A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries, and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently, he is a consultant and CEO at Jain PharmaBiotech.

Prof. Jain's 473 publications include 28 books (5 as editor + 23 as author) and 50 special reports which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. He has also written a textbook of gene therapy, which is the first book on this subject to be translated into the Chinese language. A book on gene therapy companies was published in 2000 by John Wiley & Sons and the 2017 version is included in a special report on gene therapy available from Jain PharmaBiotech Publications. Other recent publications include "Handbook of Biomarkers" (Springer 2010, Chinese ed Chemical Press 2016, 2nd ed 2017), Handbook of Nanomedicine (Springer 2008; Chinese ed, Peking University Press 2011; 3rd edition Springer, 2017), and Applications of Biotechnology in Oncology (Springer 2014).

TABLE OF CONTENTS

0. Executive Summary	13
1. Introduction to Animal Biotechnology	15
Introduction.....	15
Historical evolution of animal biotechnology	15
Basics of biotechnology	16
DNA	16
RNA	16
Genes.....	17
Single nucleotide polymorphisms	17
Copy number variations in the genome	17
DNA sequences.....	18
Gene expression	18
Gene regulation	19
Proteins	19
<i>Functions of proteins</i>	<i>20</i>
<i>Recombinant proteins.....</i>	<i>20</i>
Animal genetics	21
Molecular genetics.....	21
Twinning in cattle.....	21
Pig genetics.....	21
Genetic studies in dogs	22
Animal genomics.....	22
Avian genomes	22
<i>Chicken genome</i>	<i>22</i>
<i>Turkey genome.....</i>	<i>23</i>
The mouse genome	24
The cat genome	24
The dog genome	25
<i>Sequencing of the dog genome.....</i>	<i>26</i>
<i>Comparison of genomes of healthy and diseased dogs.....</i>	<i>27</i>
<i>Analysis of DNA copy number variation</i>	<i>28</i>
Marsupial genomes	28
Genome of the Tibetan antelope	29
Livestock genomics	29
<i>Bovine genome.....</i>	<i>30</i>
<i>Bovine SNP map</i>	<i>31</i>
<i>1,000 Bull Genomes Project</i>	<i>32</i>
<i>Bovine stomach microbiome genes.....</i>	<i>32</i>
<i>Camel genome</i>	<i>33</i>
<i>Goat genome.....</i>	<i>33</i>
<i>Horse genome</i>	<i>34</i>
<i>Pig genome</i>	<i>35</i>
<i>Sheep genome.....</i>	<i>36</i>
Fish genomes	36
<i>The Salmon genome.....</i>	<i>36</i>
<i>Genome of the Northern snakehead</i>	<i>38</i>
Whale genome.....	38
Genomes of non-human primates	39
<i>Chimpanzee genome</i>	<i>39</i>
<i>Genome of the rhesus macaque.....</i>	<i>39</i>
<i>Genome of gorilla.....</i>	<i>40</i>
Priority genome list of the National Human Genome Research Institute	40
Animal proteomics	41
Applications of proteomics in animals	41
<i>Caseins in goat milk</i>	<i>42</i>
<i>Lactic acid bacteria.....</i>	<i>42</i>
<i>Applications of proteomics in animal healthcare</i>	<i>42</i>
Bioinformatics.....	42
Biomarkers and animal health	44
Personalized medicine for pet animals.....	46
Monoclonal antibodies and animal health	46
Antigenomics.....	46
Nanobiotechnology and animal health	46
Stem cells and animal biotechnology	47
Rescuing extinct animals with stem cells	47
Animal biotechnology in relation to other technologies	48

2. Application of Biotechnology in Animals	49
Introduction.....	49
Applications of animal genomics.....	49
Bovine ankyrin 1 gene and beef tenderness	49
Chicken breeding based on genomics	50
Genomics of disease resistance.....	50
Genomic selection to exploit gene-environment interactions	50
Genome wide associations and milk production in cows	51
Low cost genotyping for genetic improvement in dairy cattle	51
SNPs and longevity in dairy cattle	51
Share genomic data to improve cattle breeding programs	52
Statistical genomics to improve breeding	52
Genetic engineering and gene editing	52
CRISPR/Cas9 gene editing in animals	52
Disease control by genetic engineering	53
Improvement of livestock by genetic engineering.....	53
Limitations and precautions for genetic engineering	53
Transgenic animal technology	53
Cloning animals	55
<i>Nuclear transfer technology.....</i>	<i>55</i>
<i>Nuclear bisection for cloning.....</i>	<i>56</i>
<i>Zona-free cloning method</i>	<i>57</i>
<i>Abnormalities in cloned animals</i>	<i>57</i>
<i>Cloning from embryonic cells</i>	<i>59</i>
<i>Cloning of rabbits.....</i>	<i>59</i>
<i>Cloning the rat.....</i>	<i>59</i>
<i>Cloning the horse.....</i>	<i>60</i>
<i>Cloning the cow</i>	<i>60</i>
<i>Cloning the dog</i>	<i>60</i>
<i>Cloning in primates</i>	<i>61</i>
Episomal vector-mediated gene delivery	61
Lentiviral transduction of male germ-line stem cells	62
Lentiviral transgenesis	62
Retrovector-mediated production of transgenic animals	62
Sperm-mediated gene transfer	62
Production of recombinant proteins.....	63
Transgenic pharmaceuticals	64
Proteins from the milk of transgenic animals	65
Advantages of milk as source of transgenic proteins.....	65
<i>Therapeutic proteins from rabbit milk</i>	<i>66</i>
<i>Recombinant human antibodies from cows.....</i>	<i>67</i>
<i>Therapeutic proteins from goat milk</i>	<i>67</i>
Chicken transgenesis for the production of biopharmaceuticals	68
Concluding remarks about production of transgenic proteins in animals	68
Companies involved in production of transgenic pharmaceuticals	69
Transgenic food products.....	69
Milking genetically modified cows.....	69
Genetically modified fish	69
<i>Genetically engineered salmon.....</i>	<i>70</i>
<i>Gene transfer approaches to enhance growth of other fish species</i>	<i>71</i>
Cloned animals as sources of milk and meat.....	71
Animal feeds from transgenic plants.....	71
Transgenic modification of plants to increase nutritional value of animal feeds.....	71
Transgenic disease models	72
Technologies to create transgenic disease models	72
<i>Gene manipulation techniques</i>	<i>72</i>
<i>Embryonic stem cells for gene targeting.....</i>	<i>72</i>
<i>Homologous recombination</i>	<i>73</i>
<i>Transgenic animal models of human diseases</i>	<i>73</i>
Transgenic models for studying human drug metabolism and toxicity	74
The Human Genome Project and the role of transgenics.....	74
Genomic and proteomic analyses of transgenic animal models.....	75
Concern about health and welfare of transgenic animals	75
Safety of transgenic technology	76
Concluding remarks about use of transgenic animals.....	76
RNA interference technology	77
RNAi versus antisense	77
Applications of RNAi in animal biotechnology	77
Xenotransplantation	78
Pigs for xenotransplantation	78
<i>Genetically engineered pigs for transplants</i>	<i>78</i>

<i>Risks of xenotransplantation</i>	79
World Health Organization and xenotransplantation	79
Ethical aspects of animal biotechnology	80

3. A Biotechnology Perspective of Animals Diseases 81

Introduction	81
Infections in animals	81
Viral infections.....	82
<i>Avian viral infections</i>	82
<i>Avian influenza</i>	82
<i>Animal biotechnology implications of H1N1 influenza</i>	85
<i>Animal corona viruses and human SARS</i>	86
<i>Avian coronavirus</i>	86
<i>Acute lymphoproliferative disease of cattle</i>	87
<i>Bluetongue virus</i>	88
<i>Canine virus infections</i>	88
<i>Classical swine fever</i>	89
<i>Developing new treatments against FMD</i>	89
<i>Equine viruses</i>	90
<i>Feline virus infections</i>	91
<i>Foot-and-mouth disease</i>	91
<i>Porcine reproductive and respiratory syndrome virus</i>	93
<i>Rabies</i>	93
<i>Rinderpest</i>	94
<i>Schmallenberg virus</i>	94
<i>Virus infections in fishes</i>	95
Bacterial infections.....	95
<i>Bovine tuberculosis</i>	95
<i>Brucellosis</i>	96
<i>Mycoplasmal pneumonia</i>	96
Fungal infections.....	96
Protozoal infections	97
<i>Coccidiosis</i>	97
<i>Neosporosis</i>	97
<i>Toxoplasmosis</i>	98
<i>Trypanosomiasis</i>	98
Nematodes.....	98
Infections that cross the species barrier	98
Complications of bacterial infections and antibiotic use in animals	99
Transmissible spongiform encephalopathies (TSEs)	99
Inter-species transfer of prions.....	100
Scrapie	100
Bovine spongiform encephalopathy	100
<i>Epidemiology of BSE</i>	101
<i>Biomarkers in the urine of BSE infected cattle</i>	102
<i>Human health implications of BSE</i>	102
<i>Breeding animals protected against BSE</i>	103
TSE research	103
<i>Prion gene haplotyping</i>	103
<i>Pharmacological approaches to TSE research</i>	103
<i>Molecular diagnostic approach to TSE research</i>	104
<i>RNAi for knockdown of the bovine prion gene</i>	104
Chronic wasting disease	105
<i>Chronic wasting disease in wildlife</i>	105
<i>Chronic wasting disease of the cattle</i>	106
Genetic disorders in farm animals	106
Genetic predisposition to acquired diseases in animals	107
Diseases of pet animals	107
Canine anemia.....	107
Canine autoimmune diseases	108
Canine neuropsychiatric disorders	108
<i>Canine obsessive-compulsive disorder</i>	108
<i>Canine dementia</i>	109
<i>Canine epilepsy</i>	109
Canine glaucoma	109
Canine cardiovascular disease	110
<i>Heart failure</i>	110
<i>Cardiac complications of canine babesiosis</i>	110
Diabetes	111
<i>Role of biotechnology in management of diabetes</i>	111
Arthritis	111

Cancer in dogs.....	112
<i>Biotechnology-based anticancer therapeutics</i>	112
<i>Cancer clinical trials in dogs</i>	113
<i>Canine Comparative Oncology & Genomics Consortium</i>	113
Preventive veterinary medicine	114
Prevention of introduction of foreign animal diseases.....	114
Producing transgenic cattle resistant to BSE.....	114
Zoonotic diseases	115
Global impact of zoonotic diseases.....	115
Viruses that emerge in animals and spread to humans.....	115
Collaborative management of animal and human health.....	116
Vaccines for zoonotic viral diseases.....	116
4. Molecular Diagnostics in Animals.....	117
Introduction.....	117
Nucleic acid technologies.....	117
The polymerase chain reaction.....	117
<i>Basic Principles of PCR</i>	117
<i>Target selection</i>	118
<i>Detection of amplified DNA</i>	118
<i>Real-time PCR systems</i>	118
<i>LightCycler PCR system</i>	119
<i>Molecular beacons</i>	119
<i>Applications of PCR in veterinary medicine</i>	119
Fluorescent in situ hybridization.....	120
Immunodiagnosics.....	122
Enzyme-linked immunoassays.....	122
Bovine Gamma Interferon Test.....	122
Antigen diagnosis of trichinosis.....	123
Parachek™ for the diagnosis of Johne's disease.....	123
Antibodies for differentiation between vaccinated and infected animals.....	124
Biochip/microarray technology.....	124
Applications of microarrays in animal biotechnology.....	125
<i>Cattlearray3800 for functional genomics</i>	125
<i>eSensor™ electrochemical biochip</i>	126
<i>FR 48 microfluidic biochip</i>	126
<i>SNPchiMp v.3 for standardizing livestock SNP data</i>	126
Biosensors.....	127
Immunosensors.....	127
<i>Biosensor for ovulation prediction in dairy cows</i>	128
Flow cytometry for animal diagnostics.....	129
Molecular imaging in animals.....	129
Veterinary cytogenetics.....	130
Applications of sequencing for veterinary diagnostics.....	130
Role of sequencing in detection of cancer biomarkers.....	130
DNA sequencing for study of bacterial epidemics.....	131
Role of sequencing in epidemic of Shiga toxin-producing E. coli.....	131
Role of sequencing in the study of genetic disorders in animals.....	131
Applications of molecular diagnostics in animals.....	132
Canine DNA testing.....	133
Cat pedigree determined by gene tests.....	133
Diagnostic aids to selective breeding.....	133
<i>Selection of desirable traits</i>	133
<i>Gene variations and fat content of beef</i>	134
<i>Using genetic markers for improved milk production in dairy cattle</i>	134
<i>Application of bovine genomics for improving milk yield</i>	135
<i>Recognition of hereditary syndromes</i>	135
Genetic markers in animals.....	136
<i>SNP genotyping in animals</i>	136
<i>SNP genotyping for selective breeding of chicken</i>	136
Animal identity and parentage analysis.....	136
Animal species identification in food.....	137
Diagnosis of infections.....	137
<i>Bacterial infections</i>	137
<i>Diagnosis of fungal infections in animals</i>	138
<i>Diagnosis of viral infections</i>	138
<i>Molecular diagnosis of avian influenza</i>	140
<i>Molecular diagnosis of swine influenza</i>	141
<i>Diagnosis of parasitic infections</i>	142
<i>Detection of natural or bioterror threats to livestock</i>	142
<i>Detection of Tritrichomonas foetus DNA in cattle</i>	143

Molecular diagnosis of prion diseases.....	143
<i>Bovine spongiform encephalopathy</i>	143
<i>Testing for BSE in living animals</i>	145
<i>Prions in urine</i>	145
<i>Diagnosis of chronic wasting disease in wildlife</i>	146
Developing new tests for prion diseases.....	146
<i>Differentiation among various types of TSEs</i>	146
<i>Protein cyclic amplification</i>	146
<i>Antibody tests for prion diseases</i>	147
<i>Scrapie genotyping</i>	147
<i>A real-time ultrasonic method for prion protein detection</i>	148
Companies involved in developing molecular diagnostics for TSEs	148
Diagnosis of genetic disorders	149
<i>Genetic screening of companion animals</i>	149
<i>Genes associated with exercise-induced collapse</i>	149
<i>Preimplantation genetic diagnosis</i>	149
Diagnosis of cancer in animals.....	150
<i>Diagnosis of skin cancer</i>	150
<i>Diagnosis of canine mammary carcinoma</i>	150
Diagnosis of food-borne pathogens	151
Introduction	151
Molecular diagnostic methods used in food-borne infections	151
Detection of Listeria-contaminated foods	152
<i>Optical biosensor for detection of Listeria</i>	152
<i>Real-time PCR for detection of Listeria</i>	153
Detection of Salmonella	153
<i>MicroSEQ® Salmonella Detection Kit</i>	153
Detection of toxoplasmosis.....	153
E. Coli detection.....	154
<i>DuPont Bax system</i>	154
<i>MLG method for detection of multiple STEC strains</i>	154
<i>MicroSEQ® E. Coli Detection Kit</i>	154
<i>RapidFinder™ STEC</i>	155
A genomic approach to study of animal food-borne illness in humans	155
Limitations of use of molecular probes in food analysis	155
Companies with technologies for food pathogen detection	156
Biotechnology-based novel diagnostics for aquatic animals.....	157
Detection of chemicals in foods of animal origin.....	157
Companies developing molecular diagnostics for animals.....	158
5. Biotechnology-based Veterinary Medicine	159
Introduction.....	159
Biotechnology versus pharmaceutical products	159
Role of biotechnology in drug discovery and development	160
Cost of veterinary vs. human drug discovery and development	160
Advantages and disadvantages of testing biotech products in animal models.....	161
Biotechnology-based antiparasitic drugs	161
Non-antibiotic strategies for control of infections in animals.....	161
Probiotics.....	162
<i>Potential role for probiotics in the human gut</i>	162
<i>Potential role for probiotics in animals</i>	162
<i>Probiotic bacteria for control of pathogens in cattle</i>	162
Nonantibiotic drugs for infections in animals	163
<i>Immunomodulation as an alternative to antibiotics in infections</i>	164
<i>Cathelicidins: effector molecules of mammalian innate immunity</i>	164
<i>Bacteriophage therapy for antibiotic resistance</i>	164
Biotechnology for treating tendon injuries.....	165
Use of growth factors to facilitate tendon injuries.....	165
Productivity enhancers	165
Bovine somatotropin for increasing milk production in dairy cows.....	166
Increasing milk production in cows by feeding propionibacteria.....	167
Use of growth factors	167
Transgenic plant products for use in animals.....	167
Biotechnology-based vaccines	168
Modern vaccines without viral non-structural proteins.....	168
Plant-derived vaccines for use in animals	169
Nano-bead vaccine adjuvant	170
Genetically engineered vaccines.....	170
<i>Application of nucleic acid vaccines in veterinary medicine</i>	170
<i>DNA vaccines</i>	170
<i>DNA vaccine for tuberculosis</i>	172

<i>DNA vaccines for West Nile encephalitis</i>	173
<i>DNA vaccines for cancer</i>	173
<i>Gene-based vaccine for Marek's disease</i>	174
<i>Genetic engineering of live rabies vaccines</i>	174
<i>Genetically engineered vaccines for equine encephalitis</i>	174
<i>Genetically engineered vaccines for Johne's disease</i>	175
<i>Rational engineering of virus capsids to produce FMD vaccine</i>	175
<i>Vaccines against avian influenza</i>	176
<i>Vaccines against parasitic infections</i>	177
Recombinant marker vaccines	177
<i>Marker vaccines for foot-and-mouth disease</i>	177
<i>Marker vaccine for Newcastle disease</i>	178
<i>Vaccines for classical swine fever</i>	178
Vaccines for tick control	178
Vaccination to protection swine from H1N1 influenza virus infection	179
Vaccination of cattle to prevent E. coli transmission to consumers in meat	179
Vaccines for bacterial equine respiratory infections.....	180
Use of RNAi to develop vaccines for viral infections in prawns.....	180
Companies developing biotechnology-based vaccines	180
Biotechnology in treatment of parasitic infections	181
Biotechnology in the treatment of CNS disorders in pet animals	181
Paraplegia due to acute spinal cord injury in dogs	181
Personalized approach to Niemann-Pick type C1 in cats	182
Role of biotechnology in veterinary oncology	183
Personalized management of dogs with high-grade B-cell lymphoma.....	183
VDC-1101 for treatment of lymphoma in dogs.....	183
Cell Therapy	184
Umbilical cord blood stem cells	184
Application of stem cells in veterinary medicine	184
<i>Use of stem cells to repair tendon injuries in horses</i>	184
<i>Stem cells for spinal cord injury in dogs</i>	185
Gene therapy	186
Gene therapy vectors	186
Gene therapy by mitochondrial transfer	186
In utero gene therapy.....	187
Gene editing.....	187
Genome engineering by using TALENs	187
Genome editing by using CRISPR system	188
<i>CRISPER system for creating animal models of human diseases</i>	188
<i>CRISPR-Cas9 system for producing tuberculosis-resistant cows</i>	189
<i>CRISPR-Cas9 for inactivation of pig retrovirus for xenotransplantation</i>	189
Applications of gene therapy in veterinary medicine	189
<i>Gene therapy for arthritis</i>	189
<i>Gene therapy for blindness in dogs due to Leber congenital amaurosis</i>	190
<i>Gene therapy for cardiomyopathy in dogs</i>	190
<i>Gene therapy for diabetes in dogs</i>	190
<i>Gene therapy for endocrine disorders</i>	191
<i>Gene therapy for hematological disorders</i>	191
<i>Gene therapy for inherited disorders of metabolism in dogs</i>	192
<i>Gene therapy to increase disease resistance</i>	193
<i>Gene therapy for infections</i>	193
<i>Gene therapy for renal failure</i>	193
Cancer gene therapy	194
<i>Antiangiogenic cancer gene therapy in dogs</i>	194
<i>Brain tumors in cats and dogs</i>	194
<i>Breast cancer in dogs</i>	195
<i>Canine hemangiosarcoma</i>	196
<i>Canine malignant melanoma</i>	196
<i>Canine soft tissue sarcoma</i>	197
<i>Melanoma in horses</i>	197
<i>Oncolytic virotherapy for cancer in dogs</i>	198
6. Research in Animal Biotechnology	199
Introduction	199
Research institutes	199
Ethical issues of research in animal biotechnology	207
Future prospects	208
Genome wide association studies for investigation of declining fertility in cattle	208
Strategies for control of twinning in cattle.....	209
Future developments of molecular diagnostics	209
Future of vaccine application in veterinary medicine	209

<i>Promotion of innate immunity in animals</i>	209
<i>Identification of key parasite antigens for eliciting immune response</i>	210
<i>Virus-like particle vaccines for lasting immune response</i>	210
Control of respiratory virus infections	210
Control and prevention of bioterrorism diseases in animals	211
Genetic control of disease resistance	211
<i>Production of cattle lacking prion protein</i>	212
Application of genetics and biotechnology to wildlife management.....	212
Future of animal genomics	213
Future prospects of in vitro meat production	213
7. Animal Biotechnology Markets.....	215
Introduction.....	215
Markets for biotechnology-based products for animal healthcare.....	216
Markets for biopharmaceuticals for animals	217
<i>Markets for recombinant proteins for animal healthcare</i>	218
<i>Markets for vaccines for animals</i>	218
Markets for animal diagnostics.....	218
<i>Test for bovine spongiform encephalopathy</i>	218
Animal biotechnology markets according to therapeutic areas	219
Markets for biotechnology-based animal products for humans	219
Transgenic proteins	220
Market for xenotransplantation	220
Strategies for promoting use of animal biotechnology	221
Financial losses from death and disease in animals.....	221
<i>Losses in farm animals</i>	221
<i>Losses in poultry</i>	221
<i>Losses in equine industry</i>	221
The emerging role of pet owners.....	221
Improvement in cattle through application of biotechnology	222
<i>Economic aspects of genomic evaluation of dairy cattle</i>	222
<i>Pig market</i>	222
<i>Cattle Market</i>	223
<i>Poultry market</i>	223
<i>Milk from genetically modified cows</i>	223
Impact of biotechnology on fish markets	223
Role of biotechnology in livestock performance enhancer market	224
Gene transfer technologies.....	224
In vitro meat production and animal biotechnology markets	224
Cost-benefit aspects of transgenic proteins	224
<i>Lower costs of transgenic production</i>	224
<i>Lower costs of treatment</i>	225
Unmet needs in animal biotechnology	225
Future prospects of animal biotechnology	226
Farm animals	227
<i>Global trends in epidemiology of livestock diseases</i>	227
<i>Genetic engineering of animals</i>	227
Companion animals	227
Animal molecular diagnostic markets.....	228
8. Regulatory issues	229
Introduction.....	229
Regulatory agencies for veterinary biotechnology in the US	229
FDA regulatory issues in agricultural biotechnology	230
FDA guidelines on use of antibiotics in food-producing animals	231
FDA and veterinary stem cell therapy	232
Food safety evaluation of transgenic animals	233
Food from cloned animals	234
FDA investigation of drug transfer into eggs.....	235
Animal feed safety	236
Medicated feeds.....	237
Regulatory issues for production of transgenic proteins.....	237
Risks of animal biotechnology	237
FDA regulation of bovine products.....	238
Worldwide biotechnology regulatory and trade issues.....	238
9. Companies Involved in Animal Biotechnology.....	241
Introduction.....	241
Biotechnology at top veterinary pharmaceutical companies	241
Profiles of selected companies.....	241
Collaborations.....	377
