**A Jain PharmaBiotech Report**

## A U T H O R ' S   B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries, and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Prof. Jain's 476 publications include 30 books (6 as editor + 24 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. His books include "Role of Nanobiotechnology in Molecular Diagnostics" (2006), "Handbook of Nanomedicine" (Humana/Springer 2008; Chinese edition, Peking University Press 2011; 2<sup>nd</sup> ed Springer 2012, 3<sup>rd</sup> ed 2017), "Textbook of Personalized Medicine" (Springer 2009; Japanese edition 2012; 2<sup>nd</sup> ed Springer, 2015), "Handbook of Biomarkers" (Springer 2010; Chinese ed Chemical Industry Press 2016, 2<sup>nd</sup> ed 2017), "Applications of Biotechnology in Cardiovascular Therapeutics (Springer 2011)", "Applications of Biotechnology in Neurology (Springer, 2013)", and "Applications of Biotechnology in Oncology" (Springer 2014). He has also edited "Applied Neurogenomics" (Springer 2015).

## A B O U T   T H I S   R E P O R T

Prof. Jain wrote the first commercial report on DNA Diagnostics in 1995, which was published by PJB Publication, London. This was updated in 1997 as Molecular Diagnostics I and the next edition, Molecular Diagnostics II, was published in 1999 – both by Decision Resources Inc, USA. All the three versions of the reports were well accepted and sold widely. The current version was originally published by Jain PharmaBiotech in 2001 and is constantly updated and revised since then. Not only was this the first such report on molecular diagnostics, it is the longest continuously published report on this topic (20 years). It is also the most comprehensive and detailed report on this topic containing profiles of the largest number of companies involved in molecular diagnostics.
