A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently he is a consultant at Jain PharmaBiotech. Prof. Jain's 476 publications include 30 books (6 as editor + 24 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. His recent books include "Role of Nanobiotechnology in Molecular Diagnostics" (2006), "Handbook of Nanomedicine" (Humana/Springer 2008; Chinese edition, Peking University Press 2011, 2nd ed Springer 2012, 3rd ed April 2017), "Textbook of Personalized Medicine (Springer 2009; Japanese ed 2012; 2nd ed Springer, 2015), "Handbook of Biomarkers" (Springer 2010; Chinese edition, Chemical Industry Press 2016, 2nd edition, 2017), Handbook of Neuroprotection (Springer 2011), "Applications of Biotechnology in Cardiovascular Therapeutics" (Springer 2011), "Applications of Biotechnology in Neurology" (Springer 2013), and "Applications of Biotechnology in Oncology" (Springer 2014). He has edited "Drug Delivery Systems", 2nd ed (Springer 2014) and "Applied Neurogenomics" (Springer 2015).

TABLE OF CONTENTS

0. EXECUTIVE SUMMARY.....	23
1. Introduction	25
Basics of nanobiotechnology.....	25
European Union definition of nanomaterials.....	26
Nanoscale time and light	27
<i>Nanotime.....</i>	27
<i>Nanolasers.....</i>	27
Nanomedicine.....	27
Relation of nanobiotechnology to nanomedicine.....	28
Landmarks in the evolution of nanomedicine.....	28
Nanomedicine as a part of evolution of medicine.....	29
2. Nanotechnologies	31
Introduction	31
Classification of nanobiotechnologies	31
Nanoparticles	32
<i>Gold nanoparticles</i>	33
<i>Cubosomes</i>	34
<i>Fluorescent nanoparticles.....</i>	34
<i>Fullerenes.....</i>	34
<i>Graphene.....</i>	35
<i>Magnetic nanoparticles</i>	35
<i>Nanoparticles assembly into micelles.....</i>	36
<i>Nanoshells</i>	36
<i>Plant-derived nanoparticles</i>	36
<i>Polymer nanoparticles</i>	37
<i>Porous silicon nanoparticles.....</i>	37
<i>Quantum dots</i>	37
<i>Synthetic high density lipoprotein nanoparticles.....</i>	38
<i>Hybrid nanoparticles.....</i>	39
Bacterial structures relevant to nanobiotechnology.....	39
<i>Nanostructures based on bacterial cell surface layers</i>	39
<i>Bacterial magnetic particles.....</i>	39
Carbon nanotubes.....	40
<i>Medical applications of nanotubes</i>	40
Dendrimers	41
<i>Properties</i>	42
<i>Applications.....</i>	42
DNA nanostructures	43
<i>DNA origami.....</i>	43
<i>Bacteriophages for mass production of DNA origami.....</i>	43
<i>Fractal assembly.....</i>	44
<i>Gigadalton-scale structures.....</i>	44
<i>Nanobricks.....</i>	44
<i>Advantages of DNA nanostructure.....</i>	45
<i>Potential applications of DNA octahedron</i>	45
Nanowires.....	45
Nanopores	46
<i>Nanoporous silica aerogel</i>	46
<i>Nanostructured silicon</i>	47
Nanoparticle conjugates.....	47
<i>DNA-nanoparticle conjugates.....</i>	47
<i>Networks of gold nanoparticles and bacteriophage</i>	48
<i>Protein-nanoparticle combination</i>	48
Polymer nanofibers	48
Virus-like particles	49
Measurement of nanoparticle size and distribution	49
Nanomaterials for biolabeling.....	50
DNA Nanotags	52
Fluorescent lanthanide nanorods.....	52
Magnetic nanotags	52
Molecular computational identification	52
Nanophosphor labels	53
Organic nanoparticles as biolabels.....	54
Quantum dots as labels	54
SERS nanotags	54
Silica nanoparticles for labeling antibodies	55

Silver nanoparticle labels	55
Micro- and nano-electromechanical systems	55
BioMEMS.....	56
Microarrays and nanoarrays	56
Dip Pen Nanolithography for nanoarrays	57
<i>Applications of dip-pen nanolithography</i>	58
Protein nanoarrays.....	58
<i>Single-molecule protein arrays</i>	58
Microfluidics and nanofluidics.....	59
Nanotechnology on a chip	59
Microfluidic chips for nanoliter volumes.....	60
Use of nanotechnology in microfluidics	60
2D nanofluidics.....	60
<i>Construction of nanofluidic channels</i>	61
<i>Nanoscale flow visualization</i>	61
<i>Moving (levitation) of nanofluidic drops with physical forces</i>	62
<i>Electrochemical nanofluid injection</i>	62
<i>Nanofluidics on nanopatterned surfaces</i>	62
<i>Nano-interface in a microfluidic chip</i>	63
<i>Nanofluidic channels for study of DNA</i>	63
Visualization and manipulation on nanoscale	63
3D single-molecule microscopy with nanoscale accuracy	63
4Pi microscope	64
Atomic force microscopy	64
<i>AFM basics</i>	64
<i>Advantages of AFM</i>	64
<i>AFM as nanorobot</i>	65
<i>Force sensing Integrated Readout and Active Tip</i>	65
AFM infrared spectroscopy	65
Cantilever technology	66
CytoViva® Microscope System	67
Fluorescence Resonance Energy Transfer.....	67
Fluorescence by Unbound Excitation from Luminescence.....	68
Magnetic resonance force microscopy and nanoscale MRI.....	68
Multiple single-molecule fluorescence microscopy	68
Near-field scanning optical microscopy	69
Nano-sized light source for single cell endoscopy	69
Nanoparticle characterization by Nanosight LM10 technology.....	69
Nanoscale scanning electron microscopy.....	70
<i>Use of SEM to reconstruct 3D tissue nanostructure</i>	71
Optical Imaging with a Silver Superlens.....	71
Partial wave spectroscopy	71
Photoactivated localization microscopy	72
Scanning probe microscopy.....	72
Single-molecule photon localization microscopy.....	73
STED microscopy.....	73
Super-resolution microscopy for in vivo cell imaging	73
3D-SIM.....	74
<i>Nanomicroscopy for live cell tomography</i>	74
RESOLFT Nanoscopy.....	74
Ultra-nanocrystalline diamond	75
Visualizing atoms with high-resolution transmission electron microscopy	75
Surface plasmon resonance	75
Nanotechnology and phototherapy	76

3. Nanotechnologies for Basic Research Relevant to Medicine..... 79

Introduction	79
Nanotechnology and biology.....	79
NanoSystems Biology	79
Nanobiology and the cell.....	80
<i>Biosensing of cellular responses</i>	81
<i>Control of T cell signaling activity</i>	81
<i>Measuring mass of single cells</i>	82
<i>Nanostructures involved in endocytosis</i>	82
<i>Nanoparticles for in vivo study of cells</i>	82
<i>Nanotechnology-based live-cell single molecule assays</i>	83
<i>Quantum dots for stem cell labeling</i>	83
<i>Quantum dot/antibody conjugates for in vivo cytometric imaging</i>	83
<i>Quantum dots for study of apoptosis</i>	83
<i>Ribosome as a Brownian nanomachine</i>	84
<i>Single cell injection by nanolasers</i>	84

<i>Study of complex biological systems</i>	84
<i>Tissue-engineering for studying effects of nanoparticles on cells</i>	85
Molecular motors	85
<i>Nanomotor made of nucleic acids</i>	87
<i>phi29 DNA packaging nanomotor</i>	87
<i>Light-activated ion channel molecular machines</i>	88
Application of AFM for biomolecular imaging	88
<i>Future insights into biomolecular processes by AFM</i>	89
4Pi microscopy to study DNA double-strand breaks	89
Nanoscale DNA imaging	90
Multi-isotope imaging mass spectrometry	90
Applications of biomolecular computing in life sciences	90
Bacteria for construction of nanomachines	91
Natural nanocomposites.....	91
Nanotechnology in biological research	92
<i>QDs for biological research</i>	92
Molecular biology and nanotechnology.....	93
<i>Structural DNA nanotechnology</i>	93
<i>RNA nanotechnology</i>	94
<i>Genetically engineered proteins for nanobiotechnology</i>	95
Single molecule studies	96
<i>3D single-molecular imaging by coherent X-ray diffraction imaging</i>	96
<i>Nanoscale NMR for imaging single molecules</i>	96
<i>Optical trapping and single-molecule fluorescence</i>	96
<i>Study of molecular assembly of single molecules in living cells</i>	97
Nanochemistry	97
Nanoscale pH Meter	98
Nanolaser applications in life sciences	98
Nanoelectroporation	98
Nanomanipulation	99
Atomic force microscopy	99
DNA nanomanipulation	99
Fluorescence-force spectroscopy.....	100
Nanomanipulation by combination of AFM and other devices	100
<i>Surgery on living cells using AFM with nanoneedles</i>	101
Manipulation of DNA sequence by use of nanoparticles as laser light antennas.....	101
Nanomanipulation of single molecule.....	101
Nanomanipulation for study of mechanism of anticancer drugs	102
Optoelectronic tweezers.....	102
Optical manipulation of nanoparticles	103
Nanotechnology in genomic research	103
Nanotechnology for separation of DNA fragments	103
Nanotechnology-based DNA sequencing.....	103
Role of nanobiotechnology in identifying single nucleotide polymorphisms.....	105
Nanobiotechnology for study of mitochondria	105
Nanomaterials for the study of mitochondria	105
Study of mitochondria with nanolaser spectroscopy.....	106
Nanoproteomics	106
Biochips for nanoscale proteomics.....	106
<i>Protein biochips based on fluorescence planar wave guide technology</i>	106
<i>Nanofilter array chip</i>	107
Dynamic reassembly of peptides.....	107
High-field asymmetric waveform ion mobility mass spectrometry.....	107
Manipulation of redox systems by nanotechnology	108
Multi Photon Detection.....	108
Nanoflow liquid chromatography	108
Nanoparticle-protein interactions	109
Nanopore-based protein sequencing.....	109
Nanopores for phosphoprotein analysis.....	109
Nanoproteomics for study of misfolded proteins.....	109
Nanotube electronic biosensor for proteomics.....	110
Protein nanocrystallography	110
Protein engineering on nanoscale.....	111
<i>Nanowires for protein engineering</i>	111
<i>A nanoscale mechanism for protein engineering</i>	111
<i>Role of nanoparticles in self-assembly of proteins</i>	111
<i>Role of nanotechnology in peptide engineering</i>	112
QD-protein nanoassembly	112
Single cell nanoprobe for studying gene expression of individual cells.....	112
<i>Single cell nanoproteomics</i>	112
Study of proteins by atomic force microscopy	113

Study of proteomics at single molecule level	113
<i>Assays for protein expression at the single molecule level</i>	113
<i>Imaging proteins at the single-molecule level</i>	114
<i>Mass spectrometry of single-molecules using nanotechnology</i>	114
<i>Study of protein synthesis and single-molecule processes</i>	115
Role of nanotechnology in study of membrane proteins	116
<i>Nanoparticles for study of membrane proteins</i>	116
<i>Study of single protein interaction with cell membrane</i>	116
<i>Quantum dots to label cell surface proteins</i>	116
<i>Study of single membrane proteins at subnanometer resolution</i>	117
Self-assembling peptide scaffold technology for 3D cell culture	117
Nanobiotechnology and ion channels	117
AFM for characterization of ion channels	118
Aquaporin water channels	118
Nanopatch™ for study of ion channels at single molecule level	118
Remote control of ion channels through magnetic-field heating of nanoparticles	119
Role of nanobiotechnology in engineering ion channels	119
Nanobiotechnology for single cell analysis	120
Nanotechnology and bioinformatics	120
3D nano-map of synapse	121

4. Nanomolecular Diagnostics	122
Introduction	122
Nanodiagnosics	122
Rationale of nanotechnology for molecular diagnostics	124
Nanoarrays for molecular diagnostics	124
Fullerene photodetectors for chemiluminescence detection on microfluidic chip	124
Microfluidics and nanotech tools for single cell analysis	124
Nanofluidic/nanoarray devices to detect a single molecule of DNA	125
Protein nanoarrays	126
Protein nanobiochip	126
Silver nanorod array for on-chip detection of microbes and chemicals	126
AFM for molecular diagnostics	127
Nanofountain AFM probe	127
AFM for immobilization of biomolecules in high-density microarrays	127
AFM for nanodissection of chromosomes	127
Nanoparticles for molecular diagnostics	128
3DNA® Dendrimers for diagnostics	128
Carbon nanotubes	128
Exosome-based molecular diagnostics	129
Gold nanoparticles	129
Quantum dots for molecular diagnostics	129
<i>QDs for detection of pathogenic microorganisms</i>	130
<i>Bioconjugated QDs for multiplexed profiling of biomarkers</i>	130
<i>Imaging of living tissue with QDs</i>	130
Use of nanocrystals in immunohistochemistry	131
Magnetic nanoparticles	131
<i>Magnetic nanoparticles for bioscreening</i>	131
<i>Monitoring of implanted NSCs labeled with nanoparticles</i>	132
<i>Perfluorocarbon nanoparticles to track therapeutic cells in vivo</i>	132
<i>Superparamagnetic nanoparticles for cell tracking</i>	133
<i>SPIOs for real-time tracking of viral delivery</i>	133
<i>SPIOs for calcium sensing</i>	133
<i>Magnetic nanoparticles for labeling molecules</i>	134
<i>Study of living cells by SPIOs</i>	134
Imaging applications of nanoparticles	134
<i>CT image enhancement by nanoparticles</i>	134
<i>Dendritic nanoprobes for imaging of angiogenesis</i>	135
<i>Functionalized MWCNTs as ultrasound contrast agents</i>	135
Nanoparticles as contrast-enhancing agents for MRI	136
<i>Gadolinium-loaded dendrimer nanoparticles for tumor-specific MRI</i>	136
<i>Gadonanotubes for MRI</i>	136
<i>Gold nanorods and nanoparticles as imaging agents</i>	136
<i>In vivo imaging using nanoparticles</i>	137
<i>Manganese oxide nanoparticles as contrast agent for brain MRI</i>	137
<i>Magnetic nanoparticles as contrast agents for MRI of pancreas</i>	137
<i>Nanoparticles as contrast agent for MRI</i>	138
<i>Optical molecular imaging using targeted magnetic nanoprobes</i>	138
<i>QDs for biological imaging</i>	139
<i>SPIOs combined with MRI</i>	139
<i>Concluding remarks and prospects of nanoparticles for imaging</i>	140

Applications of nanopore technology for molecular diagnostics.....	140
Nanopore technology for detection of single DNA molecules	140
Nanocytometry	140
DNA-protein and -nanoparticle conjugates	141
Resonance Light Scattering technology	141
Nanobarcodes technology.....	142
Nanobarcode particle technology for SNP genotyping	142
QD nanobarcode for multiplexed gene expression profiling	143
Biobarcode assay for proteins.....	143
Single-molecule barcoding system for DNA analysis	145
Nanoparticle-based colorimetric DNA detection method.....	145
Nanoparticle-based up-converting phosphor technology	146
Surface-Enhanced Resonant Raman Spectroscopy.....	146
Near-infrared (NIR)-emissive polymersomes	147
Nanobiotechnology for detection of proteins	147
Captamers with proximity extension assay for proteins.....	147
Immunoliposome-PCR	148
Nanobiosensors	148
Cantilevers as biosensors for molecular diagnostics	148
<i>Advantages of cantilever technology for molecular recognition.....</i>	<i>149</i>
<i>Antibody-coated nanocantilevers for detection of microorganisms</i>	<i>150</i>
Carbon nanotube biosensors	151
<i>Carbon nanotube sensors coated with ssDNA and electronic readout</i>	<i>151</i>
<i>Carbon nanotubes sensors wrapped with DNA and optical detection</i>	<i>151</i>
FRET-based DNA nanosensor.....	152
Graphene biosensor based on Raman spectroscopy	152
Ion channel switch biosensor technology.....	152
Electrochemical nanobiosensor	153
Electronic nanobiosensors	153
Metallic nanobiosensors	154
Nanomaterial-based sensors for diagnosis from exhaled breath	154
Quartz nanobalance biosensor	154
Viral nanosensor	154
PEBBLE nanosensors	155
Detection of cocaine molecules by nanoparticle-labeled aptasensors.....	155
Nanosensors for glucose monitoring	155
Nanobiosensors for protein detection.....	156
Optical biosensors.....	156
<i>Laser nanosensors</i>	<i>157</i>
<i>Interferometric reflectance imaging sensors</i>	<i>157</i>
<i>Nanoshell biosensors.....</i>	<i>157</i>
<i>Plasmonics and SERS nanoprobe.....</i>	<i>158</i>
<i>Optical mRNA biosensors</i>	<i>158</i>
<i>Surface Enhanced Microoptical Fluidic Systems</i>	<i>159</i>
<i>Nanoparticle-enhanced sensitivity of fluorescence-based biosensors.....</i>	<i>160</i>
Nanowire biosensors	160
<i>Nanowire biosensors for detection of cancer biomarkers</i>	<i>161</i>
<i>Nanowire biosensors for detection of single viruses</i>	<i>161</i>
<i>Nanowires for detection of genetic disorders.....</i>	<i>162</i>
<i>Nanowires biosensor for detecting biowarfare agents.....</i>	<i>162</i>
<i>Concluding remarks and prospects of nanowire biosensors.....</i>	<i>162</i>
Future issues in the development of nanobiosensors	162
Applications of nanodiagnosics.....	163
Nanotechnology for detection of biomarkers	163
Nanotechnology for genotyping of single-nucleotide polymorphisms	164
<i>Nanoparticles for detecting SNPs.....</i>	<i>164</i>
<i>Nanopores for detecting SNPs.....</i>	<i>164</i>
Nanobiotechnologies for single molecule detection	164
Protease-activated QD probes	165
Labeling of MSCs with QDs.....	166
Nanotechnology for point-of-care diagnostics	166
<i>Nanoswitch-linked immunosorbent assay.....</i>	<i>166</i>
<i>Nanotechnology-based biochips for POC diagnosis</i>	<i>167</i>
<i>Carbon nanotube transistors for genetic screening</i>	<i>167</i>
<i>POC monitoring of vital signs with nanobiosensors</i>	<i>168</i>
<i>Nanodiagnosics for the battle field and biodefense</i>	<i>168</i>
<i>NANOANTENNA project of European Commission</i>	<i>169</i>
Nanodiagnosics for integrating diagnostics with therapeutics	169
Concluding remarks about nanodiagnosics.....	169
Clinical trials of nanodiagnosics	170
Future of nanodiagnosics	170

5. Nanopharmaceuticals	172
Introduction	172
Nanobiotechnology for drug discovery	172
Nanofluidic devices for drug discovery	173
Gold nanoparticles for drug discovery	174
<i>Tracking drug molecules in cells.....</i>	<i>174</i>
<i>SPR with colloidal gold particles.....</i>	<i>174</i>
Use of QDs for drug discovery	174
<i>Advantages of the use of QDs for drug discovery</i>	<i>174</i>
<i>Drawbacks of the use of QDs for drug discovery</i>	<i>175</i>
<i>QDs for imaging drug receptors in the brain</i>	<i>176</i>
Lipoparticles for drug discovery	176
<i>Biosensor for drug discovery with Lipoparticles.....</i>	<i>176</i>
Magnetic nanoparticles assays.....	177
Analysis of small molecule-protein interactions by nanowire biosensors	177
Cells targeting by nanoparticles with attached small molecules	177
Role of AFM for study of biomolecular interactions for drug discovery	178
Nanoscale devices for drug discovery	178
<i>Laboratories-on-a-chip</i>	<i>178</i>
<i>Lab-on-Bead</i>	<i>178</i>
<i>Nanotechnology for drug design at cellular level</i>	<i>179</i>
Role of nanobiotechnology in the future of drug discovery.....	179
Nanobiotechnology-based drug development	179
Dendrimers as drugs	179
Fullerenes as drug candidates.....	180
Nanobodies	181
<i>RANbodies</i>	<i>182</i>
<i>Companies involved in nanobodies.....</i>	<i>183</i>
Preclinical studies of nanoparticles in animals and humans	183
Manufacture of nanomedicines	184
Role of nanobiotechnology in microbial biofabrication	184
Nanobiotechnology in drug delivery	184
Ideal properties of material for drug delivery	184
Improved absorption of drugs in nanoparticulate form	185
Interaction of nanoparticles with human blood.....	185
Nanoscale devices delivery of therapeutics	185
Nanobiotechnology solutions to the problems of drug delivery	185
Nanocomposites for protein delivery.....	186
Nanocomposite membranes for magnetically triggered drug delivery	186
Nanosuspension formulations	187
Nanotechnology-based refilling of drug delivery depots through circulation	187
Self-assembled nanostructures with hydrogels for drug delivery	188
Nanomaterials and nanobiotechnologies used for drug delivery	188
Viruses as nanomaterials for drug delivery.....	189
Bacteria-mediated delivery of nanoparticles and drugs into cells	189
Bacterial viral membranes.....	190
Cell-penetrating peptides	191
Nanoparticle-based drug delivery	191
Cationic nanoparticles.....	192
Ceramic nanoparticles	192
Cyclodextrin nanoparticles for drug delivery	192
Dendrimers for drug delivery.....	193
<i>DNA-assembled dendrimers for drug delivery</i>	<i>193</i>
DNA tetrahedron-based drug delivery system.....	194
Exosomes for drug delivery	194
Fullerenes for drug delivery.....	195
<i>Amphiphilic fullerene derivatives.....</i>	<i>195</i>
<i>Fullerene conjugates for intracellular delivery of peptides.....</i>	<i>195</i>
Gold nanoparticles as drug carriers	195
Layered double hydroxide nanoparticles	196
Micelles for drug delivery	196
Nanocrystals	197
<i>Nanocrystalline silver</i>	<i>197</i>
<i>Elan's NanoCrystal technology</i>	<i>197</i>
<i>Biorise system.....</i>	<i>198</i>
Nanodiamonds.....	199
Polymer nanoparticles	199
<i>Biodegradable PEG nanoparticles for penetrating the mucus barrier</i>	<i>200</i>
<i>PLGA-based nanodelivery technologies</i>	<i>200</i>
<i>Polymeric micelles.....</i>	<i>200</i>
<i>Chitosan nanoparticles.....</i>	<i>201</i>

QDs for drug delivery	202
Special procedures in nanoparticle-based drug delivery	202
<i>Coated nanoparticles for penetrating cell membranes without damage</i>	202
<i>Combinatorial synthesis of nanoparticles for intracellular delivery</i>	202
<i>Drug delivery using "Particle Replication in Nonwetting Templates"</i>	202
<i>Encapsulating water-insoluble drugs in nanoparticles</i>	203
<i>Filomicelles vs spherical nanoparticles for drug delivery</i>	203
<i>Flash NanoPrecipitation</i>	204
<i>Magnetic nanoparticles for drug delivery</i>	204
<i>Nanoparticles bound together in spherical shapes</i>	205
<i>Perfluorocarbon nanoparticles for imaging and targeted drug-delivery</i>	205
<i>Prolonging circulation of nanoparticles by attachment to RBCs</i>	206
<i>Self-assembling nanoparticles for intracellular drug delivery</i>	206
<i>Trojan nanoparticles</i>	207
<i>Therapeutic protein delivery from nanoparticle-protein complexes</i>	207
<i>Triggered release of drugs from nanoparticles</i>	207
Liposomes	208
Basics of liposomes	208
Stabilization of phospholipid liposomes using nanoparticles	208
Lipid nanoparticles	209
<i>Advantages of the lipid nanoparticle technology</i>	209
<i>Applications of lipid nanoparticles</i>	210
<i>Arsonoliposomes</i>	210
<i>Lipid nanocapsules</i>	211
<i>Lipid emulsions with nanoparticles</i>	211
<i>Polymerized liposomal nanoparticle</i>	212
<i>Solid lipid nanoparticles</i>	212
Nanostructured organogels	212
Niosomes.....	213
Limitations of liposomes for drug delivery	213
Liposomes incorporating fullerenes.....	213
Liposome-nanoparticle hybrids	213
Nanogels	214
Nanogel-liposome combination	214
Nanospheres	214
Nanotubes	215
Carbon nanotubes for drug delivery	215
CNT-liposome conjugates for drug delivery into cells	215
Lipid-protein nanotubes for drug delivery	216
Halloysite nanotubes for drug delivery	216
Nanochleates	217
Nanobiotechnology and drug delivery devices	217
Nano-encapsulation.....	217
Nanotechnology-based device for insulin delivery.....	218
Nanoporous materials for drug delivery devices	218
<i>Nanopore membrane in implantable titanium drug delivery device</i>	218
<i>Measuring the permeability of nanomembranes</i>	219
Nanovalves for drug delivery	219
Nanochips for drug delivery.....	219
Nanobiotechnology-based transdermal drug delivery	220
Introduction	220
Delivery of nanostructured drugs from transdermal patches	220
Effect of mechanical flexion on penetration of bucky balls through the skin	221
Ethosomes for transdermal drug delivery	221
NanoCyte transdermal drug delivery system	222
Safety issues of applications of nanomaterial carriers on the skin.....	222
Transdermal administration of lipid nanocapsules.....	222
Transdermal nanoparticle preparations for systemic effect	223
Nasal drug delivery using nanoparticles	223
Mucosal drug delivery with nanoparticles	224
Future prospects of nanotechnology-based drug delivery	224
DNA nanorobots for drug delivery	225
Nanomolecular valves for controlled drug release.....	225
Nanosponge for drug delivery.....	225
Nanomotors for drug delivery	226
6. Role of Nanotechnology in Biological Therapies	227
Introduction	227
Nanotechnology for delivery of proteins and peptides	227
Nanobiotechnology for vaccine delivery	227
Bacterial spores for delivery of vaccines.....	227

Dendrimer-RNA nanoparticle vaccines	228
Lipid nanoparticles for immunostimulatory RNA delivery	228
Nanoparticles for DNA vaccines.....	228
Nanoparticle-based adjuvants for vaccines	228
Nanospheres for controlled release of viral antigens	229
Nanotechnology-based mucosal vaccines	230
Nanotechnology for oral vaccines	230
Proteosomes™ as vaccine delivery vehicles	230
Targeted Synthetic Vaccine Particle (tSVP™) technology	230
Virus-mimetic nanovesicles as an antigen-delivery system	231
Nanobiotechnology for cell therapy	231
Nano-biocomposites containing living cells	232
Nanobiotechnology for gene therapy	232
Nanoparticle-mediated gene therapy	232
<i>Calcium phosphate nanoparticles as nonviral vectors.....</i>	<i>234</i>
<i>Carbonate apatite nanoparticles for gene delivery</i>	<i>234</i>
<i>Dendrimers for gene transfer.....</i>	<i>234</i>
<i>DNA nanoparticles.....</i>	<i>235</i>
<i>Gelatin nanoparticles for gene delivery</i>	<i>235</i>
<i>Immunoliposomes for delivery anticancer gene therapy</i>	<i>236</i>
<i>Lipid nanoparticles for targeted delivery of nucleic acids</i>	<i>236</i>
<i>Magnetic nanoparticles for targeted gene delivery.....</i>	<i>237</i>
<i>Nanoparticles for imaging and intracellular delivery of nucleic acids.....</i>	<i>237</i>
<i>Nanoparticles linked to viral vectors for photothermal therapy.....</i>	<i>237</i>
<i>Nanoparticles for p53 gene therapy of cancer.....</i>	<i>237</i>
<i>Nanoparticles with virus-like function as gene therapy vectors.....</i>	<i>238</i>
<i>Nanobiologics for nucleic acid delivery</i>	<i>238</i>
<i>Photo-controlled in vivo activation of biomolecules by nanoparticles</i>	<i>238</i>
<i>Silica nanoparticles for gene delivery</i>	<i>239</i>
Cochleate-mediated DNA delivery	239
Nanorod gene therapy	240
Nanomagnets for targeted cell-based cancer gene therapy.....	240
NanoNeedles for delivery of genetic material into cells.....	240
Application of pulsed magnetic field and superparamagnetic nanoparticles	241
Nanobiotechnology for antisense drug delivery	241
Antisense nanoparticles	241
Dendrimers for antisense drug delivery.....	242
Polymer nanoparticles for antisense delivery system	242
Nanoparticle-mediated siRNA delivery.....	242
Chitosan-coated nanoparticles for siRNA delivery	243
Delivery of siRNA by nanosize liposomes.....	243
Delivery of gold nanorod-siRNA nanoplex to dopaminergic neurons	243
Polymer-based nanoparticles for siRNA delivery.....	244
<i>Polyethylenimine nanoparticles for siRNA delivery</i>	<i>244</i>
<i>siRNA-PEG nanoparticle-based delivery.....</i>	<i>244</i>
<i>Polycation-based nanoparticles for siRNA delivery</i>	<i>244</i>
<i>Calando's technology for targeted delivery of anticancer siRNA.....</i>	<i>245</i>
<i>Self-assembling nanoplatform for delivery of siRNA.....</i>	<i>245</i>
<i>Topical delivery of siRNA-nanoparticle conjugates</i>	<i>246</i>
Quantum dots to monitor RNAi delivery	246
RNAi-based nanomedicines for gene silencing in hematological malignancies.....	247
Lipid nanoparticles for mRNA delivery	247
7. Nanodevices & Techniques for Clinical Applications	248
Introduction	248
Clinical nanodiagnosics	248
Nano-endoscopy	248
Application of nanotechnology in radiology	249
High-resolution ultrasound imaging using nanoparticles	249
Nanobiotechnology in tissue engineering	250
Nanoscale surfaces for stem cell culture.....	250
3D nanofilament-based scaffolds	251
Electrospinning technology for nanobiofabrication	251
Nanomaterials for tissue engineering.....	252
<i>Carbon nanotubes for artificial muscles.....</i>	<i>252</i>
<i>Nanofibers for tissue engineering of skeletal muscle</i>	<i>252</i>
Nanofibrous scaffolds for stem cell-based regenerative therapies	252
Nanomaterials for combining tissue engineering and drug delivery	253
Nanobiotechnology for organ replacement and assisted function	254
Exosomes for drug-free organ transplants.....	254
Nanobiotechnology and organ-assisting devices.....	254

Nanosurgery	255
Miniaturization in surgery.....	255
<i>Nanotechnology for hemostasis during surgery</i>	255
Minimally invasive surgery using catheters.....	255
Nanorobotics	256
In vivo microbot propulsion	256
Nanorobots	257
Nanoscale laser surgery	257
8. Nanooncology	260
Introduction	260
Nanobiotechnology for detection of cancer	260
Aptasensor for electrochemical detection of exosomes.....	260
Aptamer-nanoparticle combinations for cancer diagnostics and therapeutics.....	260
Dendrimers for sensing cancer cell apoptosis.....	261
Detection of circulating cancer cells.....	261
<i>DNA nanospheres for isolation of CTCs</i>	261
<i>Magnetic nanoparticles for capturing CTCs</i>	262
<i>Nano-Velcro technology for capturing CTCs</i>	262
Gold nanoparticles for cancer diagnosis	262
Gold nanorods for detection of metastatic tumor cells.....	264
Magnetoacoustic detection of cancer using superparamagnetic nanoparticles	264
Nanosensors for cancer diagnosis	264
<i>Differentiation between normal and cancer cells by nanosensors</i>	264
<i>Implanted biosensor for cancer</i>	264
Nanotubes for detection of cancer proteins.....	265
<i>Nanobiochip sensor technique for analysis of oral cancer biomarkers</i>	265
<i>Nanodots for tracking apoptosis in cancer</i>	266
<i>Nanolaser spectroscopy for detection of cancer in single cells</i>	266
<i>Nanoparticles designed for dual-mode imaging of cancer</i>	266
<i>Nanotechnology-based single molecule assays for cancer</i>	267
<i>QDs for detection of tumors</i>	267
<i>QD-based test for DNA methylation</i>	267
<i>Spectral imaging and CNTs in malignant tumors</i>	268
Nanobiotechnology for early detection of cancer to improve treatment	268
Nanobiotechnology-based drug delivery in cancer	269
Nanoparticle formulations for drug delivery in cancer	270
<i>Anticancer drug particles incorporated in liposomes</i>	270
<i>Cerasomes</i>	271
<i>Doxorubicin nanocarriers</i>	271
<i>Curcumin nanoformulation as cancer therapeutics</i>	272
<i>Encapsulating drugs in hydrogel nanoparticles</i>	273
<i>Exosomes</i>	273
<i>Folate-linked nanoparticles</i>	274
<i>Ginger nanoparticles for delivery of chemotherapy in colorectal cancer</i>	274
<i>Gold nanoparticles stabilized with resveratrol</i>	274
<i>Iron oxide nanoparticles</i>	274
<i>Lipid based nanocarriers</i>	275
<i>Micelles for drug delivery in cancer</i>	275
<i>Minicells for targeted delivery of nanoscale anticancer therapeutics</i>	277
<i>Protein nanocages for penetration of airway mucous and tumors</i>	277
<i>Nanoconjugates for subcutaneous delivery of anticancer drugs</i>	278
<i>Nanomaterials for delivery of poorly soluble anticancer drugs</i>	278
<i>Nanoparticle formulation for enhancing anticancer efficacy of cisplatin</i>	278
<i>Nanoparticle formulations of paclitaxel</i>	278
<i>Nanoparticles containing albumin and antisense oligonucleotides</i>	279
<i>Nanorobots for anticancer drug delivery</i>	280
<i>Niosomes for anticancer drug delivery</i>	280
<i>Pegylated nanoliposomal formulation</i>	280
<i>Peptide-linked nanoparticle delivery</i>	281
<i>Poly-2-hydroxyethyl methacrylate nanoparticles</i>	281
<i>Polypeptide-doxorubicin conjugated nanoparticles</i>	281
<i>Porous silicon nanoparticles for cancer drug delivery</i>	282
<i>Protosphere nanoparticle technology</i>	282
<i>siRNA delivery in combination with nanochemotherapy</i>	282
<i>Zinc oxide nanoparticles for drug delivery in cancer</i>	283
Nanoparticles for targeted delivery of anticancer therapeutics	283
<i>Aptamer nanoformulations for targeted anticancer therapy</i>	284
<i>Bacteriophage capsid-based nanoparticles for targeted cell-delivery</i>	284
<i>Canine parvovirus as a nanocontainer for targeted drug delivery</i>	285
<i>Carbon nanotubes for targeted drug delivery to cancer cells</i>	285

Carbon magnetic nanoparticles for targeted drug delivery in cancer	286
Chitosan nanoparticles for targeted anticancer drug delivery	286
CRLX101 for targeted anticancer drug delivery	286
Cycloset system for targeted delivery of anticancer therapeutics.....	286
Fullerenes for enhancing tumor targeting by antibodies	287
Gold nanoparticles for targeted drug delivery in cancer	287
Hepatic artery infusion of LDL-DHA nanoparticles for liver cancer.....	289
Hyaluronic acid nanocarriers for targeted anticancer therapeutics	289
Magnetic nanoparticles for remote-controlled drug delivery to tumors	289
Mesoporous silica nanoparticles	290
Monitoring of targeted delivery by nanoparticle-peptide conjugates.....	290
Nanobees for targeted delivery of cytolytic peptide melittin	291
Nanobody-shell polymeric micelles for targeted drug delivery	291
Nanocarrier-based targeted delivery of RNAi-based therapy	291
Nanoformulations of monoclonal antibodies for targeted drug delivery.....	292
Nanogel-based stealth cancer vaccine targeting macrophages	292
Nanovehicles for targeted delivery of paclitaxel.....	293
Nanocell for targeted drug delivery to tumor	293
Nanodiamonds for local delivery of chemotherapy at site of cancer	294
Nanoimmunoliposome-based system for targeted delivery of siRNA	294
Nanoparticle-mediated targeting of MAPK signaling pathway	294
Nanoparticles for targeted antisense therapy of cancer	295
Nanoparticles for delivery of suicide DNA to prostate tumors	295
Nanoparticles for targeted delivery of concurrent chemoradiation.....	295
Nanoparticle-based therapy targeted to cancer metastases	296
Nanoparticle-mediated delivery of multiple anticancer agents.....	296
Nanostructured hyaluronic acid for targeted drug delivery in cancer	296
Perfluorocarbon emulsion for targeted chemotherapeutic delivery	297
Polymer nanoparticles for targeted drug delivery in cancer.....	297
Polymersomes for targeted cancer drug delivery.....	298
Quantum dots and quantum rods for targeted drug delivery in cancer	299
Remote controlled drug delivery from magnetic nanocrystals.....	299
Targeted delivery of nanoparticulate drugs into lymphatic system	299
Targeted drug delivery with nanoparticle-aptamer bioconjugates	300
Use of T cells for delivery of gold nanoparticles to tumors	300
Dendrimers for anticancer drug delivery	301
Application of dendrimers in boron neutron capture therapy.....	302
Application of dendrimers in photodynamic therapy.....	302
Dendrimer-based synthetic vector for targeted cancer gene therapy	303
Poly-L-lysine dendrimer as antiangiogenic agent	303
RNA nanotechnology for delivery of cancer therapeutics	303
Delivery of siRNAs for cancer.....	304
Combination delivery systems for nanoparticle penetration into tumor tissue	304
Nanotechnology-based cancer therapy	305
Devices for nanotechnology-based cancer therapy	305
Convection-enhanced delivery with nanoliposomal CPT-11	305
Nanoengineered silicon for brachytherapy.....	305
Anticancer effect of nanoparticles.....	306
Antiangiogenic therapy using nanoparticles	306
Cytotoxic effects of cancer nanoparticles.....	306
Gold nanoparticles for inhibiting tumor growth.....	306
Nanoshell-based cancer therapy	306
Nanobody-based cancer therapy	307
Nanosecond pulsed electric fields for cancer therapy	307
Nanoparticles combined with physical agents for tumor ablation	308
Boron neutron capture therapy using nanoparticles	308
Gold nanoparticles combined with radiation therapy	308
Laser-induced cancer destruction using nanoparticles.....	309
Nanoparticle-mediated thermal ablation of cancer.....	311
Temperature-sensitive liposomes for cancer destruction	313
Ultrasound radiation of tumors combined with nanoparticles	313
Nanomedicines combined with molecular targeted anticancer therapeutics.....	313
Bispecific nanobioconjugate for targeted cancer immunotherapy.....	314
Impact of nanotechnology-based imaging in management of cancer	314
Cornell dots for cancer imaging.....	314
Nanoparticles and optoacoustic imaging in management of cancer	315
Nanoparticle-MRI for tracking dendritic cells in cancer therapy	315
Nanoparticle-CT scan.....	316
Nanosensor device as an aid to cancer surgery.....	316
Nanoparticle-based imaging in oncology clinical trials	316
QDs aid lymph node mapping in cancer	316

<i>Single wall carbon nanotubes for targeted imaging of tumors</i>	317
Nanoparticles for targeted therapy of tumors	317
Nanocarriers with TGF- β inhibitors for targeting cancer	318
Nanobombs for cancer	318
Nanoparticle-based anticancer drug delivery to overcome MDR	318
<i>Time-delayed, dual-drug nanoparticle delivery system</i>	319
Combination of diagnostics and therapeutics for cancer	320
<i>Aptamer conjugated magnetic nanoparticles</i>	320
<i>Biomimetic nanoparticles targeted to tumors</i>	320
<i>Dendrimer nanoparticles for targeting and imaging tumors</i>	320
<i>Gold nanoparticle plus bombesin for imaging and therapy of cancer</i>	320
<i>Gold nanorods for diagnosis plus photothermal therapy of cancer</i>	321
<i>Gold nanotubes for diagnosis plus photothermal therapy of cancer</i>	321
<i>Magnetic nanoparticles for imaging as well as therapy of cancer</i>	322
<i>Micelles for targeted drug delivery and PET imaging in cancer</i>	322
<i>Nanobialys for combining MRI with delivery of anticancer agents</i>	323
<i>Nanoparticles, MRI and thermal ablation of tumors</i>	323
<i>pHLIP nanotechnology for detection and targeted therapy of cancer</i>	324
<i>QD conjugates combine cancer imaging, therapy and sensing</i>	324
<i>Silica nanoparticles for combining diagnosis with cancer therapy</i>	324
<i>Squalene-based nanocomposites for tumor imaging and therapy</i>	324
<i>Radiolabeled carbon nanotubes for tumor imaging and targeting</i>	325
<i>Ultrasonic tumor imaging and targeted chemotherapy by nanobubbles</i>	325
Role of nanobiotechnology in cancer immunology	325
Nanorobotics for management of cancer	326
<i>Bacterial nanorobots for targeting cancer</i>	327
<i>DNA robots for targeting cancer</i>	327
Fullerenes for protection against chemotherapy-induced cardiotoxicity	327
Concluding remarks and future of nanooncology	328

9. Nanoneurology	329
Introduction	329
Nanobiotechnology for neurophysiological studies	329
Nanoelectrodes in neurophysiology	329
Chronic EEG recording	329
Nanoscale devices for network-level electrophysiology	329
Chronic subcellular recording from implanted electrodes	330
Nanowires for monitoring brain activity via blood vessels	330
Gold nanoparticles for in vivo study of neural function	331
Nanodiagnosis and nanoparticle-based brain imaging	331
Applications of nanotechnology in molecular imaging of the brain	331
Nanoparticles and MRI for macrophage tracking in the CNS	332
Nanoparticles for tracking stem cells for therapy of CNS disorders	332
Multifunctional NPs for diagnosis and treatment of brain disorders	333
Nanotechnology-based drug delivery to the CNS	333
Nanotechnology-based drug delivery for neurodegenerative disorders	333
<i>Nanoencapsulation for delivery of vitamin E for Alzheimer disease</i>	333
<i>Selegiline-PEG nanoparticles targeting Aβ fibrils in Alzheimer disease</i>	333
Nanoparticles for drug delivery across BBB	333
<i>Carbon nanotubes for drug delivery to the CNS</i>	334
<i>Nanoagonists of adenosine receptor for delivery across BBB</i>	335
<i>Nanovesicles for transport across BBB</i>	335
<i>Polymeric nanoparticles as carriers for CNS drug delivery</i>	336
Mechanism of the nanoparticle-mediated transport of the drugs across the BBB	336
<i>Transcytosis of transferrin-containing nanoparticles across the BBB</i>	336
Nanotechnology-based strategies for drug delivery across BBB	336
<i>G-Technology</i> ®	337
<i>LipoBridge</i> ™ technology	337
Nanotechnology-based drug delivery to brain tumors	337
<i>Intravenous gene delivery with nanoparticles into brain tumors</i>	337
<i>Micelles for delivery of chemotherapy to brain tumors</i>	338
<i>Multifunctional nanoparticles for treating brain tumors</i>	338
<i>Nanoparticles for delivery of drugs to brain tumors across BBB</i>	338
<i>NP delivery across the BBB for imaging and therapy of brain tumors</i>	339
<i>NP-based targeted delivery of chemotherapy across the BBB</i>	339
<i>PLA nanoparticles for controlled delivery of BCNU to brain tumors</i>	340
Nanoparticles as nonviral vectors for CNS gene therapy	340
<i>Silica nanoparticles for CNS gene therapy</i>	340
<i>Cationic lipids for CNS gene therapy</i>	341
<i>Polyethylenimine-based nanoparticles for CNS gene therapy</i>	341
<i>Dendrimers for CNS gene therapy</i>	341

<i>Carbon nanotubes for CNS gene therapy</i>	341
Nanoparticle-based drug delivery to the inner ear	342
Nanotechnology-based devices and implants for CNS	342
Nanobiotechnology and neuroprotection	342
Neuroprotection due to antioxidant effect of nanoparticles	343
Neuroprotective nanoparticles that inhibit neuroinflammation	344
Neuroprotective nanoparticles that inhibit A β formation	344
Nanobiotechnology for regeneration and repair of the CNS	344
Nanowire neuroprosthetics with functional membrane proteins	344
Nanotube-neuron electronic interface	345
Role of nanobiotechnology in regeneration and repair following CNS trauma	345
<i>Nanofibers as an aid to CNS regeneration by neural progenitor cells</i>	345
<i>Peptide nanostructures for repair of the CNS</i>	346
Nanobiotechnology for repair and regeneration following TBI.....	346
Nanoparticles for repair following SCI	346
<i>Repair of SCI by nanoscale micelles</i>	347
Nanobiotechnology-based devices for restoration of neural function	347
<i>Nanobiotechnology-based artificial retina</i>	348
Role of nanomedicine in treatment of neurodegenerative disorders.....	348
Nanopsychiatry	348
Nanoneurosurgery	349
Bucky balls for brain cancer	349
Electrospun nanofiber tubes for regeneration of peripheral nerves.....	349
Femtolasers for neurosurgery	349
Graphene technology for neurosurgery	350
Nanofiber brain implants.....	350
<i>Nanoparticles as an aid to neurosurgery</i>	350
Nanoscaffold for CNS repair	351
Application of nanobiotechnology to pain therapeutics.....	351
10. Nanocardiology	353
Introduction	353
Nanotechnology-based cardiovascular diagnosis.....	353
Detection of biomarkers of myocardial infarction in saliva by a nanobiochip.....	353
Nanobiosensors for detection of cardiovascular disorders	353
Use of magnetic NPs as MRI contrast agents for cardiac imaging	353
Perfluorocarbon NPs for combining diagnosis with therapy in cardiology.....	354
Cardiac monitoring in sleep apnea.....	354
Detection and treatment of atherosclerotic plaques in the arteries	354
Monitoring for disorders of blood coagulation.....	355
Nanotechnology-based therapeutic delivery in cardiology.....	355
Combination of diagnostics with therapeutics	355
Controlled delivery of nanoparticles to injured vasculature	356
Nanobiotechnology-based therapeutic delivery in myocardial ischemia	356
<i>IGF-1 delivery by nanofibers for cell therapy of myocardial infarction</i>	357
<i>Injectable peptide nanofibers for myocardial ischemia</i>	357
Liposomal nanodevices for targeted cardiovascular drug delivery	357
Low molecular weight heparin-loaded polymeric nanoparticles.....	358
Magnetic antibody-linked nanoparticles to deliver cells to the heart.....	358
Nanoparticles for cardiovascular imaging and targeted drug delivery	358
Nanofiber-based scaffolds with drug-release properties	359
NP-based systemic drug delivery to prevent cardiotoxicity	359
Targeted nanoparticle-DNA delivery to the cardiovascular system	359
Nanotechnology-based therapeutics for cardiovascular diseases	360
Nanolipoblockers for atherosclerotic arterial plaques.....	360
Nanoparticle-mediated drug delivery for atherosclerotic heart disease	360
Nanotechnology approach to the vulnerable plaque as cause of cardiac arrest	360
Nanotechnology for regeneration of the cardiovascular system	361
Nanotechnology for cardiac revascularization	361
Nanocomposite hydrogels for myocardial tissue engineering.....	361
Nanotechnology-based stents.....	362
Restenosis after percutaneous coronary angioplasty.....	362
<i>Drugs encapsulated in biodegradable nanoparticles</i>	363
<i>Magnetic nanoparticle-coated DES</i>	363
<i>Magnetic nanoparticles encapsulating paclitaxel targeted to stents</i>	364
<i>Nanocoated DES</i>	364
<i>Nanopores to enhance compatibility of DES</i>	365
Application of nanotechnology in cardiac catheterization	365
11. Nanopulmonology	367
Introduction	367

Nanoparticles for pulmonary drug delivery	367
Systemic drug delivery via pulmonary route	367
Nanoparticle drug delivery for effects on the respiratory system	367
Fate and toxicology of nanoparticles delivered to the lungs	368
Nanoparticle drug formulations for spray inhalation	369
Nanobiotechnology for improving insulin delivery in diabetes.....	369
<i>Inhalation of glucose-sensitive NP for regulated release of insulin</i>	369
<i>Pulmonary delivery of insulin by surface acoustic wave technology</i>	369
Nanotechnology-based pharmaceuticals for pulmonary disorders	369
Nanotechnology-based treatment of pulmonary disorders	371
Management of cystic fibrosis.....	371
Nanobiotechnology-based gene transfer in CF	371
<i>Nonviral DNA nanoparticle-mediated CFTR gene transfer</i>	371
<i>Liposome-mediated CFTR gene transfer</i>	372
<i>Magnetofection for enhancing nonviral gene transfer to the airways</i>	372
NP-based delivery of antibiotics for treatment of pulmonary infections in CF.....	372
Nanotechnology-based treatment of chronic obstructive pulmonary disease	373
Nanotechnology-based treatment of pulmonary inflammation.....	373
12. Nanoorthopedics	375
Introduction	375
Application of nanotechnology for bone research.....	375
Reducing reaction to orthopedic implants	375
Enhancing the activity of bone cells on the surface of orthopedic implants	376
Synthetic nanomaterials as bone implants.....	376
<i>NanoBone implants</i>	376
<i>NanoBone versus BioOss</i>	377
Nanoparticles for repairing bone cracks	377
Nanotechnology-based bone regeneration	377
<i>Delivery of growth factors for bone repair and regeneration</i>	377
<i>Role of nanoparticles in regenerative therapy for osteoporosis</i>	378
Aligning nanotubes to improve artificial joints.....	378
Carbon nanotubes as scaffolds for bone growth	378
Nanoparticle-based hydrogels for cartilage regeneration	379
Nanotechnology for engineering of cartilage replacement.....	379
Cartilage disorders of knee joint	380
<i>Nanotechnology as an aid to arthroscopy</i>	380
<i>Nanotechnology-based therapy for osteoarthritis</i>	381
13. Nanoophthalmology	383
Introduction	383
Nanocarriers for ocular drug delivery	383
<i>Dendrimers for drug delivery in ophthalmology</i>	384
<i>DNA nanoparticles for nonviral gene transfer to the eye</i>	384
<i>Nanoparticle-based topical drug application to the eye</i>	384
<i>Lipid nanoparticles for ocular drug delivery</i>	385
<i>Nanoparticles for intraocular drug delivery</i>	385
Nanoparticles impregnated ocular inserts for drug delivery to the eye	386
Ophthalmic drug delivery through nanoparticles in contact lenses	386
Nanotechnology-based therapeutics for eye disorders.....	386
<i>Nanotechnology for prevention of neovascularization</i>	387
<i>Nanoparticles as nonviral vectors for gene therapy of retinal disorders</i>	388
<i>Nanobiotechnology for treatment of glaucoma</i>	388
<i>Nanotechnology for treatment for age-related macular degeneration</i>	389
14. Nanomicrobiology	391
Introduction	391
Nanodiagnosis of infections	391
Detection of viruses	391
<i>Cantilever beams for detection of single virus particles</i>	391
<i>Carbon nanotubes-based detection of viruses</i>	391
<i>Electric fields for accelerating detection of viruses</i>	392
<i>QD fluorescent probes for detection of respiratory viral infections</i>	392
<i>Verigene Respiratory Virus Plus Assay</i>	393
<i>Surface enhanced Raman scattering for detection of viruses</i>	394
Detection of bacteria	394
<i>Nanoparticle-based methods for bacterial detection</i>	394
<i>QDs for detection of bacterial infections</i>	395
Role of nanobiotechnology in diagnosis of fungal infections	395
<i>Magnetic nanoparticle-based technique for detection of fungi</i>	395
<i>Nano-amplification technique for the detection of fungal pathogens</i>	396

Role of nanobacteria in human diseases	396
Nature of nanobacteria	396
Nanobacteria and kidney stone formation	397
Nanobacteria in cardiovascular disease	397
Nanotechnology-based microbicidal agents	398
Carbon nanotubes as antimicrobial agents	398
Gold and silver nanoparticles as antibacterial agents	398
Gold nanoparticles for targeting drug-resistant bacteria	398
Nanocarriers for antibacterial peptides	399
Nanoemulsions as microbicidal agents	399
Nanoparticles for overcoming antibiotic resistance	400
Nanoformulations of antifungal agents	400
Nanoscale bactericidal powders	400
Nanotubes for detection and destruction of bacteria	401
Nanoscale surface structure for antibacterial defense	401
<i>Silver nanoparticle coating as prophylaxis against infection</i>	<i>402</i>
Nanobiotechnology and virology	402
Study of interaction of nanoparticles with viruses	402
Study of pathomechanism of viral diseases	403
Transdermal nanoparticles for immune enhancement in HIV	403
Nanofiltration to remove viruses from plasma transfusion products	403
Nanotechnology-based antiviral agents	404
Dendrimer-based intracellular delivery of antibodies	404
Dendrimers as nonviral vectors in dendritic cell-based immunotherapies	404
Fullerenes as antiviral agents	405
Gold nanorod-based delivery of RNA antiviral therapeutics	405
Nanocoating for antiviral effect	405
Nanoviricides	406
Nanocarrier-mediated siRNA delivery for treatment of HIV/AIDS	407
Silver nanoparticles as antiviral agents	408
siRNA lipid nanoparticle for the treatment of Ebola virus infection	408
15. Miscellaneous Healthcare Applications of Nanobiotechnology	411
Introduction	411
Nanoimmunology	411
Fullerenes for interruption of allergic/immune response	411
Carbon nanoparticle-based immunomodulation	411
Systemic lupus erythematosus	412
Inflammatory diseases	412
Rheumatoid arthritis	412
Nanohematology	414
Artificial red cells	414
Feraheme	414
Nanoparticle-based drug delivery for gastrointestinal disorders	414
Ginger nanoparticles for IBS	414
Nanoparticles for targeted therapeutic delivery to the liver	415
Nanonephrology	415
Nanobiotechnology-based renal dialysis	415
<i>Nanotechnology-based human nephron filter for renal failure</i>	<i>416</i>
<i>Blood-compatible membranes for renal dialysis</i>	<i>416</i>
<i>Ceramic filter for renal dialysis</i>	<i>416</i>
Nanotechnology for wound healing	416
Nanoengineered bandage for wound care	417
Nanotechnology-based products for skin disorders	417
Cubosomes for treating skin disorders of premature infants	417
Nanoparticles for improving targeted topical therapy of skin	418
Nanoparticle-based sun screens	418
Nanoengineered bionic skin	419
Topical nanocreams for inflammatory disorders of the skin	419
Nanobiotechnology for disorders of aging	419
Personal care products based on nanotechnology	420
Nanocosmeceuticals	420
Nanotechnology for hair care	420
Nanodentistry	421
Bonding materials	421
Dental caries	421
Nanospheres for dental hypersensitivity	422
Nanomaterials for dental filling	422
Nanomaterials for dental implants	422
Nanodiamonds for root canal repair	423
Nanomaterials for dental implants	422
Nanomedical aspects of oxidative stress	423

Nanoparticle antioxidants.....	423
<i>Fullerene-based antioxidants</i>	423
<i>Ceria nanoparticles as neuroprotective antioxidants</i>	424
Antioxidant nanoparticles for treating diseases due to oxidative stress	424
Nanotechnology and homeopathic medicines	425
Nanoparticles as antidotes for poisons	425
Nanoparticles for chemo-radioprotection	426
Role of nanobiotechnology in biodefense.....	426
Nanoparticles to combat microbial warfare agents.....	426
Removal of toxins from blood	427
Nanobiotechnology for public health	427
Nanotechnology for water purification.....	428
<i>Nanofiltration to remove viruses from water</i>	428
<i>Nanostructured membranes for water purification</i>	428
<i>Nanotechnologies for water remediation</i>	428
<i>Nanotechnology-based photochemical water purification</i>	429
<i>Magnetic nanoscavengers for water purification</i>	429
Nanobiotechnology and nutrition.....	429
Nanobiotechnology and food industry	430
Role of nanobiotechnology in personalized nutrition	431
16. Nanobiotechnology and Personalized Medicine.....	433
Introduction	433
Role of nanobiotechnology in personalized management of cancer	434
Nanotechnology-based personalized medicine for cardiology.....	435
Nanobiotechnology for therapeutics design and monitoring	435
Smart nanosystems for personalized medicine.....	435
<i>Nanosystems that respond to disease environments</i>	436
17. Nanotoxicology	437
Introduction	437
Fate of nanoparticles in the human body	437
Nanoparticle-protein interactions	437
Protein corona and nanoparticle toxicity.....	437
<i>Systemic toxicity of protein corona</i>	438
<i>Protein corona and cytotoxicity</i>	438
Computational prediction of toxicity of nanosubstances.....	438
In vitro vs in vivo testing for toxicity of nanoparticles.....	438
Stem cellines for testing toxicity of nanoparticles	439
Variations in safety issues of different nanoparticles	439
Carbon nanotube safety.....	439
Fullerene toxicity	441
Gold nanoparticle toxicity.....	441
Graphene toxicity.....	441
Quantum dot safety issues.....	441
Toxicity of gold nanoparticle as synergistic interaction with surfactants.....	442
Effects of nanoparticles on various body systems.....	443
Pulmonary effects of nanoparticles.....	443
Neuronanotoxicology	445
<i>Nanoparticle deposits in the brain</i>	445
<i>Nanoparticles and neurodegeneration</i>	445
Effect of nanoparticles on the heart.....	446
Blood compatibility of nanoparticles	446
<i>Carbon nanoparticle-induced platelet aggregation</i>	446
<i>Compatibility of lipid-based nanoparticles with blood and blood cells</i>	447
Transfer of nanoparticles from mother to fetus	447
Cytotoxicity of nanoparticles	447
Indirect DNA damage caused by nanoparticles across cellular barriers.....	448
Measures to reduce toxicity of nanoparticles.....	448
Reducing toxicity of carbon nanotubes.....	448
A screening strategy for the hazard identification of nanomaterials	449
Concluding remarks on safety issues of nanoparticles.....	449
Research into effects of nanoparticles in the environment	449
Effect of magnetite pollution nanoparticles on the human brain	450
Environmental safety of aerosols released from nanoparticle manufacture	450
Role of US government agencies in research on safety of nanoparticles	450
Work at NanoSafety Laboratories Inc UCLA	451
Center for Biological and Environmental Nanotechnology	451
European NEST project for risk assessment of exposure to nanoparticles	451
Nanoparticles and food safety	452
Titanium dioxide nanoparticles in food.....	452

Regulatory viewpoint on nanoparticles in food	453
Use of water nanostructures for inactivation of foodborne microorganisms	453
Public perceptions of the safety of nanotechnology	453
Evaluation of consumer exposure to nanoscale materials	454
Safety of nanoparticle-based cosmetics	455
Regulations in the European Union	455
Nanotechnology-based sunscreens	455
Cosmetic industry's white paper on nanoparticles in personal care	456
Skin penetration of nanoparticles used in sunscreens	456
Titanium dioxide in cosmetics	456
18. Ethical and Regulatory Aspects of Nanomedicine	457
Introduction	457
Ethical and social implications of nanobiotechnology	457
Nanoethics	457
Nanotechnology patents	458
Quantum dot patents relevant to healthcare applications	459
Challenges and future of nanobiotechnology patents	459
Legal aspects of nanobiotechnology	459
Nanotechnology standards	460
Preclinical testing of nanomaterials for biological applications	461
FDA regulation of nanobiotechnology products	461
FDA and nanotechnology-based medical devices	463
FDA's Nanotechnology Task Force	464
FDA collaboration with agencies/organizations relevant to nanotechnology	465
Regulation of nanotechnology in the European Union	466
Safety recommendations of the Royal Society of UK	466
European Commission and safety of nanocosmetics	467
19. Research and Future of Nanomedicine	469
Introduction	469
Nanobiotechnology research in the academic centers	469
Clinical trials of nanomedicines	472
Future of nanomedicine	473
Support for nanobiotechnology by US Government agencies	474
Nanomedicine initiative of NIH	474
US Federal funding for nanobiotechnology	474
NCI Alliance for Nanotechnology in Cancer	475
Centers of Cancer Nanotechnology Excellence	476
Innovative Research in Cancer Nanotechnology	476
Manufacture of nanomedicines	477
Nanotechnology Characterization Laboratory	477
Nanomedicine Center for Nucleoprotein Machines	478
Global Enterprise for Micro-Mechanics and Molecular Medicine	478
Nanomedicine in Europe	478
NANO2LIFE	478
European Technology Platform on NanoMedicine	479
European Union's "Horizon 2020"	480
European Nanomedicine Characterisation Laboratory	480
20. Nanobiotechnology Markets	481
Introduction	481
Markets according to areas of applications	482
Markets for nanomedicine	483
Markets for nanodiagnostics	483
Markets for biochips/microarrays	483
Imaging agents	484
Pharmaceuticals	484
<i>Role of nanobiotechnology in drug delivery market</i>	<i>484</i>
Nanobiotechnology in life sciences research market	485
Markets according to technologies	485
Markets for nanomaterials	485
Markets for biomedical nanodevices	485
<i>Markets for nanosensors</i>	<i>486</i>
Markets for nanotools	486
Geographical distribution of markets	486
Nanobiotechnology in the US	487
Nanobiotechnology in the European Union	487
Nano2Life	489
European Technology Platform on NanoMedicine	489
Nanobiotechnology in Australia	490

Nanobiotechnology in Asia.....	490
Japan	490
South Korea	491
China	491
Taiwan	492
India	493
Nanobiotechnology in Russia	494
Nanobiotechnology in the developing world	494
Venture capital investment in nanotechnology	494
Big pharma and nanotechnology.....	495
Impact of nanobiotechnology on markets for current pharmaceuticals	495
Unmet needs in nanobiotechnology	495
Drivers for the development of nanobiotechnology markets.....	496
Strategies for developing markets for nanobiotechnology	496
Collaborations of industry with academic research centers	497
Collaborations of pharmaceutical and nanotechnology companies	497
Collaboration of chemical industry and the government	497
Cost-benefit of nanotechnology-based drug delivery.....	498
Education of healthcare professionals	498
Education of the public	498

21. References..... 501
