**July 2018**

**A Jain PharmaBiotech Report**

## **A U T H O R ' S   B I O G R A P H Y**

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries, and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently, he is a consultant and CEO at Jain PharmaBiotech.

Prof. Jain's 476 publications include 30 books (6 as editor + 24 as author) and 50 special reports which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. He has also written a textbook of gene therapy, which is the first book on this subject to be translated into the Chinese language. A book on gene therapy companies was published in 2000 by John Wiley & Sons and the 2017 version is included in a special report on gene therapy available from Jain PharmaBiotech Publications. Other recent publications include "Handbook of Biomarkers" (Springer 2010, Chinese ed Chemical Press 2016, 2<sup>nd</sup> ed 2017), Handbook of Nanomedicine (Springer 2008; Chinese ed, Peking University Press 2011; 3rd edition Springer, 2017), and Applications of Biotechnology in Oncology (Springer 2014).

# TABLE OF CONTENTS

<b>0. Executive Summary .....</b>	<b>13</b>
<b>1. Introduction to Animal Biotechnology .....</b>	<b>15</b>
<b>Introduction .....</b>	<b>15</b>
<b>Historical evolution of animal biotechnology .....</b>	<b>15</b>
<b>Basics of biotechnology .....</b>	<b>16</b>
DNA .....	16
RNA .....	16
Genes.....	17
Single nucleotide polymorphisms .....	17
Copy number variations in the genome.....	17
DNA sequences.....	18
Gene expression .....	18
Gene regulation .....	19
Proteins .....	19
<i>Functions of proteins .....</i>	<i>20</i>
<i>Recombinant proteins.....</i>	<i>20</i>
<b>Animal genetics .....</b>	<b>21</b>
Molecular genetics .....	21
Twinning in cattle.....	21
Pig genetics.....	21
Genetic studies in dogs.....	22
<b>Animal genomics .....</b>	<b>22</b>
Avian genomes .....	22
<i>Chicken genome .....</i>	<i>22</i>
<i>Turkey genome.....</i>	<i>23</i>
The mouse genome.....	24
The cat genome.....	24
The dog genome.....	25
<i>Sequencing of the dog genome.....</i>	<i>26</i>
<i>Comparison of genomes of healthy and diseased dogs.....</i>	<i>27</i>
<i>Analysis of DNA copy number variation.....</i>	<i>28</i>
Marsupial genomes .....	28
Genome of the Tibetan antelope .....	29
Livestock genomics .....	29
<i>Bovine genome.....</i>	<i>30</i>
<i>Bovine SNP map .....</i>	<i>31</i>
<i>1,000 Bull Genomes Project .....</i>	<i>32</i>
<i>Bovine stomach microbiome genes.....</i>	<i>32</i>
<i>Camel genome .....</i>	<i>33</i>
<i>Goat genome.....</i>	<i>33</i>
<i>Horse genome .....</i>	<i>34</i>
<i>Pig genome.....</i>	<i>35</i>
<i>Sheep genome .....</i>	<i>36</i>
Fish genomes .....	36
<i>The Salmon genome.....</i>	<i>36</i>
<i>Genome of the Northern snakehead .....</i>	<i>38</i>
Whale genome .....	38
Genomes of non-human primates .....	39
<i>Chimpanzee genome .....</i>	<i>39</i>
<i>Genome of the rhesus macaque.....</i>	<i>39</i>
<i>Genome of gorilla .....</i>	<i>40</i>
Priority genome list of the National Human Genome Research Institute .....	40
<b>Animal proteomics .....</b>	<b>41</b>
Applications of proteomics in animals .....	41
<i>Caseins in goat milk .....</i>	<i>42</i>
<i>Lactic acid bacteria.....</i>	<i>42</i>
<i>Applications of proteomics in animal healthcare .....</i>	<i>42</i>
<b>Bioinformatics .....</b>	<b>42</b>
<b>Biomarkers and animal health .....</b>	<b>44</b>
<b>Personalized medicine for pet animals.....</b>	<b>46</b>
<b>Monoclonal antibodies and animal health .....</b>	<b>46</b>
Antigenomics.....	46
<b>Nanobiotechnology and animal health .....</b>	<b>47</b>
<b>Stem cells and animal biotechnology .....</b>	<b>47</b>
Rescuing extinct animals with stem cells.....	47
<b>Animal biotechnology in relation to other technologies .....</b>	<b>48</b>

<b>2. Application of Biotechnology in Animals .....</b>	<b>51</b>
<b>Introduction .....</b>	<b>51</b>
<b>Applications of animal genomics.....</b>	<b>51</b>
Bovine ankyrin 1 gene and beef tenderness .....	51
Chicken breeding based on genomics .....	52
Genomics of disease resistance.....	52
Genomic selection to exploit gene-environment interactions.....	52
Genome wide associations and milk production in cows .....	53
Low cost genotyping for genetic improvement in dairy cattle .....	53
SNPs and longevity in dairy cattle .....	53
Share genomic data to improve cattle breeding programs .....	54
Statistical genomics to improve breeding .....	54
<b>Genetic engineering and gene editing.....</b>	<b>54</b>
CRISPR/Cas9 gene editing in animals .....	54
Disease control by genetic engineering .....	55
Improvement of livestock by genetic engineering.....	55
Limitations and precautions for genetic engineering .....	55
<b>Transgenic animal technology .....</b>	<b>55</b>
Cloning animals .....	57
<i>Nuclear transfer technology.....</i>	<i>57</i>
<i>Nuclear bisection for cloning.....</i>	<i>58</i>
<i>Zona-free cloning method.....</i>	<i>59</i>
<i>Abnormalities in cloned animals.....</i>	<i>59</i>
<i>Cloning from embryonic cells.....</i>	<i>61</i>
<i>Cloning of rabbits.....</i>	<i>61</i>
<i>Cloning the rat .....</i>	<i>61</i>
<i>Cloning the horse.....</i>	<i>62</i>
<i>Cloning the cow .....</i>	<i>62</i>
<i>Cloning the dog .....</i>	<i>62</i>
<i>Cloning in primates .....</i>	<i>63</i>
Episomal vector-mediated gene delivery .....	63
Lentiviral transduction of male germ-line stem cells .....	64
Lentiviral transgenesis.....	64
Retrovector-mediated production of transgenic animals .....	64
Sperm-mediated gene transfer .....	64
<b>Animal models of human diseases .....</b>	<b>65</b>
Gene editing in large animals .....	66
Cloning of gene-edited dogs as models of human genetic diseases.....	67
<b>Production of recombinant proteins.....</b>	<b>67</b>
<b>Transgenic pharmaceuticals .....</b>	<b>67</b>
Proteins from the milk of transgenic animals .....	68
Advantages of milk as source of transgenic proteins.....	69
<i>Therapeutic proteins from rabbit milk .....</i>	<i>70</i>
<i>Recombinant human antibodies from cows.....</i>	<i>70</i>
<i>Therapeutic proteins from goat milk .....</i>	<i>71</i>
Chicken transgenesis for production of biopharmaceuticals.....	71
Concluding remarks about production of transgenic proteins in animals .....	72
Companies involved in production of transgenic pharmaceuticals .....	72
<b>Transgenic food products .....</b>	<b>73</b>
Milking genetically modified cows.....	73
Genetically modified fish .....	73
<i>Genetically engineered salmon .....</i>	<i>73</i>
<i>Gene transfer approaches to enhance growth of other fish species .....</i>	<i>74</i>
Cloned animals as sources of milk and meat.....	74
<b>Animal feeds from transgenic plants .....</b>	<b>75</b>
Transgenic modification of plants to increase nutritional value of animal feeds.....	75
<b>Transgenic disease models .....</b>	<b>75</b>
Technologies to create transgenic disease models .....	75
<i>Gene manipulation techniques.....</i>	<i>76</i>
<i>Embryonic stem cells for gene targeting .....</i>	<i>76</i>
<i>Homologous recombination .....</i>	<i>76</i>
<i>Transgenic animal models of human diseases.....</i>	<i>77</i>
Transgenic models for studying human drug metabolism and toxicity .....	78
The Human Genome Project and the role of transgenics .....	78
Genomic and proteomic analyses of transgenic animal models.....	79
Concern about health and welfare of transgenic animals .....	79
Safety of transgenic technology .....	80
Concluding remarks about use of transgenic animals.....	80
<b>RNA interference technology .....</b>	<b>80</b>
RNAi versus antisense .....	80
Applications of RNAi in animal biotechnology .....	81

<b>Xenotransplantation .....</b>	<b>81</b>
Pigs for xenotransplantation .....	82
<i>Genetically engineered pigs for transplants</i> .....	82
<i>Risks of xenotransplantation</i> .....	83
World Health Organization and xenotransplantation .....	83
<b>Ethical aspects of animal biotechnology .....</b>	<b>84</b>
<b>3. A Biotechnology Perspective of Animals Diseases .....</b>	<b>85</b>
<b>Introduction .....</b>	<b>85</b>
<b>Infections in animals .....</b>	<b>85</b>
Viral infections.....	86
<i>Avian viral infections</i> .....	86
<i>Avian influenza</i> .....	86
<i>Animal biotechnology implications of H1N1 influenza</i> .....	89
<i>Animal corona viruses and human SARS</i> .....	90
<i>Avian coronavirus</i> .....	90
<i>Acute lymphoproliferative disease of cattle</i> .....	91
<i>Bluetongue virus</i> .....	92
<i>Canine virus infections</i> .....	92
<i>Classical swine fever</i> .....	93
<i>Developing new treatments against FMD</i> .....	93
<i>Equine viruses</i> .....	94
<i>Feline virus infections</i> .....	95
<i>Foot-and-mouth disease</i> .....	95
<i>Porcine reproductive and respiratory syndrome virus</i> .....	97
<i>Rabies</i> .....	97
<i>Rinderpest</i> .....	98
<i>Schmallenberg virus</i> .....	98
<i>Virus infections in fishes</i> .....	99
Bacterial infections.....	99
<i>Bovine tuberculosis</i> .....	99
<i>Brucellosis</i> .....	100
<i>Mycoplasmal pneumonia</i> .....	100
Fungal infections.....	100
Protozoal infections .....	101
<i>Coccidiosis</i> .....	101
<i>Neosporosis</i> .....	101
<i>Toxoplasmosis</i> .....	102
<i>Trypanosomiasis</i> .....	102
Nematodes.....	102
Infections that cross the species barrier.....	103
Complications of bacterial infections and antibiotic use in animals .....	103
<b>Transmissible spongiform encephalopathies (TSEs) .....</b>	<b>104</b>
Inter-species transfer of prions.....	104
Scrapie.....	104
Bovine spongiform encephalopathy .....	105
<i>Epidemiology of BSE</i> .....	105
<i>Biomarkers in the urine of BSE infected cattle</i> .....	106
<i>Human health implications of BSE</i> .....	106
<i>Breeding animals protected against BSE</i> .....	107
TSE research.....	107
<i>Prion gene haplotyping</i> .....	107
<i>Pharmacological approaches to TSE research</i> .....	107
<i>Molecular diagnostic approach to TSE research</i> .....	108
<i>RNAi for knockdown of the bovine prion gene</i> .....	108
<b>Chronic wasting disease .....</b>	<b>109</b>
<i>Chronic wasting disease in wildlife</i> .....	109
<i>Chronic wasting disease of the cattle</i> .....	110
<b>Genetic disorders in farm animals .....</b>	<b>111</b>
<b>Genetic predisposition to acquired diseases in animals .....</b>	<b>111</b>
<b>Diseases of pet animals .....</b>	<b>111</b>
Canine anemia .....	111
Canine autoimmune diseases .....	112
Canine neuropsychiatric disorders.....	112
<i>Canine obsessive-compulsive disorder</i> .....	112
<i>Canine dementia</i> .....	113
<i>Canine epilepsy</i> .....	113
Canine glaucoma .....	113
Canine cardiovascular disease .....	114
<i>Heart failure</i> .....	114
<i>Cardiac complications of canine babesiosis</i> .....	114

Diabetes .....	115
<i>Role of biotechnology in management of diabetes</i> .....	115
Arthritis .....	116
Cancer in dogs.....	116
<i>Biotechnology-based anticancer therapeutics</i> .....	116
<i>Cancer clinical trials in dogs</i> .....	117
<i>Canine Comparative Oncology &amp; Genomics Consortium</i> .....	118
<b>Preventive veterinary medicine</b> .....	<b>118</b>
Prevention of introduction of foreign animal diseases.....	118
Producing transgenic cattle resistant to BSE .....	118
<b>Zoonotic diseases</b> .....	<b>119</b>
Global impact of zoonotic diseases .....	119
Viruses that emerge in animals and spread to humans .....	119
Collaborative management of animal and human health .....	120
Vaccines for zoonotic viral diseases .....	120
<b>4. Molecular Diagnostics in Animals</b> .....	<b>123</b>
<b>Introduction</b> .....	<b>123</b>
<b>Nucleic acid technologies</b> .....	<b>123</b>
The polymerase chain reaction .....	123
<i>Basic Principles of PCR</i> .....	123
<i>Target selection</i> .....	124
<i>Detection of amplified DNA</i> .....	124
<i>Real-time PCR systems</i> .....	124
<i>LightCycler PCR system</i> .....	125
<i>Molecular beacons</i> .....	125
<i>Applications of PCR in veterinary medicine</i> .....	125
Fluorescent in situ hybridization.....	126
<b>Immunodiagnosics</b> .....	<b>128</b>
Enzyme-linked immunoassays .....	128
Bovine Gamma Interferon Test.....	128
Antigen diagnosis of trichinosis.....	129
Parachek™ for the diagnosis of Johne's disease .....	129
Antibodies for differentiation between vaccinated and infected animals.....	130
<b>Biochip/microarray technology</b> .....	<b>130</b>
Applications of microarrays in animal biotechnology .....	131
<i>Cattlearray3800 for functional genomics</i> .....	131
<i>eSensor™ electrochemical biochip</i> .....	132
<i>FR 48 microfluidic biochip</i> .....	132
<i>SNPchiMp v.3 for standardizing livestock SNP data</i> .....	132
<b>Biosensors</b> .....	<b>133</b>
Immunosensors.....	133
<i>Biosensor for ovulation prediction in dairy cows</i> .....	134
<b>Flow cytometry for animal diagnostics</b> .....	<b>135</b>
<b>Molecular imaging in animals</b> .....	<b>135</b>
<b>Veterinary cytogenetics</b> .....	<b>136</b>
<b>Applications of sequencing for veterinary diagnostics</b> .....	<b>136</b>
Role of sequencing in detection of cancer biomarkers .....	136
DNA sequencing for study of bacterial epidemics .....	137
Role of sequencing in epidemic of Shiga toxin-producing <i>E. coli</i> .....	137
Role of sequencing in the study of genetic disorders in animals .....	137
<b>Applications of molecular diagnostics in animals</b> .....	<b>138</b>
Canine DNA testing .....	139
Cat pedigree determined by gene tests.....	139
Diagnostic aids to selective breeding .....	139
<i>Selection of desirable traits</i> .....	139
<i>Gene variations and fat content of beef</i> .....	140
<i>Using genetic markers for improved milk production in dairy cattle</i> .....	140
<i>Application of bovine genomics for improving milk yield</i> .....	141
<i>Recognition of hereditary syndromes</i> .....	141
Genetic markers in animals .....	142
<i>SNP genotyping in animals</i> .....	142
<i>SNP genotyping for selective breeding of chicken</i> .....	142
Animal identity and parentage analysis.....	142
Animal species identification in food .....	143
Diagnosis of infections .....	143
<i>Bacterial infections</i> .....	143
<i>Diagnosis of fungal infections in animals</i> .....	144
<i>Diagnosis of viral infections</i> .....	144
<i>Molecular diagnosis of avian influenza</i> .....	146
<i>Molecular diagnosis of swine influenza</i> .....	147

<i>Diagnosis of parasitic infections</i> .....	148
<i>Detection of natural or bioterror threats to livestock</i> .....	148
<i>Detection of Trichostrongylus axei DNA in cattle</i> .....	149
Molecular diagnosis of prion diseases .....	149
<i>Bovine spongiform encephalopathy</i> .....	149
<i>Testing for BSE in living animals</i> .....	151
<i>Prions in urine</i> .....	151
<i>Diagnosis of chronic wasting disease in wildlife</i> .....	152
Developing new tests for prion diseases.....	152
<i>Differentiation among various types of TSEs</i> .....	152
<i>Protein cyclic amplification</i> .....	152
<i>Antibody tests for prion diseases</i> .....	153
<i>Scrapie genotyping</i> .....	153
<i>A real-time ultrasonic method for prion protein detection</i> .....	154
Companies involved in developing molecular diagnostics for TSEs .....	154
Diagnosis of genetic disorders .....	155
<i>Genetic screening of companion animals</i> .....	155
<i>Genes associated with exercise-induced collapse</i> .....	155
<i>Preimplantation genetic diagnosis</i> .....	155
Diagnosis of cancer in animals.....	156
<i>Diagnosis of skin cancer</i> .....	156
<i>Diagnosis of canine mammary carcinoma</i> .....	156
<b>Diagnosis of food-borne pathogens .....</b>	<b>157</b>
Introduction .....	157
Molecular diagnostic methods used in food-borne infections .....	157
Detection of Listeria-contaminated foods .....	158
<i>Optical biosensor for detection of Listeria</i> .....	158
<i>Real-time PCR for detection of Listeria</i> .....	159
Detection of Salmonella .....	159
<i>MicroSEQ® Salmonella Detection Kit</i> .....	159
Detection of toxoplasmosis.....	159
<i>E. Coli</i> detection .....	160
<i>DuPont Bax system</i> .....	160
<i>MLG method for detection of multiple STEC strains</i> .....	160
<i>MicroSEQ® E. Coli Detection Kit</i> .....	160
<i>RapidFinder™ STEC</i> .....	161
A genomic approach to study of animal food-borne illness in humans .....	161
Limitations of use of molecular probes in food analysis .....	161
Companies with technologies for food pathogen detection.....	162
Biotechnology-based novel diagnostics for aquatic animals.....	163
<b>Detection of chemicals in foods of animal origin.....</b>	<b>163</b>
<b>Companies developing molecular diagnostics for animals .....</b>	<b>164</b>
<b>5. Biotechnology-based Veterinary Medicine .....</b>	<b>165</b>
<b>Introduction .....</b>	<b>165</b>
<b>Biotechnology versus pharmaceutical products.....</b>	<b>165</b>
<b>Role of biotechnology in drug discovery and development .....</b>	<b>166</b>
Biological therapies in veterinary medicine .....	166
Cost of veterinary vs. human drug discovery and development.....	166
Advantages and disadvantages of testing biotech products in animal models.....	167
Biotechnology-based antiparasitic drugs .....	167
<b>Non-antibiotic strategies for control of infections in animals.....</b>	<b>167</b>
Probiotics.....	168
<i>Potential role for probiotics in the human gut</i> .....	168
<i>Potential role for probiotics in animals</i> .....	168
<i>Probiotic bacteria for control of pathogens in cattle</i> .....	169
Nonantibiotic drugs for infections in animals.....	170
<i>Immunomodulation as an alternative to antibiotics in infections</i> .....	170
<i>Cathelicidins: effector molecules of mammalian innate immunity</i> .....	170
<i>Bacteriophage therapy for antibiotic resistance</i> .....	171
<b>Biotechnology for treating tendon injuries .....</b>	<b>171</b>
Use of growth factors to facilitate tendon injuries.....	171
<b>Productivity enhancers .....</b>	<b>172</b>
Bovine somatotropin for increasing milk production in dairy cows .....	172
Increasing milk production in cows by feeding propionibacteria.....	173
Use of growth factors .....	173
<b>Transgenic plant products for use in animals.....</b>	<b>174</b>
<b>Biotechnology-based vaccines .....</b>	<b>174</b>
Modern vaccines without viral non-structural proteins.....	175
Plant-derived vaccines for use in animals .....	175
Nano-bead vaccine adjuvant .....	176

Genetically engineered vaccines.....	176
<i>Application of nucleic acid vaccines in veterinary medicine</i> .....	176
<i>DNA vaccines</i> .....	176
<i>DNA vaccine for tuberculosis</i> .....	178
<i>DNA vaccines for West Nile encephalitis</i> .....	179
<i>DNA vaccines for cancer</i> .....	180
<i>Gene-based vaccine for Marek's disease</i> .....	180
<i>Genetic engineering of live rabies vaccines</i> .....	180
<i>Genetically engineered vaccines for equine encephalitis</i> .....	181
<i>Genetically engineered vaccines for Johne's disease</i> .....	181
<i>Rational engineering of virus capsids to produce FMD vaccine</i> .....	181
<i>Vaccines against avian influenza</i> .....	182
<i>Vaccines against parasitic infections</i> .....	183
Recombinant marker vaccines .....	183
<i>Marker vaccines for foot-and-mouth disease</i> .....	183
<i>Marker vaccine for Newcastle disease</i> .....	184
<i>Vaccines for classical swine fever</i> .....	184
Vaccines for tick control.....	185
Vaccination to protection swine from H1N1 influenza virus infection .....	185
Vaccination of cattle to prevent <i>E. coli</i> transmission to consumers in meat .....	185
Vaccines for bacterial equine respiratory infections.....	186
Use of RNAi to develop vaccines for viral infections in prawns.....	186
Companies developing biotechnology-based vaccines .....	187
<b>Biotechnology in treatment of parasitic infections.....</b>	<b>187</b>
<b>Biotechnology in the treatment of CNS disorders in pet animals .....</b>	<b>188</b>
Paraplegia due to acute spinal cord injury in dogs .....	188
Personalized approach to Niemann-Pick type C1 in cats .....	188
<b>Role of biotechnology in veterinary oncology .....</b>	<b>189</b>
Personalized management of dogs with high-grade B-cell lymphoma .....	189
VDC-1101 for treatment of lymphoma in dogs.....	189
<b>Cell Therapy.....</b>	<b>190</b>
Umbilical cord blood stem cells .....	190
Application of stem cells in veterinary medicine .....	190
<i>Use of stem cells to repair tendon injuries in horses</i> .....	191
<i>Stem cells for spinal cord injury in dogs</i> .....	191
<b>Gene therapy .....</b>	<b>192</b>
Gene therapy vectors .....	192
Gene therapy by mitochondrial transfer .....	193
In utero gene therapy .....	193
Gene editing.....	193
Genome engineering by using TALENs .....	193
Genome editing by using CRISPR system .....	194
<i>CRISPER system for creating animal models of human diseases</i> .....	194
<i>CRISPR-Cas9 system for producing tuberculosis-resistant cows</i> .....	195
<i>CRISPR-Cas9 for inactivation of pig retrovirus for xenotransplantation</i> .....	195
Applications of gene therapy in veterinary medicine .....	195
<i>Gene therapy for arthritis</i> .....	195
<i>Gene therapy for blindness in dogs due to Leber congenital amaurosis</i> .....	196
<i>Gene therapy for cardiomyopathy in dogs</i> .....	196
<i>Gene therapy for diabetes in dogs</i> .....	197
<i>Gene therapy for endocrine disorders</i> .....	197
<i>Gene therapy for hematological disorders</i> .....	197
<i>Gene therapy for inherited disorders of metabolism in dogs</i> .....	198
<i>Gene therapy to increase disease resistance</i> .....	199
<i>Gene therapy for infections</i> .....	199
<i>Gene therapy for renal failure</i> .....	199
Cancer gene therapy .....	200
<i>Antiangiogenic cancer gene therapy in dogs</i> .....	200
<i>Brain tumors in cats and dogs</i> .....	200
<i>Breast cancer in dogs</i> .....	201
<i>Canine hemangiosarcoma</i> .....	202
<i>Canine malignant melanoma</i> .....	202
<i>Canine soft tissue sarcoma</i> .....	203
<i>Melanoma in horses</i> .....	204
<i>Oncolytic virotherapy for cancer in dogs</i> .....	204
<b>6. Research in Animal Biotechnology .....</b>	<b>205</b>
<b>Introduction .....</b>	<b>205</b>
<b>Research institutes .....</b>	<b>205</b>
<b>Ethical issues of research in animal biotechnology .....</b>	<b>213</b>
<b>Future prospects.....</b>	<b>214</b>

Genome wide association studies for investigation of declining fertility in cattle .....	214
Strategies for control of twining in cattle .....	215
Future developments of molecular diagnostics .....	215
Future of vaccine application in veterinary medicine .....	215
<i>Promotion of innate immunity in animals</i> .....	215
<i>Identification of key parasite antigens for eliciting immune response</i> .....	216
<i>Virus-like particle vaccines for lasting immune response</i> .....	216
Control of respiratory virus infections .....	216
Control and prevention of bioterrorism diseases in animals .....	217
Genetic control of disease resistance .....	217
<i>Production of cattle lacking prion protein</i> .....	218
Application of genetics and biotechnology to wildlife management .....	218
Future of animal genomics .....	219
Future of in vitro meat production .....	219
<b>7. Animal Biotechnology Markets .....</b>	<b>221</b>
<b>Introduction .....</b>	<b>221</b>
<b>Markets for biotechnology-based products for animal healthcare .....</b>	<b>222</b>
Markets for biopharmaceuticals for animals .....	223
<i>Markets for recombinant proteins for animal healthcare</i> .....	224
<i>Markets for vaccines for animals</i> .....	224
Markets for animal diagnostics .....	224
<i>Test for bovine spongiform encephalopathy</i> .....	224
Markets for transgenic laboratory animals .....	225
<b>Animal biotechnology markets according to therapeutic areas .....</b>	<b>225</b>
<b>Markets for biotechnology-based animal products for humans .....</b>	<b>225</b>
Transgenic proteins .....	226
Market for xenotransplantation .....	226
<b>Strategies for promoting use of animal biotechnology .....</b>	<b>227</b>
Financial losses from death and disease in animals .....	227
<i>Losses in farm animals</i> .....	227
<i>Losses in poultry</i> .....	227
<i>Losses in equine industry</i> .....	227
The emerging role of pet owners .....	228
Improvement in cattle through application of biotechnology .....	228
<i>Economic aspects of genomic evaluation of dairy cattle</i> .....	228
<i>Pig market</i> .....	228
<i>Cattle Market</i> .....	229
<i>Poultry market</i> .....	229
<i>Milk from genetically modified cows</i> .....	229
Impact of biotechnology on fish markets .....	230
Role of biotechnology in livestock performance enhancer market .....	230
Gene transfer technologies .....	230
In vitro meat production and animal biotechnology markets .....	230
Cost-benefit aspects of transgenic proteins .....	231
<i>Lower costs of transgenic production</i> .....	231
<i>Lower costs of treatment</i> .....	231
<b>Unmet needs in animal biotechnology .....</b>	<b>231</b>
<b>Future of animal biotechnology .....</b>	<b>232</b>
Farm animals .....	233
<i>Global trends in epidemiology of livestock diseases</i> .....	233
<i>Genetic engineering of animals</i> .....	233
Companion animals .....	233
Animal molecular diagnostic markets .....	234
Future marketing status of animal-derived biotechnology products .....	234
<b>8. Regulatory issues .....</b>	<b>235</b>
<b>Introduction .....</b>	<b>235</b>
<b>Regulatory agencies for veterinary biotechnology in the US .....</b>	<b>235</b>
<b>FDA regulatory issues in agricultural biotechnology .....</b>	<b>236</b>
FDA guidelines on use of antibiotics in food-producing animals .....	237
FDA and veterinary stem cell therapy .....	238
<b>Food safety evaluation of transgenic animals .....</b>	<b>239</b>
Food from cloned animals .....	240
<b>FDA investigation of drug transfer into eggs .....</b>	<b>241</b>
<b>Animal feed safety .....</b>	<b>242</b>
Medicated feeds .....	243
<b>Regulatory issues for production of transgenic proteins .....</b>	<b>243</b>
<b>Risks of animal biotechnology .....</b>	<b>243</b>
<b>FDA regulation of bovine products .....</b>	<b>244</b>
<b>Worldwide biotechnology regulatory and trade issues .....</b>	<b>244</b>

<b>9. Companies Involved in Animal Biotechnology .....</b>	<b>247</b>
<b>Introduction .....</b>	<b>247</b>
<b>Biotechnology at top veterinary pharmaceutical companies .....</b>	<b>247</b>
<b>Profiles of selected companies.....</b>	<b>247</b>
<b>Collaborations.....</b>	<b>382</b>

Table 4-3: Applications of molecular diagnostics in animals.....	138
Table 4-4: Viruses that can be detected by molecular diagnostics .....	145
Table 4-5: Testing for harmful prions in brain tissue from dead cattle.....	150
Table 4-6: Companies involved in developing molecular diagnostics for TSEs .....	154
Table 4-7: Pathogenic bacteria in food and targets for molecular diagnostic probes.....	158
Table 4-8: Companies involved in molecular diagnostics for food-borne infections .....	162
Table 4-9: Companies developing molecular diagnostics for veterinary medicine .....	164
Table 5-1: Veterinary biotechnology products.....	165
Table 5-2: Pharmaceutical versus biotechnology products.....	166
Table 5-3: Nonantibiotic strategies for control of infections .....	167
Table 5-4: Experimental DNA vaccines tested in animals .....	178
Table 5-5: Companies developing biotechnology-based vaccines for animals .....	187
Table 6-1: Areas for future research applications of animal biotechnologies .....	214
Table 7-1: Worldwide markets for biotechnology-based products for farm animals: 2017-2027 .....	222
Table 7-2: Worldwide markets for biotechnology-based products for pet animals: 2017-2027 .....	222
Table 7-3: Biotechnology-based markets for animal healthcare according to regions: 2017-2027. ....	223
Table 7-4: Biotechnology markets for farm animals according to therapeutic areas: 2017-2027 .....	225
Table 7-5: Biotechnology markets for pet animals in therapeutic areas: 2017-2027 .....	225
Table 7-6: Worldwide markets for biotechnology-based animal products for humans: 2017-2027 .....	226
Table 7-7: Future marketing status of animal-derived biotechnology products.....	234
Table 9-1: Ranking of top veterinary companies with biotechnology products.....	247
Table 9-2: Selected collaborations of companies in animal biotechnology.....	382

### Figures

Figure 1-1: Relation of animal biotechnology to other technologies and human health .....	49
Figure 2-1: Nuclear transfer technology.....	58
Figure 2-2: Generation of transgenic animals by sperm-mediated gene transfer .....	65
Figure 2-3: Genome editing in pigs .....	66
Figure 2-4: Production of therapeutic proteins in the milk of transgenic animals. ....	69
Figure 7-1: Unmet needs in animal biotechnology .....	232
