**September 2017**

**A Jain PharmaBiotech Report**

## **A U T H O R ' S   B I O G R A P H Y**

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries, and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently, he is a consultant and CEO at Jain PharmaBiotech.

Prof. Jain's 470 publications include 28 books (5 as editor + 23 as author) and 50 special reports which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. He has also written a textbook of gene therapy, which is the first book on this subject to be translated into the Chinese language. A book on gene therapy companies was published in 2000 by John Wiley & Sons and the 2017 version is included in a special report on gene therapy available from Jain PharmaBiotech Publications. Other recent publications include "Handbook of Biomarkers" (Springer 2010, Chinese ed Chemical Press 2016, 2<sup>nd</sup> ed 2017), Handbook of Nanomedicine (Springer 2008; Chinese ed, Peking University Press 2011; 3rd edition Springer, 2017), and Applications of Biotechnology in Oncology (Springer 2014).

# TABLE OF CONTENTS

<b>0. Executive Summary .....</b>	<b>13</b>
<b>1. Introduction to Animal Biotechnology .....</b>	<b>15</b>
<b>Introduction .....</b>	<b>15</b>
<b>Historical evolution of animal biotechnology .....</b>	<b>15</b>
<b>Basics of biotechnology .....</b>	<b>16</b>
DNA .....	16
RNA .....	16
Genes.....	17
Single nucleotide polymorphisms .....	17
Copy number variations in the genome.....	17
DNA sequences.....	18
Gene expression .....	18
Gene regulation .....	19
Proteins .....	19
<i>Functions of proteins .....</i>	<i>20</i>
<i>Recombinant proteins.....</i>	<i>20</i>
<b>Animal genetics .....</b>	<b>21</b>
Molecular genetics .....	21
Twinning in cattle.....	21
Pig genetics.....	21
Genetic studies in dogs.....	22
<b>Animal genomics .....</b>	<b>22</b>
Avian genomes .....	22
<i>Chicken genome .....</i>	<i>22</i>
<i>Turkey genome.....</i>	<i>23</i>
The mouse genome.....	24
The cat genome.....	24
The dog genome.....	25
<i>Sequencing of the dog genome.....</i>	<i>26</i>
<i>Comparison of genomes of healthy and diseased dogs.....</i>	<i>27</i>
<i>Analysis of DNA copy number variation.....</i>	<i>28</i>
Marsupial genomes .....	28
Genome of the Tibetan antelope .....	29
Livestock genomics .....	29
<i>Bovine genome.....</i>	<i>30</i>
<i>Bovine SNP map .....</i>	<i>31</i>
<i>1,000 Bull Genomes Project .....</i>	<i>32</i>
<i>Bovine stomach microbiome genes.....</i>	<i>32</i>
<i>Camel genome .....</i>	<i>33</i>
<i>Goat genome.....</i>	<i>33</i>
<i>Horse genome .....</i>	<i>34</i>
<i>Pig genome.....</i>	<i>35</i>
<i>Sheep genome .....</i>	<i>36</i>
Fish genomes .....	36
<i>The Salmon genome.....</i>	<i>36</i>
<i>Genome of the Northern snakehead .....</i>	<i>38</i>
Whale genome .....	38
Genomes of non-human primates .....	39
<i>Chimpanzee genome .....</i>	<i>39</i>
<i>Genome of the rhesus macaque.....</i>	<i>39</i>
<i>Genome of gorilla .....</i>	<i>40</i>
Priority genome list of the National Human Genome Research Institute .....	40
<b>Animal proteomics .....</b>	<b>41</b>
Applications of proteomics in animals .....	41
<i>Caseins in goat milk .....</i>	<i>42</i>
<i>Lactic acid bacteria.....</i>	<i>42</i>
<i>Applications of proteomics in animal healthcare .....</i>	<i>42</i>
<b>Bioinformatics .....</b>	<b>42</b>
<b>Biomarkers and animal health .....</b>	<b>44</b>
<b>Personalized medicine for pet animals.....</b>	<b>46</b>
<b>Monoclonal antibodies and animal health .....</b>	<b>46</b>
Antigenomics.....	46
<b>Nanobiotechnology and animal health .....</b>	<b>46</b>
<b>Stem cells and animal biotechnology .....</b>	<b>47</b>
Rescuing extinct animals with stem cells.....	47
<b>Animal biotechnology in relation to other technologies .....</b>	<b>48</b>

<b>2. Application of Biotechnology in Animals .....</b>	<b>49</b>
<b>Introduction .....</b>	<b>49</b>
<b>Applications of animal genomics.....</b>	<b>49</b>
Bovine ankyrin 1 gene and beef tenderness .....	49
Chicken breeding based on genomics .....	50
Genomics of disease resistance.....	50
Genomic selection to exploit gene-environment interactions.....	50
Genome wide associations and milk production in cows .....	51
Low cost genotyping for genetic improvement in dairy cattle.....	51
SNPs and longevity in dairy cattle .....	51
Share genomic data to improve cattle breeding programs.....	52
Statistical genomics to improve breeding .....	52
<b>Genetic engineering.....</b>	<b>52</b>
Livestock improvement by genetic engineering .....	52
Disease control by genetic engineering .....	53
Limitations and precautions for genetic engineering .....	53
<b>Transgenic animal technology .....</b>	<b>53</b>
Cloning animals .....	54
<i>Nuclear transfer technology.....</i>	<i>55</i>
<i>Nuclear bisection for cloning.....</i>	<i>56</i>
<i>Zona-free cloning method.....</i>	<i>56</i>
<i>Abnormalities in cloned animals.....</i>	<i>57</i>
<i>Cloning from embryonic cells.....</i>	<i>58</i>
<i>Cloning of rabbits.....</i>	<i>58</i>
<i>Cloning the rat .....</i>	<i>59</i>
<i>Cloning the horse.....</i>	<i>59</i>
<i>Cloning the cow .....</i>	<i>59</i>
<i>Cloning the dog .....</i>	<i>60</i>
<i>Cloning in primates .....</i>	<i>60</i>
Episomal vector-mediated gene delivery .....	60
Lentiviral transduction of male germ-line stem cells .....	61
Lentiviral transgenesis.....	61
Retrovector-mediated production of transgenic animals .....	61
Sperm-mediated gene transfer .....	62
<b>Production of recombinant proteins.....</b>	<b>63</b>
<b>Transgenic pharmaceuticals .....</b>	<b>63</b>
Proteins from the milk of transgenic animals .....	64
Advantages of milk as source of transgenic proteins.....	64
<i>Therapeutic proteins from rabbit milk .....</i>	<i>66</i>
<i>Recombinant human antibodies from cows.....</i>	<i>66</i>
<i>Therapeutic proteins from goat milk .....</i>	<i>67</i>
Chicken transgenesis for the production of biopharmaceuticals .....	67
Concluding remarks about production of transgenic proteins in animals .....	67
Companies involved in production of transgenic pharmaceuticals .....	68
<b>Transgenic food products .....</b>	<b>68</b>
Milking genetically modified cows.....	68
Genetically modified fish .....	69
<i>Genetically engineered salmon .....</i>	<i>69</i>
<i>Gene transfer approaches to enhance growth of other fish species.....</i>	<i>70</i>
Cloned animals as sources of milk and meat.....	70
<b>Animal feeds from transgenic plants .....</b>	<b>70</b>
Transgenic modification of plants to increase nutritional value of animal feeds.....	70
<b>Transgenic disease models .....</b>	<b>71</b>
Technologies to create transgenic disease models .....	71
<i>Gene manipulation techniques.....</i>	<i>71</i>
<i>Embryonic stem cells for gene targeting .....</i>	<i>72</i>
<i>Homologous recombination .....</i>	<i>72</i>
<i>Transgenic animal models of human diseases.....</i>	<i>72</i>
Transgenic models for studying human drug metabolism and toxicity .....	73
The Human Genome Project and the role of transgenics .....	74
Genomic and proteomic analyses of transgenic animal models.....	74
Concern about health and welfare of transgenic animals .....	75
Safety of transgenic technology .....	75
Concluding remarks about use of transgenic animals.....	76
<b>RNA interference technology .....</b>	<b>76</b>
RNAi versus antisense .....	76
Applications of RNAi in animal biotechnology .....	76
<b>Xenotransplantation .....</b>	<b>77</b>
Pigs for xenotransplantation .....	77
<i>Genetically engineered pigs for transplants .....</i>	<i>78</i>
<i>Risks of xenotransplantation.....</i>	<i>78</i>

World Health Organization and xenotransplantation .....	78
<b>Ethical aspects of animal biotechnology .....</b>	<b>79</b>

<b>3. A Biotechnology Perspective of Animals Diseases .....</b>	<b>81</b>
<b>Introduction .....</b>	<b>81</b>
<b>Infections in animals .....</b>	<b>81</b>
Viral infections.....	82
<i>Avian viral infections</i> .....	82
<i>Avian influenza</i> .....	82
<i>Animal biotechnology implications of H1N1 influenza</i> .....	85
<i>Animal corona viruses and human SARS</i> .....	86
<i>Avian coronavirus</i> .....	86
<i>Acute lymphoproliferative disease of cattle</i> .....	87
<i>Bluetongue virus</i> .....	88
<i>Canine virus infections</i> .....	88
<i>Classical swine fever</i> .....	89
<i>Developing new treatments against FMD</i> .....	89
<i>Equine viruses</i> .....	90
<i>Feline virus infections</i> .....	91
<i>Foot-and-mouth disease</i> .....	91
<i>Porcine reproductive and respiratory syndrome virus</i> .....	93
<i>Rabies</i> .....	93
<i>Rinderpest</i> .....	94
<i>Schmallenberg virus</i> .....	94
<i>Virus infections in fishes</i> .....	95
Bacterial infections.....	95
<i>Bovine tuberculosis</i> .....	95
<i>Brucellosis</i> .....	96
<i>Mycoplasmal pneumonia</i> .....	96
Fungal infections.....	96
Protozoal infections .....	97
<i>Coccidiosis</i> .....	97
<i>Neosporosis</i> .....	97
<i>Toxoplasmosis</i> .....	98
<i>Trypanosomiasis</i> .....	98
Nematodes.....	98
Infections that cross the species barrier.....	98
Complications of bacterial infections and antibiotic use in animals.....	99
<b>Transmissible spongiform encephalopathies (TSEs) .....</b>	<b>99</b>
Inter-species transfer of prions.....	100
Scrapie.....	100
Bovine spongiform encephalopathy .....	100
<i>Epidemiology of BSE</i> .....	101
<i>Biomarkers in the urine of BSE infected cattle</i> .....	102
<i>Human health implications of BSE</i> .....	102
<i>Breeding animals protected against BSE</i> .....	103
TSE research.....	103
<i>Prion gene haplotyping</i> .....	103
<i>Pharmacological approaches to TSE research</i> .....	103
<i>Molecular diagnostic approach to TSE research</i> .....	104
<i>RNAi for knockdown of the bovine prion gene</i> .....	104
<b>Chronic wasting disease .....</b>	<b>105</b>
<i>Chronic wasting disease in wildlife</i> .....	105
<i>Chronic wasting disease of the cattle</i> .....	106
<b>Genetic disorders in farm animals .....</b>	<b>106</b>
<b>Genetic predisposition to acquired diseases in animals .....</b>	<b>107</b>
<b>Diseases of pet animals .....</b>	<b>107</b>
Canine anemia .....	107
Canine autoimmune diseases .....	108
Canine neuropsychiatric disorders.....	108
<i>Canine obsessive-compulsive disorder</i> .....	108
<i>Canine dementia</i> .....	109
<i>Canine epilepsy</i> .....	109
Canine glaucoma .....	109
Canine cardiovascular disease .....	110
<i>Heart failure</i> .....	110
<i>Cardiac complications of canine babesiosis</i> .....	110
Diabetes .....	111
<i>Role of biotechnology in management of diabetes</i> .....	111
Arthritis .....	111
Cancer in dogs.....	112

<i>Biotechnology-based anticancer therapeutics</i> .....	112
<i>Cancer clinical trials in dogs</i> .....	113
<i>Canine Comparative Oncology &amp; Genomics Consortium</i> .....	113
<b>Preventive veterinary medicine</b> .....	<b>114</b>
Prevention of introduction of foreign animal diseases.....	114
Producing transgenic cattle resistant to BSE .....	114
<b>Zoonotic diseases</b> .....	<b>115</b>
Global impact of zoonotic diseases .....	115
Viruses that emerge in animals and spread to humans .....	115
Collaborative management of animal and human health .....	116
Vaccines for zoonotic viral diseases .....	116
<b>4. Molecular Diagnostics in Animals</b> .....	<b>117</b>
<b>Introduction</b> .....	<b>117</b>
<b>Nucleic acid technologies</b> .....	<b>117</b>
The polymerase chain reaction .....	117
<i>Basic Principles of PCR</i> .....	117
<i>Target selection</i> .....	118
<i>Detection of amplified DNA</i> .....	118
<i>Real-time PCR systems</i> .....	118
<i>LightCycler PCR system</i> .....	119
<i>Molecular beacons</i> .....	119
<i>Applications of PCR in veterinary medicine</i> .....	119
Fluorescent in situ hybridization.....	120
<b>Immunodiagnosics</b> .....	<b>122</b>
Enzyme-linked immunoassays .....	122
Bovine Gamma Interferon Test.....	122
Antigen diagnosis of trichinosis.....	123
Parachek™ for the diagnosis of Johne's disease .....	123
Antibodies for differentiation between vaccinated and infected animals.....	124
<b>Biochip/microarray technology</b> .....	<b>124</b>
Applications of microarrays in animal biotechnology .....	125
<i>Cattlearray3800 for functional genomics</i> .....	125
<i>eSensor™ electrochemical biochip</i> .....	126
<i>FR 48 microfluidic biochip</i> .....	126
<i>SNPchiMp v.3 for standardizing livestock SNP data</i> .....	126
<b>Biosensors</b> .....	<b>127</b>
Immunosensors.....	127
<i>Biosensor for ovulation prediction in dairy cows</i> .....	128
<b>Flow cytometry for animal diagnostics</b> .....	<b>129</b>
<b>Molecular imaging in animals</b> .....	<b>129</b>
<b>Veterinary cytogenetics</b> .....	<b>130</b>
<b>Applications of sequencing for veterinary diagnostics</b> .....	<b>130</b>
Role of sequencing in detection of cancer biomarkers .....	130
DNA sequencing for study of bacterial epidemics .....	131
Role of sequencing in epidemic of Shiga toxin-producing E. coli .....	131
Role of sequencing in the study of genetic disorders in animals .....	131
<b>Applications of molecular diagnostics in animals</b> .....	<b>132</b>
Canine DNA testing .....	133
Cat pedigree determined by gene tests.....	133
Diagnostic aids to selective breeding .....	133
<i>Selection of desirable traits</i> .....	133
<i>Gene variations and fat content of beef</i> .....	134
<i>Using genetic markers for improved milk production in dairy cattle</i> .....	134
<i>Application of bovine genomics for improving milk yield</i> .....	135
<i>Recognition of hereditary syndromes</i> .....	135
Genetic markers in animals .....	136
<i>SNP genotyping in animals</i> .....	136
<i>SNP genotyping for selective breeding of chicken</i> .....	136
Animal identity and parentage analysis.....	136
Animal species identification in food .....	137
Diagnosis of infections.....	137
<i>Bacterial infections</i> .....	137
<i>Diagnosis of fungal infections in animals</i> .....	138
<i>Diagnosis of viral infections</i> .....	138
<i>Molecular diagnosis of avian influenza</i> .....	140
<i>Molecular diagnosis of swine influenza</i> .....	141
<i>Diagnosis of parasitic infections</i> .....	142
<i>Detection of natural or bioterror threats to livestock</i> .....	142
<i>Detection of Trichostrongylus axei DNA in cattle</i> .....	143
Molecular diagnosis of prion diseases .....	143

<i>Bovine spongiform encephalopathy</i> .....	143
<i>Testing for BSE in living animals</i> .....	145
<i>Prions in urine</i> .....	145
<i>Diagnosis of chronic wasting disease in wildlife</i> .....	146
Developing new tests for prion diseases.....	146
<i>Differentiation among various types of TSEs</i> .....	146
<i>Protein cyclic amplification</i> .....	146
<i>Antibody tests for prion diseases</i> .....	147
<i>Scrapie genotyping</i> .....	147
<i>A real-time ultrasonic method for prion protein detection</i> .....	148
Companies involved in developing molecular diagnostics for TSEs.....	148
Diagnosis of genetic disorders .....	149
<i>Genetic screening of companion animals</i> .....	149
<i>Genes associated with exercise-induced collapse</i> .....	149
<i>Preimplantation genetic diagnosis</i> .....	149
Diagnosis of cancer in animals.....	150
<i>Diagnosis of skin cancer</i> .....	150
<i>Diagnosis of canine mammary carcinoma</i> .....	150
<b>Diagnosis of food-borne pathogens .....</b>	<b>151</b>
Introduction .....	151
Molecular diagnostic methods used in food-borne infections .....	151
Detection of <i>Listeria</i> -contaminated foods .....	152
<i>Optical biosensor for detection of Listeria</i> .....	152
<i>Real-time PCR for detection of Listeria</i> .....	153
Detection of <i>Salmonella</i> .....	153
<i>MicroSEQ® Salmonella Detection Kit</i> .....	153
Detection of toxoplasmosis.....	153
<i>E. Coli</i> detection .....	154
<i>DuPont Bax system</i> .....	154
<i>MLG method for detection of multiple STEC strains</i> .....	154
<i>MicroSEQ® E. Coli Detection Kit</i> .....	154
<i>RapidFinder™ STEC</i> .....	155
A genomic approach to study of animal food-borne illness in humans .....	155
Limitations of use of molecular probes in food analysis .....	155
Companies with technologies for food pathogen detection.....	156
Biotechnology-based novel diagnostics for aquatic animals.....	157
<b>Detection of chemicals in foods of animal origin.....</b>	<b>157</b>
<b>Companies developing molecular diagnostics for animals .....</b>	<b>158</b>
<b>5. Biotechnology-based Veterinary Medicine .....</b>	<b>159</b>
<b>Introduction .....</b>	<b>159</b>
<b>Biotechnology versus pharmaceutical products .....</b>	<b>159</b>
<b>Role of biotechnology in drug discovery and development .....</b>	<b>160</b>
Cost of veterinary vs. human drug discovery and development.....	160
Advantages and disadvantages of testing biotech products in animal models.....	161
Biotechnology-based antiparasitic drugs .....	161
<b>Non-antibiotic strategies for control of infections in animals.....</b>	<b>161</b>
Probiotics.....	162
<i>Potential role for probiotics in the human gut</i> .....	162
<i>Potential role for probiotics in animals</i> .....	162
<i>Probiotic bacteria for control of pathogens in cattle</i> .....	162
Nonantibiotic drugs for infections in animals.....	163
<i>Immunomodulation as an alternative to antibiotics in infections</i> .....	164
<i>Cathelicidins: effector molecules of mammalian innate immunity</i> .....	164
<i>Bacteriophage therapy for antibiotic resistance</i> .....	164
<b>Biotechnology for treating tendon injuries .....</b>	<b>165</b>
Use of growth factors to facilitate tendon injuries.....	165
<b>Productivity enhancers .....</b>	<b>165</b>
Bovine somatotropin for increasing milk production in dairy cows .....	166
Increasing milk production in cows by feeding propionibacteria.....	167
Use of growth factors .....	167
<b>Transgenic plant products for use in animals.....</b>	<b>167</b>
<b>Biotechnology-based vaccines .....</b>	<b>168</b>
Modern vaccines without viral non-structural proteins.....	168
Plant-derived vaccines for use in animals .....	169
Nano-bead vaccine adjuvant .....	170
Genetically engineered vaccines.....	170
<i>Application of nucleic acid vaccines in veterinary medicine</i> .....	170
<i>DNA vaccines</i> .....	170
<i>DNA vaccine for tuberculosis</i> .....	172
<i>DNA vaccines for West Nile encephalitis</i> .....	173

<i>DNA vaccines for cancer</i> .....	173
<i>Gene-based vaccine for Marek's disease</i> .....	174
<i>Genetic engineering of live rabies vaccines</i> .....	174
<i>Genetically engineered vaccines for equine encephalitis</i> .....	174
<i>Genetically engineered vaccines for Johne's disease</i> .....	175
<i>Rational engineering of virus capsids to produce FMD vaccine</i> .....	175
<i>Vaccines against avian influenza</i> .....	176
<i>Vaccines against parasitic infections</i> .....	177
Recombinant marker vaccines .....	177
<i>Marker vaccines for foot-and-mouth disease</i> .....	177
<i>Marker vaccine for Newcastle disease</i> .....	178
<i>Vaccines for classical swine fever</i> .....	178
Vaccines for tick control.....	178
Vaccination to protection swine from H1N1 influenza virus infection .....	179
Vaccination of cattle to prevent E. coli transmission to consumers in meat .....	179
Vaccines for bacterial equine respiratory infections.....	180
Use of RNAi to develop vaccines for viral infections in prawns.....	180
Companies developing biotechnology-based vaccines .....	180
<b>Biotechnology in treatment of parasitic infections.....</b>	<b>181</b>
<b>Biotechnology in the treatment of CNS disorders in pet animals .....</b>	<b>181</b>
Paraplegia due to acute spinal cord injury in dogs .....	181
Personalized approach to Niemann-Pick type C1 in cats .....	182
<b>Role of biotechnology in veterinary oncology .....</b>	<b>183</b>
Personalized management of dogs with high-grade B-cell lymphoma .....	183
VDC-1101 for treatment of lymphoma in dogs.....	183
<b>Cell Therapy.....</b>	<b>184</b>
Umbilical cord blood stem cells .....	184
Application of stem cells in veterinary medicine .....	184
<i>Use of stem cells to repair tendon injuries in horses</i> .....	184
<i>Stem cells for spinal cord injury in dogs</i> .....	185
<b>Gene therapy .....</b>	<b>186</b>
Gene therapy vectors .....	186
Gene therapy by mitochondrial transfer .....	186
In utero gene therapy .....	187
Gene editing.....	187
Genome engineering by using TALENs .....	187
Genome editing by using CRISPR system .....	188
<i>CRISPER system for creating animal models of human diseases</i> .....	188
<i>CRISPR-Cas9 system for producing tuberculosis-resistant cows</i> .....	189
<i>CRISPR-Cas9 for inactivation of pig retrovirus for xenotransplantation</i> .....	189
Applications of gene therapy in veterinary medicine .....	189
<i>Gene therapy for arthritis</i> .....	189
<i>Gene therapy for blindness in dogs due to Leber congenital amaurosis</i> .....	190
<i>Gene therapy for cardiomyopathy in dogs</i> .....	190
<i>Gene therapy for diabetes in dogs</i> .....	190
<i>Gene therapy for endocrine disorders</i> .....	191
<i>Gene therapy for hematological disorders</i> .....	191
<i>Gene therapy for inherited disorders of metabolism in dogs</i> .....	192
<i>Gene therapy to increase disease resistance</i> .....	193
<i>Gene therapy for infections</i> .....	193
<i>Gene therapy for renal failure</i> .....	193
Cancer gene therapy .....	194
<i>Antiangiogenic cancer gene therapy in dogs</i> .....	194
<i>Brain tumors in cats and dogs</i> .....	194
<i>Breast cancer in dogs</i> .....	195
<i>Canine hemangiosarcoma</i> .....	196
<i>Canine malignant melanoma</i> .....	196
<i>Canine soft tissue sarcoma</i> .....	197
<i>Melanoma in horses</i> .....	197
<i>Oncolytic virotherapy for cancer in dogs</i> .....	198
<b>6. Research in Animal Biotechnology .....</b>	<b>199</b>
<b>Introduction .....</b>	<b>199</b>
<b>Research institutes .....</b>	<b>199</b>
<b>Ethical issues of research in animal biotechnology .....</b>	<b>207</b>
<b>Future prospects.....</b>	<b>208</b>
Genome wide association studies for investigation of declining fertility in cattle .....	208
Strategies for control of twinning in cattle.....	209
Future developments of molecular diagnostics .....	209
Future of vaccine application in veterinary medicine .....	209
<i>Promotion of innate immunity in animals</i> .....	209

<i>Identification of key parasite antigens for eliciting immune response</i> .....	210
<i>Virus-like particle vaccines for lasting immune response</i> .....	210
Control of respiratory virus infections .....	210
Control and prevention of bioterrorism diseases in animals .....	211
Genetic control of disease resistance .....	211
<i>Production of cattle lacking prion protein</i> .....	212
Application of genetics and biotechnology to wildlife management .....	212
Future of animal genomics .....	213
Future prospects of in vitro meat production .....	213
<b>7. Animal Biotechnology Markets</b> .....	<b>215</b>
<b>Introduction</b> .....	<b>215</b>
<b>Markets for biotechnology-based products for animal healthcare</b> .....	<b>216</b>
Markets for biopharmaceuticals for animals .....	217
<i>Markets for recombinant proteins for animal healthcare</i> .....	218
<i>Markets for vaccines for animals</i> .....	218
Markets for animal diagnostics .....	218
<i>Test for bovine spongiform encephalopathy</i> .....	218
<b>Animal biotechnology markets according to therapeutic areas</b> .....	<b>219</b>
<b>Markets for biotechnology-based animal products for humans</b> .....	<b>219</b>
Transgenic proteins .....	220
Market for xenotransplantation .....	220
<b>Strategies for promoting use of animal biotechnology</b> .....	<b>221</b>
Financial losses from death and disease in animals .....	221
<i>Losses in farm animals</i> .....	221
<i>Losses in poultry</i> .....	221
<i>Losses in equine industry</i> .....	221
The emerging role of pet owners .....	221
Improvement in cattle through application of biotechnology .....	222
<i>Economic aspects of genomic evaluation of dairy cattle</i> .....	222
<i>Pig market</i> .....	222
<i>Cattle Market</i> .....	223
<i>Poultry market</i> .....	223
<i>Milk from genetically modified cows</i> .....	223
Impact of biotechnology on fish markets .....	223
Role of biotechnology in livestock performance enhancer market .....	224
Gene transfer technologies .....	224
In vitro meat production and animal biotechnology markets .....	224
Cost-benefit aspects of transgenic proteins .....	224
<i>Lower costs of transgenic production</i> .....	224
<i>Lower costs of treatment</i> .....	225
<b>Unmet needs in animal biotechnology</b> .....	<b>225</b>
<b>Future prospects of animal biotechnology</b> .....	<b>226</b>
Farm animals .....	227
<i>Global trends in epidemiology of livestock diseases</i> .....	227
<i>Genetic engineering of animals</i> .....	227
Companion animals .....	227
Animal molecular diagnostic markets .....	228
<b>8. Regulatory issues</b> .....	<b>229</b>
<b>Introduction</b> .....	<b>229</b>
<b>Regulatory agencies for veterinary biotechnology in the US</b> .....	<b>229</b>
<b>FDA regulatory issues in agricultural biotechnology</b> .....	<b>230</b>
FDA guidelines on use of antibiotics in food-producing animals .....	231
FDA and veterinary stem cell therapy .....	232
<b>Food safety evaluation of transgenic animals</b> .....	<b>233</b>
Food from cloned animals .....	234
<b>FDA investigation of drug transfer into eggs</b> .....	<b>235</b>
<b>Animal feed safety</b> .....	<b>236</b>
Medicated feeds .....	237
<b>Regulatory issues for production of transgenic proteins</b> .....	<b>237</b>
<b>Risks of animal biotechnology</b> .....	<b>237</b>
<b>FDA regulation of bovine products</b> .....	<b>238</b>
<b>Worldwide biotechnology regulatory and trade issues</b> .....	<b>238</b>
<b>9. Companies Involved in Animal Biotechnology</b> .....	<b>241</b>
<b>Introduction</b> .....	<b>241</b>
<b>Biotechnology at top veterinary pharmaceutical companies</b> .....	<b>241</b>
<b>Profiles of selected companies</b> .....	<b>241</b>
<b>Collaborations</b> .....	<b>377</b>
