinary medicine	197
<i>Gene therapy for arthritis</i>	197
<i>Gene therapy for blindness in dogs due to Leber congenital amaurosis</i>	198
<i>Gene therapy for cardiomyopathy in dogs</i>	198
<i>Gene therapy for diabetes in dogs</i>	199
<i>Gene therapy for endocrine disorders</i>	199
<i>Gene therapy for hematological disorders</i>	199
<i>Gene therapy for inherited disorders of metabolism in dogs</i>	200
<i>Gene therapy to increase disease resistance</i>	201
<i>Gene therapy for infections</i>	201
<i>Gene therapy for renal failure</i>	201
Cancer gene therapy	202
<i>Antiangiogenic cancer gene therapy in dogs</i>	202
<i>Brain tumors in cats and dogs</i>	202
<i>Breast cancer in dogs</i>	203
<i>Canine hemangiosarcoma</i>	204
<i>Canine malignant melanoma</i>	204
<i>Canine soft tissue sarcoma</i>	205
<i>Melanoma in horses</i>	206
<i>Oncolytic virotherapy for cancer in dogs</i>	206
6. Research in Animal Biotechnology	207
Introduction	207
Research institutes	207
Ethical issues of research in animal biotechnology	215

Future prospects.....	216
Genome wide association studies for investigation of declining fertility in cattle	216
Strategies for control of twinning in cattle.....	217
Future developments of molecular diagnostics.....	217
Future of vaccine application in veterinary medicine.....	217
<i>Promotion of innate immunity in animals</i>	<i>217</i>
<i>Identification of key parasite antigens for eliciting immune response.....</i>	<i>218</i>
<i>Virus-like particle vaccines for lasting immune response</i>	<i>218</i>
Control of respiratory virus infections	218
Control and prevention of bioterrorism diseases in animals	219
Genetic control of disease resistance	219
<i>Production of cattle lacking prion protein</i>	<i>220</i>
Application of genetics and biotechnology to wildlife management	220
Future of animal genomics	221
Future of in vitro meat production	221
7. Animal Biotechnology Markets.....	223
Introduction	223
Markets for biotechnology-based products for animal healthcare.....	224
Markets for biopharmaceuticals for animals.....	225
<i>Markets for recombinant proteins for animal healthcare.....</i>	<i>226</i>
<i>Markets for vaccines for animals</i>	<i>226</i>
Markets for animal diagnostics.....	226
<i>Test for bovine spongiform encephalopathy.....</i>	<i>226</i>
Markets for transgenic laboratory animals.....	227
Animal biotechnology markets according to therapeutic areas	227
Markets for biotechnology-based animal products for humans.....	227
Transgenic proteins.....	228
Market for xenotransplantation	228
Strategies for promoting use of animal biotechnology.....	229
Financial losses from death and disease in animals	229
<i>Losses in farm animals</i>	<i>229</i>
<i>Losses in poultry.....</i>	<i>229</i>
<i>Losses in equine industry.....</i>	<i>229</i>
The emerging role of pet owners.....	230
Improvement in cattle through application of biotechnology	230
<i>Economic aspects of genomic evaluation of dairy cattle</i>	<i>230</i>
<i>Pig market</i>	<i>230</i>
<i>Cattle Market.....</i>	<i>231</i>
<i>Poultry market.....</i>	<i>231</i>
<i>Milk from genetically modified cows.....</i>	<i>231</i>
Impact of biotechnology on fish markets.....	232
Role of biotechnology in livestock performance enhancer market.....	232
Gene transfer technologies.....	232
In vitro meat production and animal biotechnology markets	232
Cost-benefit aspects of transgenic proteins	233
<i>Lower costs of transgenic production</i>	<i>233</i>
<i>Lower costs of treatment</i>	<i>233</i>
Unmet needs in animal biotechnology	233
Future of animal biotechnology	234
Farm animals	235
<i>Global trends in epidemiology of livestock diseases</i>	<i>235</i>
<i>Genetic engineering of animals.....</i>	<i>235</i>
Companion animals.....	235
Animal molecular diagnostic markets.....	236
Future marketing status of animal-derived biotechnology products.....	236
8. Regulatory issues	237
Introduction	237
Regulatory agencies for veterinary biotechnology in the US.....	237
FDA regulatory issues in agricultural biotechnology	238
FDA guidelines on use of antibiotics in food-producing animals.....	239
FDA and veterinary stem cell therapy	240
Food safety evaluation of transgenic animals	241
Food from cloned animals	242
FDA investigation of drug transfer into eggs	243
Animal feed safety	244
Medicated feeds.....	245
Regulatory issues for production of transgenic proteins.....	245
Risks of animal biotechnology	245
FDA regulation of bovine products.....	246

Worldwide biotechnology regulatory and trade issues	246
9. Companies Involved in Animal Biotechnology	249
Introduction	249
Biotechnology at top veterinary pharmaceutical companies	249
Profiles of selected companies.....	249
Collaborations.....	384
10. References.....	389
