A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently he is a consultant at Jain PharmaBiotech. Prof. Jain's 473 publications include 28 books (5 as editor + 23 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. His recent books include "Role of Nanobiotechnology in Molecular Diagnostics" (2006), "Handbook of Nanomedicine" (Humana/Springer 2008; Chinese edition, Peking University Press 2011, 2nd ed Springer 2012, 3rd ed April 2017), "Textbook of Personalized Medicine (Springer 2009; Japanese ed 2012; 2nd ed Springer, 2015), "Handbook of Biomarkers" (Springer 2010; Chinese edition, Chemical Industry Press 2016, 2nd edition, 2017), Handbook of Neuroprotection (Springer 2011), "Applications of Biotechnology in Cardiovascular Therapeutics" (Springer 2011), "Applications of Biotechnology in Neurology" (Springer 2013), and "Applications of Biotechnology in Oncology" (Springer 2014). He has edited "Drug Delivery Systems", 2nd ed (Springer 2014) and "Applied Neurogenomics" (Springer 2015).

TABLE OF CONTENTS

0. EXECUTIVE SUMMARY.....	23
1. Introduction	25
Basics of nanobiotechnology.....	25
European Union definition of nanomaterials.....	26
Nanoscale time and light	27
<i>Nanotime.....</i>	27
<i>Nanolasers.....</i>	27
Nanomedicine.....	27
Relation of nanobiotechnology to nanomedicine.....	28
Landmarks in the evolution of nanomedicine.....	28
Nanomedicine as a part of evolution of medicine.....	29
2. Nanotechnologies	31
Introduction	31
Classification of nanobiotechnologies	31
Nanoparticles	32
<i>Gold nanoparticles</i>	33
<i>Cubosomes</i>	34
<i>Fluorescent nanoparticles.....</i>	34
<i>Fullerenes</i>	34
<i>Graphene.....</i>	35
<i>Magnetic nanoparticles</i>	35
<i>Nanoparticles assembly into micelles.....</i>	36
<i>Nanoshells</i>	36
<i>Plant-derived nanoparticles</i>	36
<i>Polymer nanoparticles</i>	37
<i>Porous silicon nanoparticles.....</i>	37
<i>Quantum dots</i>	37
<i>Synthetic high density lipoprotein nanoparticles.....</i>	38
<i>Hybrid nanoparticles.....</i>	39
Bacterial structures relevant to nanobiotechnology.....	39
<i>Nanostructures based on bacterial cell surface layers</i>	39
<i>Bacterial magnetic particles.....</i>	39
Carbon nanotubes.....	40
<i>Medical applications of nanotubes</i>	40
Dendrimers	41
<i>Properties</i>	42
<i>Applications.....</i>	42
DNA nanostructures	43
<i>Potential applications of DNA octahedron</i>	43
Nanowires.....	44
Nanopores	44
Nanoporous silica aerogel	44
Nanostructured silicon	45
Nanoparticle conjugates.....	46
<i>DNA-nanoparticle conjugates.....</i>	46
<i>Networks of gold nanoparticles and bacteriophage</i>	46
<i>Protein-nanoparticle combination</i>	47
Polymer nanofibers	47
Virus-like particles	47
Measurement of nanoparticle size and distribution	47
Nanomaterials for biolabeling.....	48
DNA Nanotags	50
Fluorescent lanthanide nanorods.....	50
Magnetic nanotags	50
Molecular computational identification	51
Nanophosphor labels	51
Organic nanoparticles as biolabels.....	52
Quantum dots as labels	52
SERS nanotags.....	53
Silica nanoparticles for labeling antibodies	53
Silver nanoparticle labels	53
Micro- and nano-electromechanical systems	54
BioMEMS.....	54
Microarrays and nanoarrays	55
Dip Pen Nanolithography for nanoarrays	55
<i>Applications of dip-pen nanolithography.....</i>	56

Protein nanoarrays.....	57
<i>Single-molecule protein arrays</i>	57
Microfluidics and nanofluidics.....	57
Nanotechnology on a chip	58
Microfluidic chips for nanoliter volumes.....	58
Use of nanotechnology in microfluidics	59
2D nanofluidics.....	59
Construction of nanofluidic channels.....	59
Nanoscale flow visualization	60
Moving (levitation) of nanofluidic drops with physical forces	60
Electrochemical nanofluid injection.....	60
Nanofluidics on nanopatterned surfaces.....	61
Nano-interface in a microfluidic chip.....	61
Nanofluidic channels for study of DNA	61
Visualization and manipulation on nanoscale	62
3D single-molecule microscopy with nanoscale accuracy	62
4Pi microscope	62
Atomic force microscopy	62
AFM basics.....	62
Advantages of AFM.....	63
AFM as nanorobot	63
Force sensing Integrated Readout and Active Tip	64
Cantilever technology	64
CytoViva® Microscope System	65
Fluorescence Resonance Energy Transfer	66
Fluorescence by Unbound Excitation from Luminescence.....	66
Magnetic resonance force microscopy and nanoscale MRI.....	66
Multiple single-molecule fluorescence microscopy	67
Near-field scanning optical microscopy	67
Nano-sized light source for single cell endoscopy	67
Nanoparticle characterization by Nanosight LM10 technology.....	68
Nanoscale scanning electron microscopy	68
Use of SEM to reconstruct 3D tissue nanostructure.....	69
Optical Imaging with a Silver Superlens.....	69
Partial wave spectroscopy	69
Photoactivated localization microscopy	70
Scanning probe microscopy.....	70
Single-molecule photon localization microscopy	71
STED microscopy	71
Super-resolution microscopy for in vivo cell imaging	72
3D-SIM.....	72
Nanomicroscopy for live cell tomography	72
RESOLFT Nanoscopy.....	73
Ultra-nanocrystalline diamond	73
Visualizing atoms with high-resolution transmission electron microscopy	73
Surface plasmon resonance	74
Nanotechnology and phototherapy	75

3. Nanotechnologies for Basic Research Relevant to Medicine..... 77

Introduction	77
Nanotechnology and biology.....	77
NanoSystems Biology	77
Nanobiology and the cell.....	78
Biosensing of cellular responses.....	79
Control of T cell signaling activity.....	79
Measuring mass of single cells.....	80
Nanostructures involved in endocytosis.....	80
Nanoparticles for in vivo study of cells	80
Nanotechnology-based live-cell single molecule assays.....	81
Quantum dots for stem cell labeling	81
Quantum dot/antibody conjugates for in vivo cytometric imaging.....	81
Quantum dots for study of apoptosis	81
Ribosome as a Brownian nanomachine	82
Single cell injection by nanolasers.....	82
Study of complex biological systems.....	82
Tissue-engineering for studying effects of nanoparticles on cells	83
Molecular motors	83
Nanomotor made of nucleic acids.....	85
phi29 DNA packaging nanomotor	85
Light-activated ion channel molecular machines.....	86
Application of AFM for biomolecular imaging.....	86

<i>Future insights into biomolecular processes by AFM</i>	87
4Pi microscopy to study DNA double-strand breaks	87
Nanoscale DNA imaging	88
Multi-isotope imaging mass spectrometry	88
Applications of biomolecular computing in life sciences	88
Bacteria for construction of nanomachines	89
Natural nanocomposites.....	89
Nanotechnology in biological research	90
<i>QDs for biological research</i>	90
Molecular biology and nanotechnology.....	91
<i>Structural DNA nanotechnology</i>	91
<i>RNA nanotechnology</i>	92
<i>Genetically engineered proteins for nanobiotechnology</i>	93
Single molecule studies	94
<i>3D single-molecular imaging by coherent X-ray diffraction imaging</i>	94
<i>Nanoscale NMR for imaging single molecules</i>	94
<i>Optical trapping and single-molecule fluorescence</i>	94
<i>Study of molecular assembly of single molecules in living cells</i>	95
Nanochemistry	95
Nanoscale pH Meter	96
Nanolaser applications in life sciences	96
Nanoelectroporation	96
Nanomanipulation	97
Atomic force microscopy	97
DNA nanomanipulation	97
Fluorescence-force spectroscopy.....	98
Nanomanipulation by combination of AFM and other devices	98
<i>Surgery on living cells using AFM with nanoneedles</i>	99
Manipulation of DNA sequence by use of nanoparticles as laser light antennas.....	99
Nanomanipulation of single molecule.....	99
Nanomanipulation for study of mechanism of anticancer drugs	100
Optoelectronic tweezers.....	100
Optical manipulation of nanoparticles	101
Nanotechnology in genomic research	101
Nanotechnology for separation of DNA fragments	101
Nanotechnology-based DNA sequencing.....	101
Role of nanobiotechnology in identifying single nucleotide polymorphisms.....	103
Nanobiotechnology for study of mitochondria	103
Nanomaterials for the study of mitochondria	103
Study of mitochondria with nanolaser spectroscopy.....	104
Nanoproteomics	104
Biochips for nanoscale proteomics.....	104
<i>Protein biochips based on fluorescence planar wave guide technology</i>	104
<i>Nanofilter array chip</i>	105
Dynamic reassembly of peptides.....	105
High-field asymmetric waveform ion mobility mass spectrometry.....	105
Manipulation of redox systems by nanotechnology	106
Multi Photon Detection.....	106
Nanoflow liquid chromatography	106
Nanoparticle-protein interactions	107
Nanopore-based protein sequencing.....	107
Nanopores for phosphoprotein analysis.....	107
Nanoproteomics for study of misfolded proteins.....	107
Nanotube electronic biosensor for proteomics	108
Protein nanocrystallography	108
Protein engineering on nanoscale.....	109
<i>Nanowires for protein engineering</i>	109
<i>A nanoscale mechanism for protein engineering</i>	109
<i>Role of nanoparticles in self-assembly of proteins</i>	109
<i>Role of nanotechnology in peptide engineering</i>	110
QD-protein nanoassembly	110
Single cell nanoprobe for studying gene expression of individual cells.....	110
Study of proteins by atomic force microscopy	110
Study of proteomics at single molecule level	111
<i>Assays for protein expression at the single molecule level</i>	111
<i>Imaging proteins at the single-molecule level</i>	111
<i>Mass spectrometry of single-molecules using nanotechnology</i>	112
<i>Study of protein synthesis and single-molecule processes</i>	112
Role of nanotechnology in study of membrane proteins	113
<i>Nanoparticles for study of membrane proteins</i>	113
<i>Study of single protein interaction with cell membrane</i>	113

<i>Quantum dots to label cell surface proteins</i>	114
<i>Study of single membrane proteins at subnanometer resolution</i>	114
Self-assembling peptide scaffold technology for 3D cell culture	114
Nanobiotechnology and ion channels	115
AFM for characterization of ion channels	115
Aquaporin water channels	115
Nanopatch™ for study of ion channels at single molecule level	116
Remote control of ion channels through magnetic-field heating of nanoparticles	116
Role of nanobiotechnology in engineering ion channels	116
Nanobiotechnology for single cell analysis	118
Nanotechnology and bioinformatics	118
3D nano-map of synapse	118

4. Nanomolecular Diagnostics	121
Introduction	121
Nanodiagnosics	121
Rationale of nanotechnology for molecular diagnostics.....	123
Nanoarrays for molecular diagnostics	123
Fullerene photodetectors for chemiluminescence detection on microfluidic chip.....	123
Microfluidics and nanotech tools for single cell analysis.....	123
Nanofluidic/nanoarray devices to detect a single molecule of DNA.....	124
Protein nanoarrays.....	125
Protein nanobiochip.....	125
Silver nanorod array for on-chip detection of microbes and chemicals	125
AFM for molecular diagnostics	126
Nanofountain AFM probe.....	126
AFM for immobilization of biomolecules in high-density microarrays	126
AFM for nanodissection of chromosomes	126
Nanoparticles for molecular diagnostics	127
3DNA® Dendrimers for diagnostics	127
Carbon nanotubes.....	127
Exosome-based molecular diagnostics	128
Gold nanoparticles	128
Quantum dots for molecular diagnostics	128
<i>QDs for detection of pathogenic microorganisms</i>	129
<i>Bioconjugated QDs for multiplexed profiling of biomarkers</i>	129
<i>Imaging of living tissue with QDs</i>	129
Use of nanocrystals in immunohistochemistry.....	130
Magnetic nanoparticles	130
<i>Magnetic nanoparticles for bioscreening</i>	130
<i>Monitoring of implanted NSCs labeled with nanoparticles</i>	131
<i>Perfluorocarbon nanoparticles to track therapeutic cells in vivo</i>	131
<i>Superparamagnetic nanoparticles for cell tracking</i>	132
<i>SPIONS for real-time tracking of viral delivery</i>	132
<i>SPIONs for calcium sensing</i>	132
<i>Magnetic nanoparticles for labeling molecules</i>	133
<i>Study of living cells by SPIONs</i>	133
Imaging applications of nanoparticles	133
<i>CT image enhancement by nanoparticles</i>	133
<i>Dendritic nanoprobe for imaging of angiogenesis</i>	134
<i>Functionalized MWCNTs as ultrasound contrast agents</i>	134
Nanoparticles as contrast-enhancing agents for MRI.....	135
<i>Gadolinium-loaded dendrimer nanoparticles for tumor-specific MRI</i>	135
<i>Gadonanotubes for MRI</i>	135
<i>Gold nanorods and nanoparticles as imaging agents</i>	135
<i>In vivo imaging using nanoparticles</i>	136
<i>Manganese oxide nanoparticles as contrast agent for brain MRI</i>	136
<i>Magnetic nanoparticles as contrast agents for MRI of pancreas</i>	136
<i>Nanoparticles as contrast agent for MRI</i>	137
<i>Optical molecular imaging using targeted magnetic nanoprobe</i>	137
<i>QDs for biological imaging</i>	138
<i>SPIONs combined with MRI</i>	138
<i>Concluding remarks and prospects of nanoparticles for imaging</i>	139
Applications of nanopore technology for molecular diagnostics	139
Nanopore technology for detection of single DNA molecules	139
Nanocytometry	139
DNA-protein and -nanoparticle conjugates	140
Resonance Light Scattering technology	140
Nanobarcodes technology	141
Nanobarcode particle technology for SNP genotyping	141
QD nanobarcode for multiplexed gene expression profiling	142

Biobarcode assay for proteins.....	142
Single-molecule barcoding system for DNA analysis	144
Nanoparticle-based colorimetric DNA detection method.....	144
Nanoparticle-based up-converting phosphor technology	145
Surface-Enhanced Resonant Raman Spectroscopy.....	145
Near-infrared (NIR)-emissive polymersomes	146
Nanobiotechnology for detection of proteins	146
Captamers with proximity extension assay for proteins.....	146
Immunoliposome-PCR	147
Nanobiosensors	147
Cantilevers as biosensors for molecular diagnostics.....	147
<i>Advantages of cantilever technology for molecular recognition.....</i>	<i>148</i>
<i>Antibody-coated nanocantilevers for detection of microorganisms</i>	<i>149</i>
Carbon nanotube biosensors	150
<i>Carbon nanotube sensors coated with ssDNA and electronic readout</i>	<i>150</i>
<i>Carbon nanotubes sensors wrapped with DNA and optical detection</i>	<i>150</i>
FRET-based DNA nanosensor.....	151
Graphene biosensor based on Raman spectroscopy.....	151
Ion channel switch biosensor technology.....	151
Electrochemical nanobiosensor	152
Electronic nanobiosensors	152
Metallic nanobiosensors	153
Nanomaterial-based sensors for diagnosis from exhaled breath	153
Quartz nanobalance biosensor	153
Viral nanosensor	153
PEBBLE nanosensors	154
Detection of cocaine molecules by nanoparticle-labeled aptasensors.....	154
Nanosensors for glucose monitoring	154
Nanobiosensors for protein detection.....	155
Optical biosensors.....	155
<i>Laser nanosensors</i>	<i>156</i>
<i>Interferometric reflectance imaging sensors</i>	<i>156</i>
<i>Nanoshell biosensors.....</i>	<i>156</i>
<i>Plasmonics and SERS nanoprobe.....</i>	<i>157</i>
<i>Optical mRNA biosensors</i>	<i>157</i>
<i>Surface Enhanced Microoptical Fluidic Systems.....</i>	<i>158</i>
<i>Nanoparticle-enhanced sensitivity of fluorescence-based biosensors.....</i>	<i>159</i>
Nanowire biosensors	159
<i>Nanowire biosensors for detection of cancer biomarkers</i>	<i>160</i>
<i>Nanowire biosensors for detection of single viruses</i>	<i>160</i>
<i>Nanowires for detection of genetic disorders.....</i>	<i>161</i>
<i>Nanowires biosensor for detecting biowarfare agents.....</i>	<i>161</i>
<i>Concluding remarks and prospects of nanowire biosensors.....</i>	<i>161</i>
Future issues in the development of nanobiosensors	161
Applications of nanodiagnosics.....	162
Nanotechnology for detection of biomarkers.....	162
Nanotechnology for genotyping of single-nucleotide polymorphisms	163
<i>Nanoparticles for detecting SNPs.....</i>	<i>163</i>
<i>Nanopores for detecting SNPs.....</i>	<i>163</i>
Nanobiotechnologies for single molecule detection	163
Protease-activated QD probes	164
Labeling of MSCs with QDs.....	165
Nanotechnology for point-of-care diagnostics	165
<i>Nanoswitch-linked immunosorbent assay.....</i>	<i>165</i>
<i>Nanotechnology-based biochips for POC diagnosis</i>	<i>166</i>
<i>Carbon nanotube transistors for genetic screening</i>	<i>166</i>
<i>POC monitoring of vital signs with nanobiosensors</i>	<i>167</i>
<i>Nanodiagnosics for the battle field and biodefense</i>	<i>167</i>
<i>NANOANTENNA project of European Commission</i>	<i>168</i>
Nanodiagnosics for integrating diagnostics with therapeutics	168
Concluding remarks about nanodiagnosics.....	168
Clinical trials of nanodiagnosics	169
Future of nanodiagnosics	169
5. Nanopharmaceuticals	171
Introduction	171
Nanobiotechnology for drug discovery	171
Nanofluidic devices for drug discovery	172
Gold nanoparticles for drug discovery	173
<i>Tracking drug molecules in cells.....</i>	<i>173</i>
<i>SPR with colloidal gold particles</i>	<i>173</i>

Use of QDs for drug discovery	173
<i>Advantages of the use of QDs for drug discovery</i>	173
<i>Drawbacks of the use of QDs for drug discovery</i>	174
<i>QDs for imaging drug receptors in the brain</i>	175
Lipoparticles for drug discovery	175
<i>Biosensor for drug discovery with Lipoparticles</i>	175
Magnetic nanoparticles assays	176
Analysis of small molecule-protein interactions by nanowire biosensors	176
Cells targeting by nanoparticles with attached small molecules	176
Role of AFM for study of biomolecular interactions for drug discovery	177
Nanoscale devices for drug discovery	177
<i>Laboratories-on-a-chip</i>	177
<i>Lab-on-Bead</i>	177
<i>Nanotechnology for drug design at cellular level</i>	178
Role of nanobiotechnology in the future of drug discovery	178
Nanobiotechnology-based drug development	178
Dendrimers as drugs	178
Fullerenes as drug candidates.....	179
Nanobodies	180
<i>Companies involved in nanobodies</i>	181
Preclinical studies of nanoparticles in animals and humans	182
Manufacture of nanomedicines	182
Role of nanobiotechnology in microbial biofabrication	183
Nanobiotechnology in drug delivery	183
Ideal properties of material for drug delivery	183
Improved absorption of drugs in nanoparticulate form	184
Interaction of nanoparticles with human blood.....	184
Nanoscale devices delivery of therapeutics	184
Nanobiotechnology solutions to the problems of drug delivery	184
Nanocomposites for protein delivery.....	185
Nanosuspension formulations	185
Nanotechnology-based refilling of drug delivery depots through circulation	186
Self-assembled nanostructures with hydrogels for drug delivery	186
Nanomaterials and nanobiotechnologies used for drug delivery.....	186
Viruses as nanomaterials for drug delivery	188
Bacteria-mediated delivery of nanoparticles and drugs into cells	188
Cell-penetrating peptides	189
Nanoparticle-based drug delivery	189
Cationic nanoparticles.....	189
Ceramic nanoparticles	190
Cyclodextrin nanoparticles for drug delivery	190
Dendrimers for drug delivery	191
<i>DNA-assembled dendrimers for drug delivery</i>	191
Fullerenes for drug delivery	191
<i>Amphiphilic fullerene derivatives</i>	191
<i>Fullerene conjugates for intracellular delivery of peptides</i>	192
Gold nanoparticles as drug carriers	192
Layered double hydroxide nanoparticles	192
Micelles for drug delivery	193
Nanocomposite membranes for magnetically triggered drug delivery	193
Nanocrystals	193
<i>Nanocrystalline silver</i>	193
<i>Elan's NanoCrystal technology</i>	194
<i>Biorise system</i>	195
Nanodiamonds.....	196
Polymer nanoparticles	196
<i>Biodegradable PEG nanoparticles for penetrating the mucus barrier</i>	196
<i>PLGA-based nanodelivery technologies</i>	197
<i>Polymeric micelles</i>	197
<i>Chitosan nanoparticles</i>	198
QDs for drug delivery	198
Special procedures in nanoparticle-based drug delivery	199
<i>Coated nanoparticles for penetrating cell membranes without damage</i>	199
<i>Combinatorial synthesis of nanoparticles for intracellular delivery</i>	199
<i>Drug delivery using "Particle Replication in Nonwetting Templates"</i>	199
<i>Encapsulating water-insoluble drugs in nanoparticles</i>	200
<i>Filomicelles vs spherical nanoparticles for drug delivery</i>	200
<i>Flash NanoPrecipitation</i>	200
<i>Magnetic nanoparticles for drug delivery</i>	201
<i>Nanoparticles bound together in spherical shapes</i>	202
<i>Perfluorocarbon nanoparticles for imaging and targeted drug-delivery</i>	202

<i>Prolonging circulation of nanoparticles by attachment to RBCs</i>	202
<i>Self-assembling nanoparticles for intracellular drug delivery</i>	203
<i>Trojan nanoparticles</i>	203
<i>Therapeutic protein delivery from nanoparticle-protein complexes</i>	204
<i>Triggered release of drugs from nanoparticles</i>	204
Liposomes	205
Basics of liposomes.....	205
Stabilization of phospholipid liposomes using nanoparticles.....	205
Lipid nanoparticles.....	205
<i>Advantages of the lipid nanoparticle technology</i>	206
<i>Applications of lipid nanoparticles</i>	207
<i>Lipid nanocapsules</i>	207
<i>Lipid emulsions with nanoparticles</i>	207
<i>Polymerized liposomal nanoparticle</i>	208
<i>Solid lipid nanoparticles</i>	209
Nanostructured organogels.....	209
Niosomes.....	209
Limitations of liposomes for drug delivery.....	209
Liposomes incorporating fullerenes.....	209
Arsonoliposomes.....	210
Liposome-nanoparticle hybrids.....	210
Nanogels	211
Nanogel-liposome combination.....	211
Nanospheres	211
Nanotubes	211
Carbon nanotubes for drug delivery.....	212
CNT-liposome conjugates for drug delivery into cells.....	212
Lipid-protein nanotubes for drug delivery.....	212
Haloysite nanotubes for drug delivery.....	213
Nanocochleates	213
Nanobiotechnology and drug delivery devices	214
Nano-encapsulation.....	214
Nanotechnology-based device for insulin delivery.....	215
Nanoporous materials for drug delivery devices.....	215
<i>Nanopore membrane in implantable titanium drug delivery device</i>	215
<i>Measuring the permeability of nanomembranes</i>	215
Nanovalves for drug delivery.....	216
Nanochips for drug delivery.....	216
Nanobiotechnology-based transdermal drug delivery	217
Introduction.....	217
Delivery of nanostructured drugs from transdermal patches.....	217
Effect of mechanical flexion on penetration of bucky balls through the skin.....	217
Ethosomes for transdermal drug delivery.....	217
NanoCyte transdermal drug delivery system.....	218
Safety issues of applications of nanomaterial carriers on the skin.....	219
Transdermal administration of lipid nanocapsules.....	219
Transdermal nanoparticle preparations for systemic effect.....	219
Nasal drug delivery using nanoparticles	220
Mucosal drug delivery with nanoparticles	221
Future prospects of nanotechnology-based drug delivery	221
DNA nanorobots for drug delivery.....	221
Nanomolecular valves for controlled drug release.....	222
Nanosponge for drug delivery.....	222
Nanomotors for drug delivery.....	222
6. Role of Nanotechnology in Biological Therapies	225
Introduction	225
Nanotechnology for delivery of proteins and peptides	225
Nanobiotechnology for vaccine delivery	225
Bacterial spores for delivery of vaccines.....	225
Dendrimer-RNA nanoparticle vaccines.....	226
Lipid nanoparticles for immunostimulatory RNA delivery.....	226
Nanoparticles for DNA vaccines.....	226
Nanoparticle-based adjuvants for vaccines.....	226
Nanospheres for controlled release of viral antigens.....	227
Nanotechnology-based mucosal vaccines.....	228
Nanotechnology for oral vaccines.....	228
Proteosomes™ as vaccine delivery vehicles.....	228
Targeted Synthetic Vaccine Particle (tSVP™) technology.....	228
Virus-mimetic nanovesicles as an antigen-delivery system.....	229
Nanobiotechnology for cell therapy	229

Nano-biocomposites containing living cells	230
Nanobiotechnology for gene therapy	230
Nanoparticle-mediated gene therapy	230
<i>Calcium phosphate nanoparticles as nonviral vectors</i>	232
<i>Carbonate apatite nanoparticles for gene delivery</i>	232
<i>Dendrimers for gene transfer</i>	232
<i>DNA nanoparticles</i>	233
<i>Gelatin nanoparticles for gene delivery</i>	233
<i>Immunoliposomes for delivery anticancer gene therapy</i>	234
<i>Lipid nanoparticles for targeted delivery of nucleic acids</i>	234
<i>Magnetic nanoparticles for targeted gene delivery</i>	235
<i>Nanoparticles for imaging and intracellular delivery of nucleic acids</i>	235
<i>Nanoparticles linked to viral vectors for photothermal therapy</i>	235
<i>Nanoparticles for p53 gene therapy of cancer</i>	235
<i>Nanoparticles with virus-like function as gene therapy vectors</i>	236
<i>Nanobiologics for nucleic acid delivery</i>	236
<i>Photo-controlled in vivo activation of biomolecules by nanoparticles</i>	236
<i>Silica nanoparticles for gene delivery</i>	237
Cochleate-mediated DNA delivery	237
Nanorod gene therapy	238
Nanomagnets for targeted cell-based cancer gene therapy.....	238
NanoNeedles for delivery of genetic material into cells.....	238
Application of pulsed magnetic field and superparamagnetic nanoparticles	239
Nanobiotechnology for antisense drug delivery	239
Antisense nanoparticles	239
Dendrimers for antisense drug delivery.....	240
Polymer nanoparticles for antisense delivery system	240
Nanoparticle-mediated siRNA delivery.....	240
Chitosan-coated nanoparticles for siRNA delivery	241
Delivery of siRNA by nanosize liposomes.....	241
Delivery of gold nanorod-siRNA nanoplex to dopaminergic neurons	241
Polymer-based nanoparticles for siRNA delivery.....	242
<i>Polyethylenimine nanoparticles for siRNA delivery</i>	242
<i>siRNA-PEG nanoparticle-based delivery</i>	242
<i>Polycation-based nanoparticles for siRNA delivery</i>	242
<i>Calando's technology for targeted delivery of anticancer siRNA</i>	243
<i>Self-assembling nanoplatform for delivery of siRNA</i>	243
<i>Topical delivery of siRNA-nanoparticle conjugates</i>	244
Quantum dots to monitor RNAi delivery	244
RNAi-based nanomedicines for gene silencing in hematological malignancies.....	245
Lipid nanoparticles for mRNA delivery	245
7. Nanodevices & Techniques for Clinical Applications	246
Introduction	246
Clinical nanodiagnosics	246
Nano-endoscopy	246
Application of nanotechnology in radiology.....	247
High-resolution ultrasound imaging using nanoparticles.....	247
Nanobiotechnology in tissue engineering	248
Nanoscale surfaces for stem cell culture.....	248
3D nanofilament-based scaffolds	249
Electrospinning technology for nanobiofabrication	249
Nanomaterials for tissue engineering.....	250
<i>Carbon nanotubes for artificial muscles</i>	250
<i>Nanofibers for tissue engineering of skeletal muscle</i>	250
Nanofibrous scaffolds for stem cell-based regenerative therapies	250
Nanomaterials for combining tissue engineering and drug delivery	251
Nanobiotechnology for organ replacement and assisted function	252
Exosomes for drug-free organ transplants.....	252
Nanobiotechnology and organ-assisting devices.....	252
Nanosurgery	253
Miniaturization in surgery.....	253
<i>Nanotechnology for hemostasis during surgery</i>	253
Minimally invasive surgery using catheters.....	253
Nanorobotics	254
In vivo microbot propulsion	254
Nanorobots	255
Nanoscale laser surgery.....	255
8. Nanooncology	258
Introduction	258

Nanobiotechnology for detection of cancer	258
Aptasensor for electrochemical detection of exosomes.....	258
Aptamer-nanoparticle combinations for cancer diagnostics and therapeutics.....	258
Dendrimers for sensing cancer cell apoptosis.....	259
Detection of circulating cancer cells.....	259
<i>DNA nanospheres for isolation of CTCs</i>	259
<i>Magnetic nanoparticles for capturing CTCs</i>	260
<i>Nano-Velcro technology for capturing CTCs</i>	260
Gold nanoparticles for cancer diagnosis.....	260
Gold nanorods for detection of metastatic tumor cells.....	262
Magnetoacoustic detection of cancer using superparamagnetic nanoparticles.....	262
Nanosensors for cancer diagnosis.....	262
<i>Differentiation between normal and cancer cells by nanosensors</i>	262
<i>Implanted biosensor for cancer</i>	262
Nanotubes for detection of cancer proteins.....	263
<i>Nanobiochip sensor technique for analysis of oral cancer biomarkers</i>	263
<i>Nanodots for tracking apoptosis in cancer</i>	264
<i>Nanolaser spectroscopy for detection of cancer in single cells</i>	264
<i>Nanoparticles designed for dual-mode imaging of cancer</i>	264
<i>Nanotechnology-based single molecule assays for cancer</i>	265
<i>QDs for detection of tumors</i>	265
<i>QD-based test for DNA methylation</i>	265
<i>Spectral imaging and CNTs in malignant tumors</i>	266
Nanobiotechnology for early detection of cancer to improve treatment.....	266
Nanobiotechnology-based drug delivery in cancer	267
Nanoparticle formulations for drug delivery in cancer.....	268
<i>Anticancer drug particles incorporated in liposomes</i>	268
<i>Cerasomes</i>	269
<i>Doxorubicin nanocarriers</i>	269
<i>Curcumin nanoformulation as cancer therapeutics</i>	270
<i>Encapsulating drugs in hydrogel nanoparticles</i>	271
<i>Exosomes</i>	271
<i>Folate-linked nanoparticles</i>	272
<i>Ginger nanoparticles for delivery of chemotherapy in colorectal cancer</i>	272
<i>Gold nanoparticles stabilized with resveratrol</i>	272
<i>Iron oxide nanoparticles</i>	272
<i>Lipid based nanocarriers</i>	273
<i>Micelles for drug delivery in cancer</i>	273
<i>Minicells for targeted delivery of nanoscale anticancer therapeutics</i>	275
<i>Protein nanocages for penetration of airway mucous and tumors</i>	275
<i>Nanoconjugates for subcutaneous delivery of anticancer drugs</i>	276
<i>Nanomaterials for delivery of poorly soluble anticancer drugs</i>	276
<i>Nanoparticle formulation for enhancing anticancer efficacy of cisplatin</i>	276
<i>Nanoparticle formulations of paclitaxel</i>	276
<i>Nanoparticles containing albumin and antisense oligonucleotides</i>	277
<i>Niosomes for anticancer drug delivery</i>	278
<i>Pegylated nanoliposomal formulation</i>	278
<i>Peptide-linked nanoparticle delivery</i>	278
<i>Poly-2-hydroxyethyl methacrylate nanoparticles</i>	279
<i>Polypeptide-doxorubicin conjugated nanoparticles</i>	279
<i>Porous silicon nanoparticles for cancer drug delivery</i>	279
<i>Protosphere nanoparticle technology</i>	280
<i>siRNA delivery in combination with nanochemotherapy</i>	280
<i>Zinc oxide nanoparticles for drug delivery in cancer</i>	280
Nanoparticles for targeted delivery of anticancer therapeutics.....	281
<i>Aptamer nanoformulations for targeted anticancer therapy</i>	281
<i>Bacteriophage capsid-based nanoparticles for targeted cell-delivery</i>	282
<i>Canine parvovirus as a nanocontainer for targeted drug delivery</i>	282
<i>Carbon nanotubes for targeted drug delivery to cancer cells</i>	283
<i>Carbon magnetic nanoparticles for targeted drug delivery in cancer</i>	283
<i>Chitosan nanoparticles for targeted anticancer drug delivery</i>	284
<i>CRLX101 for targeted anticancer drug delivery</i>	284
<i>Cycloset system for targeted delivery of anticancer therapeutics</i>	284
<i>Fullerenes for enhancing tumor targeting by antibodies</i>	284
<i>Gold nanoparticles for targeted drug delivery in cancer</i>	285
<i>Hepatic artery infusion of LDL-DHA nanoparticles for liver cancer</i>	286
<i>Hyaluronic acid nanocarriers for targeted anticancer therapeutics</i>	287
<i>Magnetic nanoparticles for remote-controlled drug delivery to tumors</i>	287
<i>Mesoporous silica nanoparticles</i>	288
<i>Monitoring of targeted delivery by nanoparticle-peptide conjugates</i>	288
<i>Nanobees for targeted delivery of cytolytic peptide melittin</i>	288

<i>Nanobody-shell polymeric micelles for targeted drug delivery</i>	289
<i>Nanoformulations of monoclonal antibodies for targeted drug delivery</i>	289
<i>Nanogel-based stealth cancer vaccine targeting macrophages</i>	290
<i>Nanovehicles for targeted delivery of paclitaxel</i>	290
<i>Nanocell for targeted drug delivery to tumor</i>	291
<i>Nanodiamonds for local delivery of chemotherapy at site of cancer</i>	291
<i>Nanoimmunoliposome-based system for targeted delivery of siRNA</i>	291
<i>Nanoparticle-mediated targeting of MAPK signaling pathway</i>	292
<i>Nanoparticles for targeted antisense therapy of cancer</i>	292
<i>Nanoparticles for delivery of suicide DNA to prostate tumors</i>	292
<i>Nanoparticles for targeted delivery of concurrent chemoradiation</i>	293
<i>Nanoparticle-based therapy targeted to cancer metastases</i>	293
<i>Nanoparticle-mediated delivery of multiple anticancer agents</i>	293
<i>Nanostructured hyaluronic acid for targeted drug delivery in cancer</i>	294
<i>Perfluorocarbon emulsion for targeted chemotherapeutic delivery</i>	294
<i>Polymer nanoparticles for targeted drug delivery in cancer</i>	294
<i>Polymersomes for targeted cancer drug delivery</i>	296
<i>Quantum dots and quantum rods for targeted drug delivery in cancer</i>	296
<i>Remote controlled drug delivery from magnetic nanocrystals</i>	297
<i>Targeted delivery of nanoparticulate drugs into lymphatic system</i>	297
<i>Targeted drug delivery with nanoparticle-aptamer bioconjugates</i>	297
<i>Use of T cells for delivery of gold nanoparticles to tumors</i>	298
Dendrimers for anticancer drug delivery	298
<i>Application of dendrimers in boron neutron capture therapy</i>	299
<i>Application of dendrimers in photodynamic therapy</i>	299
<i>Dendrimer-based synthetic vector for targeted cancer gene therapy</i>	300
<i>Poly-L-lysine dendrimer as antiangiogenic agent</i>	300
RNA nanotechnology for delivery of cancer therapeutics	301
<i>Delivery of siRNAs for cancer</i>	301
Combination delivery systems for nanoparticle penetration into tumor tissue	302
Nanotechnology-based cancer therapy	302
Devices for nanotechnology-based cancer therapy	302
<i>Convection-enhanced delivery with nanoliposomal CPT-11</i>	302
<i>Nanoengineered silicon for brachytherapy</i>	303
Anticancer effect of nanoparticles	303
<i>Antiangiogenic therapy using nanoparticles</i>	303
<i>Cytotoxic effects of cancer nanoparticles</i>	303
<i>Gold nanoparticles for inhibiting tumor growth</i>	304
<i>Nanoshell-based cancer therapy</i>	304
<i>Nanobody-based cancer therapy</i>	304
Nanosecond pulsed electric fields for cancer therapy	305
Nanoparticles combined with physical agents for tumor ablation	305
<i>Boron neutron capture therapy using nanoparticles</i>	305
<i>Gold nanoparticles combined with radiation therapy</i>	306
<i>Laser-induced cancer destruction using nanoparticles</i>	306
<i>Nanoparticle-mediated thermal ablation of cancer</i>	308
<i>Temperature-sensitive liposomes for cancer destruction</i>	310
<i>Ultrasound radiation of tumors combined with nanoparticles</i>	310
Nanomedicines combined with molecular targeted anticancer therapeutics	311
<i>Bispecific nanobioconjugate for targeted cancer immunotherapy</i>	311
Impact of nanotechnology-based imaging in management of cancer	311
<i>Cornell dots for cancer imaging</i>	311
<i>Nanoparticles and optoacoustic imaging in management of cancer</i>	312
<i>Nanoparticle-MRI for tracking dendritic cells in cancer therapy</i>	313
<i>Nanoparticle-CT scan</i>	313
<i>Nanosensor device as an aid to cancer surgery</i>	313
<i>Nanoparticle-based imaging in oncology clinical trials</i>	314
<i>QDs aid lymph node mapping in cancer</i>	314
<i>Single wall carbon nanotubes for targeted imaging of tumors</i>	314
Nanoparticles for targeted therapy of tumors	315
Nanocarriers with TGF- β inhibitors for targeting cancer	315
Nanobombs for cancer	315
Nanoparticle-based anticancer drug delivery to overcome MDR	316
<i>Time-delayed, dual-drug nanoparticle delivery system</i>	316
Combination of diagnostics and therapeutics for cancer	317
<i>Aptamer conjugated magnetic nanoparticles</i>	317
<i>Biomimetic nanoparticles targeted to tumors</i>	317
<i>Dendrimer nanoparticles for targeting and imaging tumors</i>	318
<i>Gold nanoparticle plus bombesin for imaging and therapy of cancer</i>	318
<i>Gold nanorods for diagnosis plus photothermal therapy of cancer</i>	318
<i>Gold nanotubes for diagnosis plus photothermal therapy of cancer</i>	319

<i>Magnetic nanoparticles for imaging as well as therapy of cancer</i>	319
<i>Micelles for targeted drug delivery and PET imaging in cancer</i>	320
<i>Nanobialys for combining MRI with delivery of anticancer agents</i>	320
<i>Nanoparticles, MRI and thermal ablation of tumors</i>	320
<i>pHLIP nanotechnology for detection and targeted therapy of cancer</i>	321
<i>QD conjugates combine cancer imaging, therapy and sensing</i>	321
<i>Silica nanoparticles for combining diagnosis with cancer therapy</i>	322
<i>Squalene-based nanocomposites for tumor imaging and therapy</i>	322
<i>Radiolabeled carbon nanotubes for tumor imaging and targeting</i>	322
<i>Ultrasonic tumor imaging and targeted chemotherapy by nanobubbles</i>	322
Role of nanobiotechnology in cancer immunology	323
Nanorobotics for management of cancer	324
<i>Bacterial nanorobots for targeting cancer</i>	324
<i>DNA robots for targeting cancer</i>	324
Fullerenes for protection against chemotherapy-induced cardiotoxicity	325
Concluding remarks and future of nanooncology	325

9. Nanoneurology 327

Introduction 327

Nanobiotechnology for neurophysiological studies 327

Nanoelectrodes in neurophysiology	327
Chronic EEG recording	327
Nanoscale devices for network-level electrophysiology	327
Chronic subcellular recording from implanted electrodes	328
Nanowires for monitoring brain activity via blood vessels	328
Gold nanoparticles for in vivo study of neural function	329

Nanodiagnosis and nanoparticle-based brain imaging 329

Applications of nanotechnology in molecular imaging of the brain	329
Nanoparticles and MRI for macrophage tracking in the CNS	330
Nanoparticles for tracking stem cells for therapy of CNS disorders	330
Multifunctional NPs for diagnosis and treatment of brain disorders	331

Nanotechnology-based drug delivery to the CNS 331

Nanotechnology-based drug delivery for neurodegenerative disorders	331
<i>Nanoencapsulation for delivery of vitamin E for Alzheimer disease</i>	331
<i>Selegiline-PEG nanoparticles targeting Aβ fibrils in Alzheimer disease</i>	331
Nanoparticles for drug delivery across BBB	331
<i>Carbon nanotubes for drug delivery to the CNS</i>	332
<i>Nanoagonists of adenosine receptor for delivery across BBB</i>	333
<i>Nanovesicles for transport across BBB</i>	333
<i>Polymeric nanoparticles as carriers for CNS drug delivery</i>	334
Mechanism of the nanoparticle-mediated transport of the drugs across the BBB	334
<i>Transcytosis of transferrin-containing nanoparticles across the BBB</i>	334
Nanotechnology-based strategies for drug delivery across BBB	334
<i>G-Technology®</i>	335
<i>LipoBridge™ technology</i>	335
Nanotechnology-based drug delivery to brain tumors	335
<i>Intravenous gene delivery with nanoparticles into brain tumors</i>	335
<i>Micelles for delivery of chemotherapy to brain tumors</i>	336
<i>Multifunctional nanoparticles for treating brain tumors</i>	336
<i>Nanoparticles for delivery of drugs to brain tumors across BBB</i>	336
<i>NP delivery across the BBB for imaging and therapy of brain tumors</i>	337
<i>NP-based targeted delivery of chemotherapy across the BBB</i>	337
<i>PLA nanoparticles for controlled delivery of BCNU to brain tumors</i>	338
Nanoparticles as nonviral vectors for CNS gene therapy	338
<i>Silica nanoparticles for CNS gene therapy</i>	338
<i>Cationic lipids for CNS gene therapy</i>	339
<i>Polyethylenimine-based nanoparticles for CNS gene therapy</i>	339
<i>Dendrimers for CNS gene therapy</i>	339
<i>Carbon nanotubes for CNS gene therapy</i>	339
Nanoparticle-based drug delivery to the inner ear	340
Nanotechnology-based devices and implants for CNS	340

Nanobiotechnology and neuroprotection 340

Neuroprotection due to antioxidant effect of nanoparticles	341
Neuroprotective nanoparticles that inhibit neuroinflammation	342
Neuroprotective nanoparticles that inhibit A β formation	342

Nanobiotechnology for regeneration and repair of the CNS 342

Nanowire neuroprosthetics with functional membrane proteins	342
Nanotube-neuron electronic interface	343
Role of nanobiotechnology in regeneration and repair following CNS trauma	343
<i>Nanofibers as an aid to CNS regeneration by neural progenitor cells</i>	343
<i>Peptide nanostructures for repair of the CNS</i>	344

Nanobiotechnology for repair and regeneration following TBI.....	344
Nanoparticles for repair following SCI.....	344
<i>Repair of SCI by nanoscale micelles</i>	345
Nanobiotechnology-based devices for restoration of neural function	345
<i>Nanobiotechnology-based artificial retina</i>	346
Role of nanomedicine in treatment of neurodegenerative disorders.....	346
Nanopsychiatry.....	346
Nanoneurosurgery.....	347
Bucky balls for brain cancer	347
Electrospun nanofiber tubes for regeneration of peripheral nerves.....	347
Femtolaser neurosurgery	347
Graphene technology for neurosurgery	348
Nanofiber brain implants.....	348
<i>Nanoparticles as an aid to neurosurgery</i>	348
Nanoscaffold for CNS repair	349
Application of nanobiotechnology to pain therapeutics.....	349
10. Nanocardiology.....	351
Introduction	351
Nanotechnology-based cardiovascular diagnosis.....	351
Detection of biomarkers of myocardial infarction in saliva by a nanobiochip.....	351
Nanobiosensors for detection of cardiovascular disorders	351
Use of magnetic NPs as MRI contrast agents for cardiac imaging	351
Perfluorocarbon NPs for combining diagnosis with therapy in cardiology.....	352
Cardiac monitoring in sleep apnea.....	352
Detection and treatment of atherosclerotic plaques in the arteries	352
Monitoring for disorders of blood coagulation.....	353
Nanotechnology-based therapeutic delivery in cardiology.....	353
Combination of diagnostics with therapeutics	353
Controlled delivery of nanoparticles to injured vasculature	354
Nanobiotechnology-based therapeutic delivery in myocardial ischemia	354
<i>IGF-1 delivery by nanofibers for cell therapy of myocardial infarction</i>	355
<i>Injectable peptide nanofibers for myocardial ischemia</i>	355
Liposomal nanodevices for targeted cardiovascular drug delivery	355
Low molecular weight heparin-loaded polymeric nanoparticles.....	356
Magnetic antibody-linked nanoparticles to deliver cells to the heart.....	356
Nanoparticles for cardiovascular imaging and targeted drug delivery	356
Nanofiber-based scaffolds with drug-release properties	357
NP-based systemic drug delivery to prevent cardiotoxicity	357
Targeted nanoparticle-DNA delivery to the cardiovascular system	357
Nanotechnology-based therapeutics for cardiovascular diseases	358
Nanolipoblockers for atherosclerotic arterial plaques.....	358
Nanotechnology approach to the vulnerable plaque as cause of cardiac arrest	358
Nanotechnology for regeneration of the cardiovascular system	358
Nanotechnology for cardiac revascularization	359
Nanocomposite hydrogels for myocardial tissue engineering.....	359
Nanotechnology-based stents.....	359
Restenosis after percutaneous coronary angioplasty.....	360
<i>Drugs encapsulated in biodegradable nanoparticles</i>	360
<i>Magnetic nanoparticle-coated DES</i>	361
<i>Magnetic nanoparticles encapsulating paclitaxel targeted to stents</i>	361
<i>Nanocoated DES</i>	362
<i>Nanopores to enhance compatibility of DES</i>	362
Application of nanotechnology in cardiac catheterization	363
11. Nanopulmonology.....	365
Introduction	365
Nanoparticles for pulmonary drug delivery.....	365
Systemic drug delivery via pulmonary route	365
Nanoparticle drug delivery for effects on the respiratory system	365
Fate and toxicology of nanoparticles delivered to the lungs	366
Nanoparticle drug formulations for spray inhalation	367
Nanobiotechnology for improving insulin delivery in diabetes.....	367
<i>Inhalation of glucose-sensitive NP for regulated release of insulin</i>	367
<i>Pulmonary delivery of insulin by surface acoustic wave technology</i>	367
Nanotechnology-based pharmaceuticals for pulmonary disorders	367
Nanotechnology-based treatment of pulmonary disorders	369
Management of cystic fibrosis.....	369
Nanobiotechnology-based gene transfer in CF	369
<i>Nonviral DNA nanoparticle-mediated CFTR gene transfer</i>	369
<i>Liposome-mediated CFTR gene transfer</i>	370

<i>Magnetofection for enhancing nonviral gene transfer to the airways</i>	370
NP-based delivery of antibiotics for treatment of pulmonary infections in CF.....	370
Nanotechnology-based treatment of chronic obstructive pulmonary disease	371
Nanotechnology-based treatment of pulmonary inflammation.....	371
12. Nanoorthopedics.....	373
Introduction	373
Application of nanotechnology for bone research.....	373
Reducing reaction to orthopedic implants	373
Enhancing the activity of bone cells on the surface of orthopedic implants	374
Synthetic nanomaterials as bone implants.....	374
<i>NanoBone implants</i>	374
<i>NanoBone versus BioOss</i>	375
Nanoparticles for repairing bone cracks	375
Nanotechnology-based bone regeneration.....	375
<i>Delivery of growth factors for bone repair and regeneration</i>	375
<i>Role of nanoparticles in regenerative therapy for osteoporosis</i>	376
Aligning nanotubes to improve artificial joints.....	376
Carbon nanotubes as scaffolds for bone growth	376
Nanoparticle-based hydrogels for cartilage regeneration	377
Nanotechnology for engineering of cartilage replacement.....	377
Cartilage disorders of knee joint	378
<i>Nanotechnology as an aid to arthroscopy</i>	378
<i>Nanotechnology-based therapy for osteoarthritis</i>	379
13. Nanoophthalmology.....	381
Introduction	381
Nanocarriers for ocular drug delivery	381
<i>Dendrimers for drug delivery in ophthalmology</i>	382
<i>DNA nanoparticles for nonviral gene transfer to the eye</i>	382
<i>Nanoparticle-based topical drug application to the eye</i>	382
<i>Lipid nanoparticles for ocular drug delivery</i>	383
<i>Nanoparticles for intraocular drug delivery</i>	383
Nanoparticles impregnated ocular inserts for drug delivery to the eye	384
Ophthalmic drug delivery through nanoparticles in contact lenses	384
Nanotechnology-based therapeutics for eye disorders.....	384
<i>Nanotechnology for prevention of neovascularization</i>	385
<i>Nanoparticles as nonviral vectors for gene therapy of retinal disorders</i>	386
<i>Nanobiotechnology for treatment of glaucoma</i>	386
<i>Nanotechnology for treatment for age-related macular degeneration</i>	387
14. Nanomicrobiology.....	389
Introduction	389
Nanodiagnosis of infections.....	389
Detection of viruses	389
<i>Cantilever beams for detection of single virus particles</i>	389
<i>Carbon nanotubes-based detection of viruses</i>	389
<i>Electric fields for accelerating detection of viruses</i>	390
<i>QD fluorescent probes for detection of respiratory viral infections</i>	390
<i>Verigene Respiratory Virus Plus Assay</i>	391
<i>Surface enhanced Raman scattering for detection of viruses</i>	392
Detection of bacteria	392
<i>Nanoparticle-based methods for bacterial detection</i>	392
<i>QDs for detection of bacterial infections</i>	393
Role of nanobiotechnology in diagnosis of fungal infections	393
<i>Magnetic nanoparticle-based technique for detection of fungi</i>	393
<i>Nano-amplification technique for the detection of fungal pathogens</i>	394
Role of nanobacteria in human diseases.....	394
Nature of nanobacteria	394
Nanobacteria and kidney stone formation	395
Nanobacteria in cardiovascular disease	395
Nanotechnology-based microbicidal agents.....	396
Carbon nanotubes as antimicrobial agents	396
Gold and silver nanoparticles as antibacterial agents	396
Gold nanoparticles for targeting drug-resistant bacteria	396
Nanocarriers for antibacterial peptides.....	397
Nanoemulsions as microbicidal agents	397
Nanoparticles for overcoming antibiotic resistance	398
Nanoformulations of antifungal agents.....	398
Nanoscale bactericidal powders	398
Nanotubes for detection and destruction of bacteria	399

Nanoscale surface structure for antibacterial defense	399
<i>Silver nanoparticle coating as prophylaxis against infection</i>	400
Nanobiotechnology and virology	400
Study of interaction of nanoparticles with viruses.....	400
Study of pathomechanism of viral diseases	401
Transdermal nanoparticles for immune enhancement in HIV	401
Nanofiltration to remove viruses from plasma transfusion products	401
Nanotechnology-based antiviral agents	402
Dendrimer-based intracellular delivery of antibodies.....	402
Dendrimers as nonviral vectors in dendritic cell-based immunotherapies.....	402
Fullerenes as antiviral agents	403
Gold nanorod-based delivery of RNA antiviral therapeutics	403
Nanocoating for antiviral effect	403
Nanoviricides.....	404
Nanocarrier-mediated siRNA delivery for treatment of HIV/AIDS	405
Silver nanoparticles as antiviral agents	406
siRNA lipid nanoparticle for the treatment of Ebola virus infection.	406
15. Miscellaneous Healthcare Applications of Nanobiotechnology	409
Introduction	409
Nanoimmunology	409
Fullerenes for interruption of allergic/immune response	409
Carbon nanoparticle-based immunomodulation.....	409
Systemic lupus erythematosus	410
Inflammatory diseases	410
Rheumatoid arthritis.....	410
Nanohematology	412
Artificial red cells	412
Feraheme	412
Nanoparticle-based drug delivery for gastrointestinal disorders	412
Ginger nanoparticles for IBS.....	412
Nanoparticles for targeted therapeutic delivery to the liver	413
Nanonephrology	413
Nanobiotechnology-based renal dialysis.....	413
<i>Nanotechnology-based human nephron filter for renal failure</i>	414
<i>Blood-compatible membranes for renal dialysis</i>	414
<i>Ceramic filter for renal dialysis</i>	414
Nanotechnology for wound healing	414
Nanotechnology-based products for skin disorders	415
Cubosomes for treating skin disorders of premature infants.	415
Nanoparticles for improving targeted topical therapy of skin.....	415
Nanoparticle-based sun screens.....	416
Nanoengineered bionic skin.....	416
Topical nanocreams for inflammatory disorders of the skin.....	417
Nanobiotechnology for disorders of aging	417
Personal care products based on nanotechnology	417
Nanocosmeceuticals	418
Nanotechnology for hair care.....	418
Nanodentistry	419
Bonding materials	419
Dental caries	419
Nanospheres for dental hypersensitivity.....	420
Nanomaterials for dental filling	420
Nanomaterials for dental implants.....	420
Nanodiamonds for root canal repair.....	420
Nanomaterial aspects of oxidative stress	421
Nanoparticle antioxidants.....	421
<i>Fullerene-based antioxidants</i>	421
<i>Ceria nanoparticles as neuroprotective antioxidants</i>	421
Antioxidant nanoparticles for treating diseases due to oxidative stress	422
Nanotechnology and homeopathic medicines	422
Nanoparticles as antidotes for poisons	423
Nanoparticles for chemo-radioprotection	423
Role of nanobiotechnology in biodefense	424
Nanoparticles to combat microbial warfare agents.....	424
Removal of toxins from blood	425
Nanobiotechnology for public health	425
Nanotechnology for water purification.....	425
<i>Nanofiltration to remove viruses from water</i>	425
<i>Nanostructured membranes for water purification</i>	426
<i>Nanotechnologies for water remediation</i>	426

	<i>Nanotechnology-based photochemical water purification</i>	427
	<i>Magnetic nanoscavengers for water purification</i>	427
	Nanobiotechnology and nutrition	427
	Nanobiotechnology and food industry	428
	Role of nanobiotechnology in personalized nutrition	429
16.	Nanobiotechnology and Personalized Medicine	431
	Introduction	431
	Role of nanobiotechnology in personalized management of cancer	432
	Nanotechnology-based personalized medicine for cardiology	433
	Nanobiotechnology for therapeutics design and monitoring	433
	Smart nanosystems for personalized medicine.....	433
	<i>Nanosystems that respond to disease environments</i>	434
17.	Nanotoxicology	435
	Introduction	435
	Fate of nanoparticles in the human body	435
	Nanoparticle-protein interactions	435
	Protein corona and nanoparticle toxicity.....	435
	<i>Systemic toxicity of protein corona</i>	436
	<i>Protein corona and cytotoxicity</i>	436
	Computational prediction of toxicity of nanosubstances	436
	In vitro vs in vivo testing for toxicity of nanoparticles	436
	Stem cellines for testing toxicity of nanoparticles.....	437
	Variations in safety issues of different nanoparticles	437
	Carbon nanotube safety.....	437

18.	Ethical and Regulatory Aspects of Nanomedicine	455
	Introduction	455
	Ethical and social implications of nanobiotechnology	455
	Nanoethics.....	455
	Nanotechnology patents	456

Quantum dot patents relevant to healthcare applications	457
Challenges and future of nanobiotechnology patents	457
Legal aspects of nanobiotechnology	457
Nanotechnology standards	458
Preclinical testing of nanomaterials for biological applications.....	459
FDA regulation of nanobiotechnology products	459
FDA and nanotechnology-based medical devices	461
FDA's Nanotechnology Task Force	462
FDA collaboration with agencies/organizations relevant to nanotechnology.....	463
Regulation of nanotechnology in the European Union.....	464
Safety recommendations of the Royal Society of UK.....	464
European Commission and safety of nanocosmetics	465
19. Research and Future of Nanomedicine.....	467
Introduction	467
Nanobiotechnology research in the academic centers	467
Clinical trials of nanomedicines	470
Future of nanomedicine	471
Support for nanobiotechnology by US Government agencies	472
Nanomedicine initiative of NIH.....	472
US Federal funding for nanobiotechnology.....	472
NCI Alliance for Nanotechnology in Cancer	473
<i>Nanotechnology Characterization Laboratory</i>	<i>473</i>
<i>Centers of Cancer Nanotechnology Excellence</i>	<i>474</i>
<i>Innovative Research in Cancer Nanotechnology</i>	<i>474</i>
Nanomedicine Center for Nucleoprotein Machines	475
Global Enterprise for Micro-Mechanics and Molecular Medicine	475
Nanomedicine in Europe	476
NANO2LIFE	476
European Technology Platform on NanoMedicine.....	476
European Union's "Horizon 2020".....	477
European Nanomedicine Characterisation Laboratory.....	477
20. Nanobiotechnology Markets.....	479
Introduction	479
Markets according to areas of applications	480
Markets for nanomedicine	481
Markets for nanodiagnostics	481
Markets for biochips/microarrays	481
Imaging agents	482
Pharmaceuticals.....	482
<i>Role of nanobiotechnology in drug delivery market.....</i>	<i>482</i>
Nanobiotechnology in life sciences research market.....	483
Markets according to technologies	483
Markets for nanomaterials.....	483
Markets for biomedical nanodevices	483
<i>Markets for nanosensors.....</i>	<i>484</i>
Markets for nanotools.....	484
Geographical distribution of markets.....	484
Nanobiotechnology in the US.....	485
Nanobiotechnology in the European Union	485
Nano2Life	487
European Technology Platform on NanoMedicine.....	487
Nanobiotechnology in Australia	488
Nanobiotechnology in Asia.....	488
Japan	488
South Korea	489
China	489
Taiwan	490
India	491
Nanobiotechnology in Russia.....	492
Nanobiotechnology in the developing world	492
Venture capital investment in nanotechnology	492
Big pharma and nanotechnology.....	493
Impact of nanobiotechnology on markets for current pharmaceuticals	493
Unmet needs in nanobiotechnology	494
Drivers for the development of nanobiotechnology markets.....	494
Strategies for developing markets for nanobiotechnology	495
Collaborations of industry with academic research centers	495
Collaborations of pharmaceutical and nanotechnology companies	495
Collaboration of chemical industry and the government	496

Cost-benefit of nanotechnology-based drug delivery.....	496
Education of healthcare professionals	496
Education of the public	496

21. References..... 499
