A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently he is a consultant at Jain PharmaBiotech. Prof. Jain's 473 publications include 28 books (5 as editor+ 23 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals.

Prof. Jain's recent books include "Handbook of Nanomedicine" (Springer/Humana 2008, Chinese ed 2011, 3rd ed 2017) and "Textbook of Personalized Medicine" (Springer 2009; Japanese ed 2012; 2nd ed Springer 2015), "Handbook of Biomarkers" (Springer 2010; Chinese ed, Chemical Industry Press 2016, 2nd ed 2017), "Applications of Biotechnology in Cardiovascular Therapeutics" (Springer 2011), "Applications of Biotechnology in Neurology" (Springer 2013), and "Applications of Biotechnology in Oncology" (Springer 2014). Besides these, he has edited "Applied Neurogenomics" (Springer 2015).

A B O U T T H I S R E P O R T

This report will cover new biochip/microarray technologies and companies developing them as well as the markets for these. An older version of this report was published in 2001 by Informa. The focus of the new report is on diagnostic applications of DNA microarrays but a chapter on protein biochips is included for comparison as it is a competing technology. Role of biochip technology in drug discovery and development as well as in personalized medicine is also discussed. Role of new technologies, particularly, nanobiotechnology in development of biochip/microarray is described.

TABLE OF CONTENTS

0. Executive Summary	10
1. Introduction	12
Definitions of biochips/microarray	12
Terms used for biochips	12
Historical aspects of biochip/microarray technology	13
Relation of microarrays to other technologies	14
Applications of biochips/microarrays	15
Advantages of biochips/microarrays	15
2. Biochip and Microarray Technologies	16
Introduction.....	16
Nucleic acid amplification and microarrays	16
PCR on a chip	16
Fast PCR biochip	16
Multiplex microarray-enhanced PCR for DNA analysis	17
Universal DNA microarray combining PCR and ligase detection reaction	17
NASBA combined with microarray	18
Rolling circle amplification on microarrays	18
LiquiChip-RCAT	18
Multiplexed Molecular Profiling	18
Genomewide association scans.....	19
Whole genome microarrays	19
GeneChip Human Genome Arrays	20
Arrayit's® H25K	21
Transposon insertion site profiling chip	21
Standardizing the microarrays	21
Optical Mapping	22
Imaging technologies used for detection in biochips/ microarray	22
<i>Fluorescence and chemiluminescence</i>	<i>23</i>
<i>MALDI-MS imaging and tissue microarrays.....</i>	<i>23</i>
<i>Surface plasmon resonance technology for microarrays</i>	<i>24</i>
Microarray imaging systems	25
<i>Vidia™ Microarray Imaging Systems.....</i>	<i>25</i>
<i>GenePix 4100A Microarray Scanner</i>	<i>26</i>
<i>Tecan LS Reloaded™</i>	<i>26</i>
Microarrays based on detection by physico-chemical methods	27
Electrical biochips	27
Photoelectrochemical synthesis of DNA microarrays	27
Microchip capillary electrophoresis	28
Strand displacement amplification on a biochip	28
Biosensor technologies for biochips.....	28
DNA-based biosensors	29
Arrayed Imaging Reflectometry	29
Phototransistor biochip biosensor	30
Applications of biosensor biochips	30
<i>Biosensors in food safety</i>	<i>31</i>
<i>Cholesterol biosensor</i>	<i>31</i>
<i>Glucose biosensors.....</i>	<i>32</i>
Biochips and microarrays for cytogenetics.....	32
Chromosomal microarrays.....	33
Comparative genomic hybridization	33
<i>Array-based CGH</i>	<i>33</i>
<i>NimbleGen CGH arrays</i>	<i>34</i>
<i>Single-cell array CGH</i>	<i>34</i>
<i>Regulatory requirements for array CGH</i>	<i>35</i>
Combination of FISH and gene chips	35
Combination of CGH and SNP microarray platforms	35
Fish-on-chip	36
SignatureChip®	36
Tissue microarrays.....	36
Pathology tissue-ChIP.....	37
Carbohydrate microarrays	37
RNA profiling	37
RNA splice variants	38
RIP-Chip	38
miRNAs	39

<i>Microarrays for miRNAs</i>	39
<i>Microarrays vs qPCR for measuring miRNAs</i>	40
<i>Quantitative analysis of miRNAs in tissue microarrays by ISH</i>	41
Exon microarrays	41
Microarrays & DNA sequencing	42
Microarray-based emerging DNA sequencing technologies.....	42
Exome sequencing for study of human variation.....	43
<i>High-throughput array-based resequencing</i>	43
<i>Sequencing by hybridization</i>	43
<i>SOLiD-System based ChIP-Sequencing</i>	44
Next generation sequencing vs microarrays for expression profiling.....	45
Microarrays for synthetic biology	45
Arrayit microarray platform for synthetic biology.....	45
Microarray-based gene synthesis.....	46
Magnetophoretic array-based cell sorting for further studies.....	46
3. Microfluidics-based Biochips and Microarrays	48
Introduction	48
Lab-on-a-chip	48
LabChip.....	49
LabCD.....	49
Lab-on-a-brain.....	49
Lab-on-a-chip multiplex immunoassay.....	49
Micronics' microfluidic technology.....	50
Rheonix CARD technology.....	50
Microfluidic chips/arrays using PCR	51
Digital PCR Array.....	51
Digital PCR on a SlipChip.....	51
Microfluidic automated DNA analysis using PCR.....	51
Microfluidic single-cell RT-qPCR on a chip.....	52
Microfluidic chips integrated with RCAT	52
Microfluidic chips integrated with PET	52
Molecular diagnostic applications of microfluidic biochips	53
Biochips/microfluidics for detection of circulating tumor cells.....	53
<i>CEE (cell enrichment and extraction) technology</i>	53
<i>Cluster-Chip for capturing CTCs</i>	53
<i>CTChip™</i>	53
<i>DNA nanospheres for isolation of CTCs</i>	54
<i>Herringbone-chip for detection of CTCs</i>	54
<i>Lab-on-chip for the isolation and detection of CTCs</i>	54
Microfluidic devices for analyzing blood of pediatric and neonatal patients.....	54
Microfluidic PepArray™ for in situ synthesis of peptides	55
Integrated microfluidics platform for biomolecular interactions	55
Electrophoretic separation of nucleic acids on a microfluidic chip	55
Microfluidic chip for analysis of 3D microtissues	56
Companies developing microfluidic technologies	56
4. Protein Biochips	58
Introduction	58
Protein biochip technologies	58
Protein microarrays	58
Affinity proteomics /antibody microarrays.....	59
<i>Applications of antibody microarrays</i>	59
<i>Antibody microarrays for diagnosis of cancer</i>	60
<i>Discovery of biomarkers by MAb microarray profiling</i>	61
Aptamer-based protein biochip.....	61
High-density protein microarrays.....	61
HPLC-Chip for protein identification.....	62
<i>2D displacement chromatography using HPLC Chip</i>	62
LabChip for protein analysis.....	62
MALDI-MS imaging and protein microarrays.....	63
Multiplexed Protein Profiling on Microarrays.....	63
Peptide microarrays.....	64
ProteinChip.....	64
Protein chips for antigen-antibody interactions molecular diagnostics.....	66
Proteomic pattern analysis.....	66
Reverse phase protein microarrays.....	66
Single molecule array.....	67
TRINECTIN proteome chip.....	67
New developments in protein chips/microarrays.....	68
Microfluidic devices for proteomics-based diagnostics	68

Viral protein chip	68
Use of microarray technologies in human protein atlas initiative.....	69
Applications of protein biochip/microarrays	69
Applications of peptide microarrays	70
Biosensor protein chip	71
Nucleic Acid Programmable Protein Array	72
Proteome Identification Kit	72
Protein nanobiochip for diagnosis	73
Proteomic chip for profiling signaling pathways in single tumor cells	73
Protein biochips/microarrays for personalized medicine.....	73
Companies involved in protein biochips/microarrays	74
5. Nanobiotechnology-based Biochips & Microarrays.....	78
Introduction.....	78
Nanotechnology-based biochips	78
Fullerene photodetectors for chemiluminescence detection on microfluidic chip	78
Nanotechnology on a chip	78
NanoChip® Electronic Microarray	79
Silver nanorod array for on-chip detection of microbes and chemicals.....	79
Verigene System.....	80
Use of nanotechnology in microfluidics	80
Construction of nanofluidic channels	81
NanoAnalyzer® chip.....	81
Nanoscale flow visualization	82
Moving (levitation) of nanofluidic drops with physical forces	82
Electrochemical nanofluid injection.....	83
Nanofluidics on nanopatterned surfaces	83
Nano-interface in a microfluidic chip	83
Nanofluidic channels for study of DNA	84
Nanoarrays	84
Dip Pen Nanolithography for nanoarrays	85
NanoPro™ System	86
Nanosensors	87
Biochips with nanosensors	87
Peptide nucleic acid nanobiosensor arrays	87
Cantilever arrays	88
Nanotechnology-based protein biochips/microarrays.....	88
AFM for immobilization of biomolecules in high-density nanoarrays	88
Nanoparticle protein chip	89
Protein biochips based on fluorescence planar wave guide technology	89
Self-assembling protein nanoarrays.....	90
Diagnostic applications of nanobiochips	90
Nanofluidic devices to detect a single molecule of DNA	90
Nanochip/biosensor for detection of circulating cancer cells	90
6. Biochips & Microarrays for Epigenetics	92
Introduction.....	92
Epigenomic technologies	92
Epigenomics Digital Phenotype	92
Global methylation analysis.....	93
Illumina's assays for analysis of methylation sites	93
GenomicTree's MDScan™ technology	93
Orion's MethylScope® technology	93
ChIP-chip	93
Microarray for immunogenetic testing	94
Applications for study of DNA methylation.....	94
7. Applications of Microarrays in Drug Discovery & Development.....	96
Introduction.....	96
Drug discovery.....	96
Finding lead compounds	96
High-throughput cDNA microarrays	96
<i>Use of gene expression data to find new drug targets.....</i>	97
<i>Investigation of the mechanism of drug action.....</i>	97
Cellular microarrays	97
Peptide microarrays for high-throughput screening.....	98
Biochips for toxicology studies	98
<i>Gene expression studies for toxicology using microarrays</i>	98
<i>MetaChip/Datachip</i>	98
Testing drugs in organ-on-a-chip microdevices	99
<i>ADME-on-a-chip.....</i>	99

<i>Brain cancer chip for personalized drug screening</i>	100
<i>Liver-on-a-chip</i>	100
<i>Lung-on-a-chip</i>	100
<i>Multisensor-integrated organs-on-a-chip system</i>	101
<i>Stem cells differentiation on a chip for testing response to drugs</i>	101
SmartChip for cancer drug discovery	101
Drug development	102
Use of microarrays in clinical trials	102
Reverse phase protein microarrays	102
Controlled-release microchip for drug delivery	102
Implanted chips for drug delivery.....	102
Lab-on-a-chip for drug delivery.....	103
Pharmacy-on-a-chip	103
8. Biochips for Biomarkers, Molecular Diagnostics & Personalized Medicine	104
Introduction	104
Microarrays with integrated PCR	104
AmpliChip CYP450.....	105
<i>AmpliChip P53 as companion diagnostic for cancer</i>	106
Infinity System	106
In-Check Lab-on-Chip.....	106
Biochips for POC diagnosis	107
Triage protein chip	107
Lab-on-a-chip	107
POC salivary diagnostic biochip	108
POC microarray for detection of circulating microRNA biomarkers	108
Application of microarrays for discovery of biomarkers	109
Gene expression microarray data as a source of protein biomarkers	109
Peptide array technology for detection of biomarkers.....	109
Protein microarrays for discovery of biomarkers.....	109
QPDx® BioChips for biomarkers	110
Tissue microarrays for study of biomarkers	110
Biochip and microarray-based detection of SNPs	111
Affymetrix Variation Detection Arrays	111
Biochip combining BeadArray and ZipCode technologies	111
NanoChip for detection of SNPs.....	111
SNP genotyping by MassARRAY.....	111
SNP-IT primer-extension technology	112
Copy number variations in the human genome	112
Agilent microarrays	113
Affymetrix microarrays	114
Illumina's CNV and SNP lines	115
<i>HD Human660W-Quad BeadChip</i>	115
Roche NimbleGen's CGH and CNV product line.....	115
TaqMan® Copy Number Assays	116
Innovations in CNV and CGH microarrays.....	116
Bioinformatic tools for analysis of CNV data.....	116
Applications of biochip technology in personalized medicine	117
Commercial development of biochip technologies for diagnostics	118
9. Markets	120
Introduction	120
Methods for estimation of markets	120
Microarray markets	120
Market share of microfluidics-based microarrays	121
Gene expression microarray markets.....	121
Array CGH markets	121
CNV markets	122
Markets for RNA splice variants.....	122
Markets for imaging technologies used in biochips/microarrays.....	122
Markets for microarray relevant to miRNA	123
Epigenetic markets	123
ChIP-Chip	123
Markets for protein microarrays	123
Role of scientists' attitudes on the evolution of protein microarray markets	124
Market share of microarray technology in protein biomarkers	124
Geographical distribution of microarray markets	124
Currents trends	125
Types of arrays used	125
<i>Tiling array</i>	125

<i>Exon array</i>	126
Reaction specifics.....	126
<i>Pre-amplification use</i>	126
<i>Reagents from array vendor or other sources</i>	126
<i>Dual versus single color array preference</i>	127
<i>Oligo versus BAC preference</i>	127
Cost per sample or cost per array	127
Preference for single versus multiplex sample arrays	128
Current and future throughput in samples per week	128
Use in niche markets	128
<i>Diagnostics</i>	128
<i>Drug discovery</i>	129
<i>Therapeutics</i>	129
<i>Research</i>	130
Screening assays versus whole genome aCGH	130
Effect of next generation sequencing on microarray markets	131
Impact of next generation sequencing on microarray markets for diagnostics	131
Impact of next gen sequencing on microarray markets for drug discovery	131
<i>Resequencing</i>	132
<i>RNA profiling</i>	132
<i>Transcriptome sequencing for mRNA Expression</i>	132
Applications of next generation sequencing in basic research	133
<i>Mapping and sequencing of structural variation from human genomes</i>	133
<i>Identifying protein-coding genes in genomic sequences</i>	133
Applications in clinically relevant areas	134
<i>Genetic disorders</i>	134
<i>Cancer research</i>	135
<i>Management of HIV/AIDS</i>	136
Customer requirements and unmet needs	136
Concluding remarks on microarray markets	137
Future of biochip technology for molecular diagnostics.....	137
Impact of next generation sequencing on microarray markets in the future.....	137
<i>Effect on CNV market</i>	137
<i>Effect on RNA profiling</i>	137
<i>Screening samples</i>	138
10. Companies	140
Profiles of companies.....	140
Collaborations.....	251
