A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently he is a consultant at Jain PharmaBiotech. Prof. Jain's 476 publications including 30 books (6 as editor+23 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals.

Prof. Jain's recent books include "Handbook of Nanomedicine" (Springer/Humana 2008, Chinese edition, Peking University Press 2011, 2nd ed Springer 2012, 3rd ed 2017), "Textbook of Personalized Medicine" (Springer 2009; Japanese ed 2012; 2nd ed Springer 2015), "Handbook of Biomarkers" (Springer 2010; Chinese ed, Chemical Industry Press, 2016, 2nd ed Springer 2017), "Applications of Biotechnology in Neurology" (Springer 2013), and "Applications of Biotechnology in Oncology" (Springer 2014). He has edited "Applied Neurogenomics" (Springer 2015).

A B O U T T H I S R E P O R T

This report will cover cytogenetics using the broad scope of cytogenetic analysis that extends beyond the simple description of the chromosomal status of a genome and enables the study of basic problems such as the nature of inherited syndromes, the genomic changes that are involved in tumorigenesis and the 3D organization of the human genome. It will include conventional FISH as well as cutting edge new technologies for molecular cytogenetics. Companies developing various technologies and the markets for these will be described.

TABLE OF CONTENTS

0. Executive Summary	10
1. Introduction	12
Definitions	12
Historical evolution of cytogenetics	12
Scope of cytogenetics	13
Molecular cytogenetics	14
Basics of molecular biology relevant to cytogenetics	14
DNA	14
RNA	15
DNA transcription.....	15
Chromosomes	15
Mitochondrial DNA.....	16
Genes.....	16
<i>The genetic code.....</i>	<i>16</i>
<i>Gene expression</i>	<i>17</i>
The human genome	17
Variations in the human genome.....	18
<i>Variations in DNA sequences</i>	<i>18</i>
<i>Single nucleotide polymorphisms</i>	<i>18</i>
<i>Copy number variations in the human genome</i>	<i>18</i>
<i>Genotype and haplotypes.....</i>	<i>20</i>
<i>Complex chromosomal rearrangements</i>	<i>20</i>
<i>Insertions and deletions in the human genome</i>	<i>20</i>
<i>Large scale variation in human genome</i>	<i>21</i>
<i>Structural variations in the human genome</i>	<i>21</i>
<i>Replication of the DNA helix</i>	<i>22</i>
<i>Transposons</i>	<i>22</i>
Mapping and sequencing of structural variation from human genomes.....	23
2. Technologies used for cytogenetics	24
Introduction.....	24
Quantitative fluorescent polymerase chain reaction	24
RNA interference and cytogenetics	25
RNA-induced transcriptional silencing complex.....	25
RNAi and cancer cytogenetics	25
Single cell genetics by siRNA ablation	26
Role of miRNAs in cancer cytogenetics.....	26
Preimplantation genetic diagnosis	26
Preimplantation genetic haplotyping	27
Bioinformatics and cytogenetics	27
FISH probe design software.....	27
LS-CAP algorithm.....	28
Distance-based clustering of CGH data	28
3. Fluorescent In Situ Hybridization	30
Introduction.....	30
Innovative FISH technologies	32
Automation of FISH.....	32
Chromogenic in situ hybridization (CISH)	32
Direct visual in situ hybridization	33
Direct labeled Satellite FISH probes.....	33
Fiber FISH.....	33
FISH with telomere-specific probes	33
High-throughput quantitative FISH	34
In vivo FISH.....	34
Interphase FISH	35
Intron chromosomal expression FISH	35
Multicolor FISH	36
<i>Multicolor chromosome banding</i>	<i>36</i>
Oligonucleotide FISH	36
peT-FISH™	37
Primed in situ labeling	37
RNA-FISH	37
Single copy FISH probes	38
Use of peptide nucleic acid with FISH	38
Use of locked nucleic acids with FISH	40

Applications of FISH	40
Companies involved in FISH diagnostics	41
4. Genomic Technologies relevant to Cytogenetics	42
Introduction.....	42
Karyotyping based on sequencing.....	42
Microarrays/biochips for cytogenetics	42
Microarrays vs karyotyping	43
Tissue microarrays	43
Chromosome copy number analysis	43
Combination of FISH and gene chips	44
Combination of CGH+SNP microarrays	44
SignatureChip®	45
Molecular Combing	45
High density oligonucleotide arrays	45
Next Generation Screening®.....	46
Comparative genomic hybridization	46
Array-based comparative genomic hybridization	48
aCGH vs karyotyping	48
Comparison of array CGH and multipoint FISH.....	49
Combined use of tissue microarrays and aCGH	49
Single-cell array CGH	50
Regulatory requirements for array CGH	50
Future prospects of aCGH	50
Whole genome expression microarrays	51
Life Technologies Expression Array System	51
Arrayit's® H25K	52
CytoScan® HD Array.....	52
Optical Mapping	52
Single cell cytogenetics.....	53
Single cell PCR.....	53
<i>LATE-PCR.....</i>	<i>53</i>
<i>AmpliGrid-System</i>	<i>53</i>
<i>Digital Counting</i>	<i>54</i>
Analysis of single-cell gene expression.....	54
<i>Fluorescent in situ RNA sequencing</i>	<i>55</i>
Application of single cell cytogenetics in preimplantation genetic testing	55
Direct molecular analysis without amplification	56
5. Molecular Imaging & Single Molecular Detection	58
Molecular imaging.....	58
Companies involved in molecular imaging	58
Single molecule detection	59
Spectrally resolved fluorescence lifetime imaging microscopy	59
Single-molecule fluorescence resonance energy transfer.....	60
Confocal laser scanning	60
Single Molecule Array	60
PCR systems for single molecule detection	61
<i>Real-time PCR</i>	<i>61</i>
<i>Digital PCR</i>	<i>61</i>
<i>Emulsion PCR</i>	<i>62</i>
Rolling circle amplification technology.....	62
Microfluidic assay for protein expression at the single molecule level	62
Bioinformatic and single molecule detection	63
6. Role of Nanobiotechnology in Cytogenetics	64
Introduction.....	64
Nanobiology and the cell.....	64
Visualization on nanoscale.....	65
Application of AFM for biomolecular imaging	65
<i>Future insights into biomolecular processes by AFM.....</i>	<i>65</i>
<i>Use of AFM for microdissection of chromosomes</i>	<i>66</i>
Scanning probe microscopy	66
Near-field scanning optical microscopy	66
Multiple single-molecule fluorescence microscopy.....	67
Nanoscale scanning electron microscopy	67
Nanotechnology-based FISH.....	67
<i>Study of chromosomes by atomic force microscopy</i>	<i>67</i>
<i>Quantum dot FISH</i>	<i>67</i>
Nanobiotechnology for single molecule detection.....	68
<i>Nanolaser spectroscopy for detection of cancer in single cells</i>	<i>69</i>

<i>Carbon nanotube transistors for genetic screening</i>	69
<i>Quantum-dots-FRET nanosensors for single molecule detection</i>	70
<i>3D single-molecular imaging by nanotechnology</i>	70
<i>Manipulation of DNA sequence by use of nanoparticles</i>	70
Nanofluidic/nanoarray devices to detect a single molecule of DNA	70
Nanopore technology	71
Portable nanocantilever system for diagnosis	71
Nanobiosensors	72
7. Biomarkers and Cytogenetics	74
Introduction	74
Definitions	74
Biomarkers and cytogenetics	74
Cancer biomarkers	74
Technologies for detection of cancer biomarkers	75
Telomerase as a biomarker of cancer	75
Digital karyotyping for cancer biomarkers	75
Optical systems for in vivo molecular imaging of cancer	76
Circulating cancer cells in blood as biomarkers of cancer	76
Array CGH for biomarker discovery in cancer	77
Genetic biomarkers	77
8. Applications of Cytogenetics	78
Introduction	78
Applications of cytogenetics in research	78
Cytogenetics of embryonic stem cells	78
Genetic disorders	79
Technologies for diagnosis of genetic disorders	79
<i>Cytogenetic microarrays for diagnosis of mental retardation</i>	79
<i>Detection of copy number variations in genetic disorders</i>	80
<i>Detection of non-recurrent DNA rearrangements by aCGH</i>	80
<i>Quantitative fluorescent PCR</i>	81
<i>Representational oligonucleotide microarray analysis</i>	81
<i>SignatureChip[®]-based diagnostics for cytogenetic abnormalities</i>	81
<i>Screening for cytogenetic abnormalities</i>	82
Cytogenetics in prenatal diagnosis	82
<i>aCGH for prenatal diagnosis</i>	82
<i>BAC HD Scan test</i>	83
<i>FISH for prenatal diagnosis</i>	83
<i>PCR for prenatal diagnosis of trisomy 21</i>	83
<i>Plasma DNA sequencing to detect fetal chromosomal aneuploidies</i>	84
<i>Concluding remarks and future prospects of prenatal diagnosis</i>	86
Cytogenetics in preimplantation genetic diagnosis	86
<i>Array CGH for PGD</i>	87
<i>Fluorescent PCR for PGD</i>	87
<i>FISH for PGD</i>	87
<i>PGD using whole genome amplification</i>	88
Conditions detected by preimplantation cytogenetic diagnosis	89
The future of preimplantation genetic diagnosis	89
Disorders of the nervous system	90
Application of cytogenetics in epilepsy	90
Neuropsychiatric disorders in children	90
Cardiovascular disorders	91
Infections	91
PNA-FISH for diagnosis of infections	91
Diagnosis of bacterial infections at single molecule level	92
Detection of single virus particles	92
Role of cytogenetics in drug discovery and development	92
Role of cytogenetics in the development of personalized medicine	93
Relation of cytogenetics to personalized medicine	93
Cytomics as a basis for personalized medicine	94
Molecular imaging and personalized medicine	94
Cytogenetics for gender determination	95
<i>Gender determination in competitive sport</i>	95
<i>Gender determination in forensic cases</i>	95
Regulatory aspects of FISH	95
9. Cancer Cytogenetics	98
Cancer genetics	98
Cytogenetic abnormalities in cancer	98
Cytogenetic technologies for molecular diagnosis of cancer	98

Applications of aCGH in oncology	99
Cytogenetics of tumor cells in body fluids.....	100
Cytogenetics and microRNAs	100
FISH-based techniques	101
<i>FISH on paraffin-embedded tissues</i>	101
<i>High-throughput Imaging Position Mapping</i>	101
Gene expression profiles predict chromosomal instability in tumors	101
Loss of heterozygosity	102
Molecular Combing for cancer diagnosis.....	102
Mutation detection at molecular level	102
Proteomic identification of oncogenic chromosomal translocation partners.....	103
SNPs and cytogenetics.....	103
Tissue microarrays for cancer diagnosis	103
Applications of cytogenetics in molecular diagnosis of cancer	104
Molecular cytogenetics in hematological malignancies.....	104
<i>Chromosome translocations in leukemias</i>	105
<i>Cytogenetics diagnostics for leukemia</i>	105
<i>Cytogenetics of acute myeloid leukemia</i>	106
<i>Detection of p53 deletions in chronic lymphocytic leukemia</i>	106
<i>Cytogenetics of lymphomas</i>	107
<i>Cytogenetics of myelodysplastic syndrome</i>	107
<i>Cytogenetics of plasma cell myeloma</i>	108
Bladder cancer.....	108
Bone and soft tissue tumors	109
Brain tumors	110
Breast cancer	110
<i>Chromosomal aberrations in breast carcinomas</i>	110
<i>FISH vs CISH and SISH for determining of HER-2/neu amplification</i>	111
<i>Genomic profiles of breast cancer</i>	111
Colorectal cancer	112
Lung cancer	112
Ovarian cancer	113
<i>aCGH analyses of cisplatin-resistant ovarian cancer cells</i>	113
Prostate cancer.....	113
Renal cancer	114
Thyroid cancer.....	114
Cytogenetics-based anticancer strategies.....	115
aCGH-based strategies for targeting cancer pathways	115
Allele-specific inhibition.....	115
Prognostic and therapeutic significance of gene amplifications	116
RNAi-based approach for leukemia.....	116
Significance of double minutes.....	116
Online resources for cancer cytogenetics.....	116
The Cancer Genome Atlas	117
Concluding remarks on cancer cytogenetics	117
10. Cytogenetics Markets.....	118
Introduction.....	118
Methods for study of cytogenetic markets	118
Cytogenetic markets according to technologies	118
Market for FISH technologies.....	119
Array CGH markets	119
Sorting the markets of overlapping technologies	120
Markets for cytogenetics according to therapeutic areas	120
Geographical distribution of markets for cytogenetics.....	122
SWOT of competing technologies.....	122
Unfulfilled needs	123
Limitations of current technologies.....	125
Promising future developments in cytogenetics.....	125
Commercial aspects of genome sequencing technologies	125
<i>Cost of genotyping</i>	125
11. Companies	128
Profiles of companies.....	128
Collaborations.....	216
12. References.....	220
