A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently he is a consultant at Jain PharmaBiotech. Prof. Jain's 470 publications include 28 books (5 as editor + 23 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. His recent books include "Role of Nanobiotechnology in Molecular Diagnostics" (2006), "Handbook of Nanomedicine" (Humana/Springer 2008; Chinese edition, Peking University Press 2011, 2nd ed Springer 2012, 3rd ed April 2017), "Textbook of Personalized Medicine (Springer 2009; Japanese ed 2012; 2nd ed Springer, 2015), "Handbook of Biomarkers" (Springer 2010; Chinese edition, Chemical Industry Press 2016, 2nd edition, 2017), Handbook of Neuroprotection (Springer 2011), "Applications of Biotechnology in Cardiovascular Therapeutics" (Springer 2011), "Applications of Biotechnology in Neurology" (Springer 2013), and "Applications of Biotechnology in Oncology" (Springer 2014). He has edited "Drug Delivery Systems", 2nd ed (Springer 2014) and "Applied Neurogenomics" (Springer 2015).

TABLE OF CONTENTS

| | |
|--|-----------|
| 0. EXECUTIVE SUMMARY..... | 23 |
| 1. Introduction | 25 |
| Basics of nanobiotechnology..... | 25 |
| European Union definition of nanomaterials..... | 26 |
| Nanoscale time and light | 27 |
| <i>Nanolasers.....</i> | 27 |
| Nanomedicine..... | 27 |
| Relation of nanobiotechnology to nanomedicine..... | 28 |
| Landmarks in the evolution of nanomedicine..... | 28 |
| Nanomedicine as a part of evolution of medicine..... | 29 |
| 2. Nanotechnologies | 31 |
| Introduction | 31 |
| Classification of nanobiotechnologies | 31 |
| Nanoparticles | 32 |
| <i>Gold nanoparticles</i> | 33 |
| <i>Cubosomes</i> | 34 |
| <i>Fluorescent nanoparticles.....</i> | 34 |
| <i>Fullerenes.....</i> | 34 |
| <i>Graphene.....</i> | 35 |
| <i>Magnetic nanoparticles</i> | 35 |
| <i>Nanoparticles assembly into micelles.....</i> | 36 |
| <i>Nanoshells</i> | 36 |
| <i>Plant-derived nanoparticles</i> | 36 |
| <i>Polymer nanoparticles</i> | 37 |
| <i>Porous silicon nanoparticles.....</i> | 37 |
| <i>Quantum dots</i> | 37 |
| <i>Synthetic high density lipoprotein nanoparticles.....</i> | 38 |
| <i>Hybrid nanoparticles.....</i> | 38 |
| Bacterial structures relevant to nanobiotechnology..... | 39 |
| <i>Nanostructures based on bacterial cell surface layers</i> | 39 |
| <i>Bacterial magnetic particles.....</i> | 39 |
| Carbon nanotubes..... | 40 |
| <i>Medical applications of nanotubes</i> | 40 |
| Dendrimers | 41 |
| <i>Properties</i> | 42 |
| <i>Applications.....</i> | 42 |
| DNA nanostructures | 43 |
| <i>Potential applications of DNA octahedron</i> | 43 |
| Nanowires..... | 44 |
| Nanopores | 44 |
| Nanoporous silica aerogel | 44 |
| Nanostructured silicon | 45 |
| Nanoparticle conjugates..... | 46 |
| <i>DNA-nanoparticle conjugates.....</i> | 46 |
| <i>Networks of gold nanoparticles and bacteriophage</i> | 46 |
| <i>Protein-nanoparticle combination</i> | 46 |
| Polymer nanofibers | 47 |
| Virus-like particles | 47 |
| Measurement of nanoparticle size and distribution | 47 |
| Nanomaterials for biolabeling..... | 48 |
| DNA Nanotags | 50 |
| Fluorescent lanthanide nanorods..... | 50 |
| Magnetic nanotags..... | 50 |
| Molecular computational identification | 51 |
| Nanophosphor labels | 51 |
| Organic nanoparticles as biolabels..... | 52 |
| Quantum dots as labels | 52 |
| SERS nanotags | 53 |
| Silica nanoparticles for labeling antibodies | 53 |
| Silver nanoparticle labels | 53 |
| Micro- and nano-electromechanical systems | 54 |
| BioMEMS..... | 54 |
| Microarrays and nanoarrays | 54 |
| Dip Pen Nanolithography for nanoarrays | 55 |
| <i>Applications of dip-pen nanolithography.....</i> | 56 |
| Protein nanoarrays..... | 56 |

| | |
|---|-----------|
| <i>Single-molecule protein arrays</i> | 57 |
| Microfluidics and nanofluidics | 57 |
| Nanotechnology on a chip | 58 |
| Microfluidic chips for nanoliter volumes | 58 |
| Use of nanotechnology in microfluidics | 59 |
| <i>2D nanofluidics</i> | 59 |
| <i>Construction of nanofluidic channels</i> | 59 |
| <i>Nanoscale flow visualization</i> | 60 |
| <i>Moving (levitation) of nanofluidic drops with physical forces</i> | 60 |
| <i>Electrochemical nanofluid injection</i> | 60 |
| <i>Nanofluidics on nanopatterned surfaces</i> | 61 |
| <i>Nano-interface in a microfluidic chip</i> | 61 |
| <i>Nanofluidic channels for study of DNA</i> | 61 |
| Visualization and manipulation on nanoscale | 62 |
| 3D single-molecule microscopy with nanoscale accuracy | 62 |
| 4Pi microscope | 62 |
| Atomic force microscopy | 62 |
| <i>AFM basics</i> | 62 |
| <i>Advantages of AFM</i> | 63 |
| <i>AFM as nanorobot</i> | 63 |
| <i>Force sensing Integrated Readout and Active Tip</i> | 63 |
| Cantilever technology | 64 |
| CytoViva® Microscope System | 65 |
| Fluorescence Resonance Energy Transfer | 65 |
| Fluorescence by Unbound Excitation from Luminescence | 66 |
| Magnetic resonance force microscopy and nanoscale MRI | 66 |
| Multiple single-molecule fluorescence microscopy | 67 |
| Near-field scanning optical microscopy | 67 |
| Nano-sized light source for single cell endoscopy | 67 |
| Nanoparticle characterization by Nanosight LM10 technology | 67 |
| Nanoscale scanning electron microscopy | 68 |
| <i>Use of SEM to reconstruct 3D tissue nanostructure</i> | 69 |
| Optical Imaging with a Silver Superlens | 69 |
| Partial wave spectroscopy | 69 |
| Photoactivated localization microscopy | 70 |
| Scanning probe microscopy | 70 |
| Single-molecule photon localization microscopy | 71 |
| STED microscopy | 71 |
| Super-resolution microscopy for in vivo cell imaging | 71 |
| <i>3D-SIM</i> | 72 |
| <i>Nanomicroscopy for live cell tomography</i> | 72 |
| <i>RESOLFT Nanoscopy</i> | 72 |
| Ultra-nanocrystalline diamond | 73 |
| Visualizing atoms with high-resolution transmission electron microscopy | 73 |
| Surface plasmon resonance | 74 |
| Nanotechnology and phototherapy | 74 |

3. Nanotechnologies for Basic Research Relevant to Medicine..... **76**

| | |
|--|-----------|
| Introduction | 76 |
| Nanotechnology and biology | 76 |
| NanoSystems Biology | 76 |
| Nanobiology and the cell | 77 |
| <i>Biosensing of cellular responses</i> | 78 |
| <i>Control of T cell signaling activity</i> | 78 |
| <i>Measuring mass of single cells</i> | 79 |
| <i>Nanostructures involved in endocytosis</i> | 79 |
| <i>Nanoparticles for in vivo study of cells</i> | 79 |
| <i>Nanotechnology-based live-cell single molecule assays</i> | 80 |
| <i>Quantum dots for stem cell labeling</i> | 80 |
| <i>Quantum dot/antibody conjugates for in vivo cytometric imaging</i> | 80 |
| <i>Quantum dots for study of apoptosis</i> | 80 |
| <i>Ribosome as a Brownian nanomachine</i> | 81 |
| <i>Single cell injection by nanolasers</i> | 81 |
| <i>Study of complex biological systems</i> | 81 |
| <i>Tissue-engineering for studying effects of nanoparticles on cells</i> | 82 |
| Molecular motors | 82 |
| <i>Nanomotor made of nucleic acids</i> | 84 |
| <i>phi29 DNA packaging nanomotor</i> | 84 |
| <i>Light-activated ion channel molecular machines</i> | 85 |
| Application of AFM for biomolecular imaging | 85 |
| <i>Future insights into biomolecular processes by AFM</i> | 86 |

| | |
|---|------------|
| 4Pi microscopy to study DNA double-strand breaks | 86 |
| Nanoscale DNA imaging | 87 |
| Multi-isotope imaging mass spectrometry | 87 |
| Applications of biomolecular computing in life sciences | 87 |
| Bacteria for construction of nanomachines | 88 |
| Natural nanocomposites..... | 88 |
| Nanotechnology in biological research | 89 |
| <i>QDs for biological research</i> | 89 |
| Molecular biology and nanotechnology | 90 |
| <i>Structural DNA nanotechnology</i> | 90 |
| <i>RNA nanotechnology</i> | 91 |
| <i>Genetically engineered proteins for nanobiotechnology</i> | 92 |
| Single molecule studies | 93 |
| <i>3D single-molecular imaging by coherent X-ray diffraction imaging</i> | 93 |
| <i>Nanoscale NMR for imaging single molecules</i> | 93 |
| <i>Optical trapping and single-molecule fluorescence</i> | 93 |
| <i>Study of molecular assembly of single molecules in living cells</i> | 94 |
| Nanochemistry | 94 |
| Nanoscale pH Meter | 95 |
| Nanolaser applications in life sciences | 95 |
| Nanoelectroporation | 95 |
| Nanomanipulation | 96 |
| Nanomanipulation by combination of AFM and other devices | 96 |
| <i>Surgery on living cells using AFM with nanoneedles</i> | 97 |
| Optoelectronic tweezers..... | 97 |
| Optical manipulation of nanoparticles | 98 |
| Manipulation of DNA sequence by use of nanoparticles as laser light antennas..... | 98 |
| Nanomanipulation of single molecule..... | 99 |
| Fluorescence-force spectroscopy..... | 99 |
| Nanomanipulation for study of mechanism of anticancer drugs | 99 |
| Nanotechnology in genomic research | 100 |
| Nanotechnology for separation of DNA fragments | 100 |
| Nanotechnology-based DNA sequencing..... | 100 |
| Role of nanobiotechnology in identifying single nucleotide polymorphisms..... | 102 |
| Nanobiotechnology for study of mitochondria | 102 |
| Nanomaterials for the study of mitochondria | 102 |
| Study of mitochondria with nanolaser spectroscopy..... | 103 |
| Nanoproteomics | 103 |
| Biochips for nanoscale proteomics..... | 103 |
| <i>Protein biochips based on fluorescence planar wave guide technology</i> | 103 |
| <i>Nanofilter array chip</i> | 104 |
| Dynamic reassembly of peptides..... | 104 |
| High-field asymmetric waveform ion mobility mass spectrometry..... | 104 |
| Manipulation of redox systems by nanotechnology | 105 |
| Multi Photon Detection..... | 105 |
| Nanoflow liquid chromatography | 105 |
| Nanoparticle-protein interactions | 106 |
| Nanopore-based protein sequencing | 106 |
| Nanopores for phosphoprotein analysis..... | 106 |
| Nanoproteomics for study of misfolded proteins..... | 106 |
| Nanotube electronic biosensor for proteomics | 107 |
| Protein nanocrystallography | 107 |
| Protein engineering on nanoscale..... | 107 |
| <i>Nanowires for protein engineering</i> | 107 |
| <i>A nanoscale mechanism for protein engineering</i> | 108 |
| <i>Role of nanoparticles in self-assembly of proteins</i> | 108 |
| <i>Role of nanotechnology in peptide engineering</i> | 108 |
| QD-protein nanoassembly | 109 |
| Single cell nanoprobe for studying gene expression of individual cells..... | 109 |
| Study of proteins by atomic force microscopy | 109 |
| Study of proteomics at single molecule level | 110 |
| <i>Assays for protein expression at the single molecule level</i> | 110 |
| <i>Imaging proteins at the single-molecule level</i> | 110 |
| <i>Mass spectrometry of single-molecules using nanotechnology</i> | 110 |
| <i>Study of protein synthesis and single-molecule processes</i> | 111 |
| Role of nanotechnology in study of membrane proteins | 112 |
| <i>Nanoparticles for study of membrane proteins</i> | 112 |
| <i>Study of single protein interaction with cell membrane</i> | 112 |
| <i>Quantum dots to label cell surface proteins</i> | 113 |
| <i>Study of single membrane proteins at subnanometer resolution</i> | 113 |
| Self-assembling peptide scaffold technology for 3D cell culture | 113 |

| | |
|--|------------|
| Nanobiotechnology and ion channels | 114 |
| AFM for characterization of ion channels | 114 |
| Aquaporin water channels | 114 |
| Nanopatch™ for study of ion channels at single molecule level | 115 |
| Remote control of ion channels through magnetic-field heating of nanoparticles | 115 |
| Role of nanobiotechnology in engineering ion channels | 115 |
| Nanobiotechnology for single cell analysis | 116 |
| Nanotechnology and bioinformatics | 117 |
| 3D nano-map of synapse | 117 |
| 4. Nanomolecular Diagnostics | 119 |
| Introduction | 119 |
| Nanodiagnosics | 119 |
| Rationale of nanotechnology for molecular diagnostics..... | 121 |
| Nanoarrays for molecular diagnostics | 121 |
| Fullerene photodetectors for chemiluminescence detection on microfluidic chip..... | 121 |
| Microfluidics and nanotech tools for single cell analysis..... | 121 |
| Nanofluidic/nanoarray devices to detect a single molecule of DNA..... | 122 |
| Protein nanoarrays..... | 123 |
| Protein nanobiochip..... | 123 |
| Silver nanorod array for on-chip detection of microbes and chemicals | 123 |
| AFM for molecular diagnostics | 124 |
| Nanofountain AFM probe | 124 |
| AFM for immobilization of biomolecules in high-density microarrays | 124 |
| AFM for nanodissection of chromosomes | 124 |
| Nanoparticles for molecular diagnostics | 125 |
| 3DNA® Dendrimers for diagnostics | 125 |
| Carbon nanotubes..... | 125 |
| Exosome-based molecular diagnostics | 126 |
| Gold nanoparticles | 126 |
| Quantum dots for molecular diagnostics | 126 |
| <i>QDs for detection of pathogenic microorganisms</i> | 127 |
| <i>Bioconjugated QDs for multiplexed profiling of biomarkers</i> | 127 |
| <i>Imaging of living tissue with QDs</i> | 127 |
| Use of nanocrystals in immunohistochemistry..... | 128 |
| Magnetic nanoparticles | 129 |
| <i>Magnetic nanoparticles for bioscreening</i> | 129 |
| <i>Monitoring of implanted NSCs labeled with nanoparticles</i> | 129 |
| <i>Perfluorocarbon nanoparticles to track therapeutic cells in vivo</i> | 129 |
| <i>Superparamagnetic nanoparticles for cell tracking</i> | 130 |
| <i>SPIONS for real-time tracking of viral delivery</i> | 130 |
| <i>SPIONS for calcium sensing</i> | 130 |
| <i>Magnetic nanoparticles for labeling molecules</i> | 131 |
| <i>Study of living cells by SPIONS</i> | 131 |
| Imaging applications of nanoparticles | 131 |
| <i>CT image enhancement by nanoparticles</i> | 132 |
| <i>Dendritic nanoprobe for imaging of angiogenesis</i> | 132 |
| <i>Functionalized MWCNTs as ultrasound contrast agents</i> | 132 |
| Nanoparticles as contrast-enhancing agents for MRI..... | 133 |
| <i>Gadolinium-loaded dendrimer nanoparticles for tumor-specific MRI</i> | 133 |
| <i>Gadonanotubes for MRI</i> | 133 |
| <i>Gold nanorods and nanoparticles as imaging agents</i> | 133 |
| <i>In vivo imaging using nanoparticles</i> | 134 |
| <i>Manganese oxide nanoparticles as contrast agent for brain MRI</i> | 134 |
| <i>Magnetic nanoparticles as contrast agents for MRI of pancreas</i> | 134 |
| <i>Nanoparticles as contrast agent for MRI</i> | 135 |
| <i>Optical molecular imaging using targeted magnetic nanoprobe</i> | 135 |
| <i>QDs for biological imaging</i> | 136 |
| <i>SPIONS combined with MRI</i> | 136 |
| <i>Concluding remarks and prospects of nanoparticles for imaging</i> | 137 |
| Applications of nanopore technology for molecular diagnostics | 137 |
| Nanopore technology for detection of single DNA molecules | 137 |
| Nanocytometry | 138 |
| DNA-protein and -nanoparticle conjugates | 138 |
| Resonance Light Scattering technology | 138 |
| Nanobarcodes technology | 139 |
| Nanobarcode particle technology for SNP genotyping | 140 |
| QD nanobarcode for multiplexed gene expression profiling | 140 |
| Biobarcode assay for proteins..... | 140 |
| Single-molecule barcoding system for DNA analysis | 142 |
| Nanoparticle-based colorimetric DNA detection method | 142 |

| | |
|--|------------|
| Nanoparticle-based up-converting phosphor technology | 143 |
| Surface-Enhanced Resonant Raman Spectroscopy..... | 143 |
| Near-infrared (NIR)-emissive polymersomes | 144 |
| Nanobiotechnology for detection of proteins | 144 |
| Captamers with proximity extension assay for proteins..... | 144 |
| Immunoliposome-PCR | 145 |
| Nanobiosensors | 145 |
| Cantilevers as biosensors for molecular diagnostics..... | 146 |
| <i>Advantages of cantilever technology for molecular recognition.....</i> | <i>147</i> |
| <i>Antibody-coated nanocantilevers for detection of microorganisms</i> | <i>147</i> |
| Carbon nanotube biosensors | 148 |
| <i>Carbon nanotube sensors coated with ssDNA and electronic readout</i> | <i>148</i> |
| <i>Carbon nanotubes sensors wrapped with DNA and optical detection</i> | <i>148</i> |
| FRET-based DNA nanosensor..... | 149 |
| Graphene biosensor based on Raman spectroscopy | 149 |
| Ion channel switch biosensor technology..... | 150 |
| Electrochemical nanobiosensor | 150 |
| Electronic nanobiosensors | 150 |
| Metallic nanobiosensors | 151 |
| Nanomaterial-based sensors for diagnosis from exhaled breath | 151 |
| Quartz nanobalance biosensor | 151 |
| Viral nanosensor | 152 |
| PEBBLE nanosensors | 152 |
| Detection of cocaine molecules by nanoparticle-labeled aptasensors..... | 152 |
| Nanosensors for glucose monitoring | 153 |
| Nanobiosensors for protein detection..... | 153 |
| Optical biosensors..... | 153 |
| <i>Laser nanosensors</i> | <i>154</i> |
| <i>Interferometric reflectance imaging sensors</i> | <i>154</i> |
| <i>Nanoshell biosensors.....</i> | <i>154</i> |
| <i>Plasmonics and SERS nanoprobes</i> | <i>155</i> |
| <i>Optical mRNA biosensors</i> | <i>155</i> |
| <i>Surface Enhanced Microoptical Fluidic Systems.....</i> | <i>156</i> |
| <i>Nanoparticle-enhanced sensitivity of fluorescence-based biosensors.....</i> | <i>157</i> |
| Nanowire biosensors | 157 |
| <i>Nanowire biosensors for detection of cancer biomarkers</i> | <i>158</i> |
| <i>Nanowire biosensors for detection of single viruses</i> | <i>158</i> |
| <i>Nanowires for detection of genetic disorders.....</i> | <i>159</i> |
| <i>Nanowires biosensor for detecting biowarfare agents.....</i> | <i>159</i> |
| <i>Concluding remarks and prospects of nanowire biosensors.....</i> | <i>159</i> |
| Future issues in the development of nanobiosensors | 159 |
| Applications of nanodiagnosics..... | 160 |
| Nanotechnology for detection of biomarkers..... | 160 |
| Nanotechnology for genotyping of single-nucleotide polymorphisms | 161 |
| <i>Nanoparticles for detecting SNPs.....</i> | <i>161</i> |
| <i>Nanopores for detecting SNPs.....</i> | <i>161</i> |
| Nanobiotechnologies for single molecule detection | 161 |
| Protease-activated QD probes | 162 |
| Labeling of MSCs with QDs..... | 163 |
| Nanotechnology for point-of-care diagnostics | 163 |
| <i>Nanotechnology-based biochips for POC diagnosis</i> | <i>163</i> |
| <i>Carbon nanotube transistors for genetic screening</i> | <i>164</i> |
| <i>POC monitoring of vital signs with nanobiosensors</i> | <i>164</i> |
| <i>Nanodiagnosics for the battle field and biodefense</i> | <i>164</i> |
| Nanodiagnosics for integrating diagnostics with therapeutics..... | 165 |
| Concluding remarks about nanodiagnosics..... | 166 |
| Clinical trials of nanodiagnosics | 166 |
| Future of nanodiagnosics | 167 |
| 5. Nanopharmaceuticals | 168 |
| Introduction | 168 |
| Nanobiotechnology for drug discovery | 168 |
