

# **Nanobiotechnology**

## **Part I: Applications & Markets**

**By**

**Prof. K. K. Jain**  
MD, FRACS, FFPM  
**Jain PharmaBiotech**  
**Basel, Switzerland**

**November 2018**

**A Jain PharmaBiotech Report**

## **A U T H O R ' S   B I O G R A P H Y**

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently he is a consultant at Jain PharmaBiotech. Prof. Jain's 478 publications include 30 books (6 as editor + 24 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. His books include "Role of Nanobiotechnology in Molecular Diagnostics" (2006), "Handbook of Nanomedicine" (Humana/Springer 2008; Chinese edition, Peking University Press 2011, 2<sup>nd</sup> ed Springer 2012, 3<sup>rd</sup> ed April 2017), "Textbook of Personalized Medicine (Springer 2009; Japanese ed 2012; 2<sup>nd</sup> ed Springer, 2015), "Handbook of Biomarkers" (Springer 2010; Chinese edition, Chemical Industry Press 2016, 2<sup>nd</sup> edition, 2017), Handbook of Neuroprotection (Springer 2011, 2<sup>nd</sup> edn 2019, in preparation), "Applications of Biotechnology in Cardiovascular Therapeutics" (Springer 2011), "Applications of Biotechnology in Neurology" (Springer 2013), and "Applications of Biotechnology in Oncology" (Springer 2014). He has edited "Drug Delivery Systems", 2<sup>nd</sup> ed (Springer 2014) and "Applied Neurogenomics" (Springer 2015). He is currently editing "Drug Delivery Systems", 3<sup>rd</sup> ed (Springer 2019).

# TABLE OF CONTENTS

<b>0. EXECUTIVE SUMMARY.....</b>	<b>23</b>
<b>1. Introduction .....</b>	<b>25</b>
<b>Basics of nanobiotechnology.....</b>	<b>25</b>
European Union definition of nanomaterials.....	26
<b>Nanoscale time and light .....</b>	<b>27</b>
<i>Nanotime.....</i>	27
<i>Nanolasers.....</i>	27
<b>Nanomedicine.....</b>	<b>27</b>
<b>Relation of nanobiotechnology to nanomedicine.....</b>	<b>28</b>
<b>Landmarks in the evolution of nanomedicine.....</b>	<b>28</b>
<b>Nanomedicine as a part of evolution of medicine.....</b>	<b>29</b>
<b>2. Nanotechnologies .....</b>	<b>31</b>
<b>Introduction .....</b>	<b>31</b>
<b>Classification of nanobiotechnologies .....</b>	<b>31</b>
Nanoparticles .....	32
<i>Gold nanoparticles .....</i>	33
<i>Cubosomes .....</i>	33
<i>Fluorescent nanoparticles.....</i>	34
<i>Fullerenes.....</i>	34
<i>Graphene.....</i>	35
<i>Magnetic nanoparticles .....</i>	35
<i>Nanoparticles assembly into micelles.....</i>	36
<i>Nanoshells .....</i>	36
<i>Plant-derived nanoparticles .....</i>	36
<i>Polymer nanoparticles .....</i>	37
<i>Porous silicon nanoparticles.....</i>	37
<i>Quantum dots .....</i>	37
<i>Synthetic high density lipoprotein nanoparticles.....</i>	38
<i>Hybrid nanoparticles.....</i>	38
Bacterial structures relevant to nanobiotechnology.....	39
<i>Nanostructures based on bacterial cell surface layers .....</i>	39
<i>Bacterial magnetic particles.....</i>	39
Carbon nanotubes.....	40
<i>Medical applications of nanotubes .....</i>	40
Dendrimers .....	41
<i>Properties .....</i>	42
<i>Applications.....</i>	42
DNA nanostructures .....	43
<i>DNA origami.....</i>	43
<i>Bacteriophages for mass production of DNA origami.....</i>	43
<i>Fractal assembly.....</i>	44
<i>Gigadalton-scale structures.....</i>	44
<i>Nanobricks.....</i>	44
<i>Advantages of DNA nanostructure.....</i>	44
<i>Potential applications of DNA octahedron .....</i>	45
Nanowires.....	45
Nanopores .....	46
Nanoporous silica aerogel .....	46
Nanostructured silicon .....	47
Nanoparticle conjugates.....	47
<i>DNA-nanoparticle conjugates.....</i>	47
<i>Networks of gold nanoparticles and bacteriophage .....</i>	47
<i>Protein-nanoparticle combination .....</i>	48
Polymer nanofibers .....	48
Virus-like particles .....	49
<b>Measurement of nanoparticle size and distribution .....</b>	<b>49</b>
<b>Nanomaterials for biolabeling.....</b>	<b>50</b>
DNA Nanotags .....	51
Fluorescent lanthanide nanorods.....	51
Magnetic nanotags .....	52
Molecular computational identification .....	52
Nanophosphor labels .....	52
Organic nanoparticles as biolabels.....	53
Quantum dots as labels .....	54
SERS nanotags .....	54
Silica nanoparticles for labeling antibodies .....	54

Silver nanoparticle labels .....	55
<b>Micro- and nano-electromechanical systems .....</b>	<b>55</b>
BioMEMS.....	56
<b>Microarrays and nanoarrays .....</b>	<b>56</b>
Dip Pen Nanolithography for nanoarrays .....	57
<i>Applications of dip-pen nanolithography</i> .....	57
Protein nanoarrays.....	58
<i>Single-molecule protein arrays</i> .....	58
<b>Microfluidics and nanofluidics.....</b>	<b>58</b>
Nanotechnology on a chip .....	59
Microfluidic chips for nanoliter volumes.....	60
Use of nanotechnology in microfluidics .....	60
2D nanofluidics.....	60
<i>Construction of nanofluidic channels</i> .....	60
<i>Nanoscale flow visualization</i> .....	61
<i>Moving (levitation) of nanofluidic drops with physical forces</i> .....	61
<i>Electrochemical nanofluid injection</i> .....	62
<i>Nanofluidics on nanopatterned surfaces</i> .....	62
<i>Nano-interface in a microfluidic chip</i> .....	62
<i>Nanofluidic channels for study of DNA</i> .....	62
<b>Visualization and manipulation on nanoscale .....</b>	<b>63</b>
3D single-molecule microscopy with nanoscale accuracy .....	63
4Pi microscope .....	63
Atomic force microscopy .....	64
<i>AFM basics</i> .....	64
<i>Advantages of AFM</i> .....	64
<i>AFM as nanorobot</i> .....	64
<i>Force sensing Integrated Readout and Active Tip</i> .....	65
AFM infrared spectroscopy .....	65
Cantilever technology .....	65
CytoViva® Microscope System .....	67
Fluorescence Resonance Energy Transfer .....	67
Fluorescence by Unbound Excitation from Luminescence.....	67
Magnetic resonance force microscopy and nanoscale MRI.....	67
Multiple single-molecule fluorescence microscopy .....	68
Near-field scanning optical microscopy .....	68
Nano-sized light source for single cell endoscopy .....	69
Nanoparticle characterization by Nanosight LM10 technology.....	69
Nanoscale scanning electron microscopy .....	70
<i>Use of SEM to reconstruct 3D tissue nanostructure</i> .....	70
Optical Imaging with a Silver Superlens.....	70
Partial wave spectroscopy .....	71
Photoactivated localization microscopy .....	71
Scanning probe microscopy.....	72
Single-molecule photon localization microscopy .....	72
STED microscopy.....	72
Super-resolution microscopy for in vivo cell imaging .....	73
3D-SIM.....	73
<i>Nanomicroscopy for live cell tomography</i> .....	73
RESOLFT Nanoscopy.....	74
Ultra-nanocrystalline diamond .....	74
Visualizing atoms with high-resolution transmission electron microscopy .....	75
<b>Surface plasmon resonance .....</b>	<b>75</b>
<b>Nanotechnology and phototherapy .....</b>	<b>76</b>

### **3. Nanotechnologies for Basic Research Relevant to Medicine..... 78**

<b>Introduction .....</b>	<b>78</b>
<b>Nanotechnology and biology.....</b>	<b>78</b>
NanoSystems Biology .....	78
Nanobiology and the cell.....	79
<i>Biosensing of cellular responses</i> .....	80
<i>Control of T cell signaling activity</i> .....	80
<i>Measuring mass of single cells</i> .....	81
<i>Nanostructures involved in endocytosis</i> .....	81
<i>Nanoparticles for in vivo study of cells</i> .....	81
<i>Nanotechnology-based live-cell single molecule assays</i> .....	82
<i>Quantum dots for stem cell labeling</i> .....	82
<i>Quantum dot/antibody conjugates for in vivo cytometric imaging</i> .....	82
<i>Quantum dots for study of apoptosis</i> .....	82
<i>Ribosome as a Brownian nanomachine</i> .....	83
<i>Single cell injection by nanolasers</i> .....	83

<i>Study of complex biological systems</i> .....	83
<i>Tissue-engineering for studying effects of nanoparticles on cells</i> .....	84
Molecular motors .....	84
<i>Nanomotor made of nucleic acids</i> .....	86
<i>phi29 DNA packaging nanomotor</i> .....	86
<i>Light-activated ion channel molecular machines</i> .....	87
Application of AFM for biomolecular imaging .....	87
<i>Future insights into biomolecular processes by AFM</i> .....	88
4Pi microscopy to study DNA double-strand breaks .....	88
Nanoscale DNA imaging .....	88
Multi-isotope imaging mass spectrometry .....	89
Applications of biomolecular computing in life sciences .....	89
Bacteria for construction of nanomachines .....	90
Natural nanocomposites.....	90
Nanotechnology in biological research .....	91
<i>QDs for biological research</i> .....	91
Molecular biology and nanotechnology.....	92
<i>Structural DNA nanotechnology</i> .....	92
<i>RNA nanotechnology</i> .....	93
<i>Genetically engineered proteins for nanobiotechnology</i> .....	94
Single molecule studies .....	94
<i>3D single-molecular imaging by coherent X-ray diffraction imaging</i> .....	94
<i>Nanoscale NMR for imaging single molecules</i> .....	95
<i>Optical trapping and single-molecule fluorescence</i> .....	95
<i>Study of molecular assembly of single molecules in living cells</i> .....	95
<b>Nanochemistry</b> .....	<b>96</b>
Nanoscale pH Meter .....	96
<b>Nanolaser applications in life sciences</b> .....	<b>96</b>
<b>Nanoelectroporation</b> .....	<b>97</b>
<b>Nanomanipulation</b> .....	<b>98</b>
Atomic force microscopy .....	98
DNA nanomanipulation .....	98
Fluorescence-force spectroscopy.....	98
Nanomanipulation by combination of AFM and other devices .....	99
<i>Surgery on living cells using AFM with nanoneedles</i> .....	99
Manipulation of DNA sequence by use of nanoparticles as laser light antennas.....	100
Nanomanipulation of single molecule.....	100
Nanomanipulation for study of mechanism of anticancer drugs .....	100
Optoelectronic tweezers.....	101
Optical manipulation of nanoparticles .....	101
<b>Nanotechnology in genomic research</b> .....	<b>102</b>
Nanotechnology for separation of DNA fragments .....	102
Nanotechnology-based DNA sequencing.....	102
Role of nanobiotechnology in identifying single nucleotide polymorphisms.....	104
<b>Nanobiotechnology for study of mitochondria</b> .....	<b>104</b>
Nanomaterials for the study of mitochondria .....	104
Study of mitochondria with nanolaser spectroscopy.....	104
<b>Nanoproteomics</b> .....	<b>105</b>
Biochips for nanoscale proteomics.....	105
<i>Protein biochips based on fluorescence planar wave guide technology</i> .....	105
<i>Nanofilter array chip</i> .....	106
Dynamic reassembly of peptides.....	106
High-field asymmetric waveform ion mobility mass spectrometry.....	106
Manipulation of redox systems by nanotechnology .....	107
Multi Photon Detection.....	107
Nanoflow liquid chromatography .....	107
Nanoparticle-protein interactions .....	107
Nanopore-based protein sequencing.....	108
Nanopores for phosphoprotein analysis.....	108
Nanoproteomics for study of misfolded proteins.....	108
Nanotube electronic biosensor for proteomics .....	109
Protein nanocrystallography .....	109
Protein engineering on nanoscale.....	109
<i>Nanowires for protein engineering</i> .....	109
<i>A nanoscale mechanism for protein engineering</i> .....	110
<i>Role of nanoparticles in self-assembly of proteins</i> .....	110
<i>Role of nanotechnology in peptide engineering</i> .....	110
QD-protein nanoassembly .....	111
Single cell nanoprobe for studying gene expression of individual cells.....	111
<i>Single cell nanoproteomics</i> .....	111
Study of proteins by atomic force microscopy .....	111

Study of proteomics at single molecule level .....	112
<i>Assays for protein expression at the single molecule level</i> .....	112
<i>Imaging proteins at the single-molecule level</i> .....	112
<i>Mass spectrometry of single-molecules using nanotechnology</i> .....	113
<i>Study of protein synthesis and single-molecule processes</i> .....	113
Role of nanotechnology in study of membrane proteins .....	114
<i>Nanoparticles for study of membrane proteins</i> .....	114
<i>Study of single protein interaction with cell membrane</i> .....	114
<i>Quantum dots to label cell surface proteins</i> .....	115
<i>Study of single membrane proteins at subnanometer resolution</i> .....	115
Self-assembling peptide scaffold technology for 3D cell culture .....	115
<b>Nanobiotechnology and ion channels</b> .....	<b>116</b>
AFM for characterization of ion channels .....	116
Aquaporin water channels .....	116
Nanopatch™ for study of ion channels at single molecule level .....	117
Remote control of ion channels through magnetic-field heating of nanoparticles .....	117
Role of nanobiotechnology in engineering ion channels .....	117
<b>Nanobiotechnology for single cell analysis</b> .....	<b>119</b>
<b>Nanotechnology and bioinformatics</b> .....	<b>119</b>
3D nano-map of synapse .....	119

<b>4. Nanomolecular Diagnostics</b> .....	<b>121</b>
<b>Introduction</b> .....	<b>121</b>
<b>Nanodiagnosics</b> .....	<b>121</b>
Rationale of nanotechnology for molecular diagnostics .....	123
<b>Nanoarrays for molecular diagnostics</b> .....	<b>123</b>
Fullerene photodetectors for chemiluminescence detection on microfluidic chip .....	123
Microfluidics and nanotech tools for single cell analysis .....	123
Nanofluidic/nanoarray devices to detect a single molecule of DNA .....	124
Protein nanoarrays .....	125
Protein nanobiochip .....	125
Silver nanorod array for on-chip detection of microbes and chemicals .....	125
<b>AFM for molecular diagnostics</b> .....	<b>126</b>
Nanofountain AFM probe .....	126
AFM for immobilization of biomolecules in high-density microarrays .....	126
AFM for nanodissection of chromosomes .....	126
<b>Nanoparticles for molecular diagnostics</b> .....	<b>127</b>
3DNA® Dendrimers for diagnostics .....	127
Carbon nanotubes .....	127
Exosome-based molecular diagnostics .....	127
Gold nanoparticles .....	128
Quantum dots for molecular diagnostics .....	128
<i>QDs for detection of pathogenic microorganisms</i> .....	129
<i>Bioconjugated QDs for multiplexed profiling of biomarkers</i> .....	129
<i>Imaging of living tissue with QDs</i> .....	129
Use of nanocrystals in immunohistochemistry .....	130
Magnetic nanoparticles .....	130
<i>Magnetic nanoparticles for bioscreening</i> .....	130
<i>Monitoring of implanted NSCs labeled with nanoparticles</i> .....	131
<i>Perfluorocarbon nanoparticles to track therapeutic cells in vivo</i> .....	131
<i>Superparamagnetic nanoparticles for cell tracking</i> .....	131
<i>SPIOs for real-time tracking of viral delivery</i> .....	132
<i>SPIOs for calcium sensing</i> .....	132
<i>Magnetic nanoparticles for labeling molecules</i> .....	132
<i>Study of living cells by SPIOs</i> .....	133
Imaging applications of nanoparticles .....	133
<i>CT image enhancement by nanoparticles</i> .....	133
<i>Dendritic nanoprobes for imaging of angiogenesis</i> .....	134
<i>Functionalized MWCNTs as ultrasound contrast agents</i> .....	134
Nanoparticles as contrast-enhancing agents for MRI .....	134
<i>Gadolinium-loaded dendrimer nanoparticles for tumor-specific MRI</i> .....	135
<i>Gadonanotubes for MRI</i> .....	135
<i>Gold nanorods and nanoparticles as imaging agents</i> .....	135
<i>In vivo imaging using nanoparticles</i> .....	136
<i>Manganese oxide nanoparticles as contrast agent for brain MRI</i> .....	136
<i>Magnetic nanoparticles as contrast agents for MRI of pancreas</i> .....	136
<i>Nanoparticles as contrast agent for MRI</i> .....	136
<i>Optical molecular imaging using targeted magnetic nanoprobes</i> .....	137
<i>QDs for biological imaging</i> .....	137
<i>SPIOs combined with MRI</i> .....	138
<i>Concluding remarks and prospects of nanoparticles for imaging</i> .....	139

<b>Applications of nanopore technology for molecular diagnostics.....</b>	<b>139</b>
Nanopore technology for detection of single DNA molecules .....	139
Nanocytometry .....	139
<b>DNA-protein and -nanoparticle conjugates .....</b>	<b>140</b>
<b>Resonance Light Scattering technology .....</b>	<b>140</b>
<b>Nanobarcodes technology.....</b>	<b>141</b>
Nanobarcode particle technology for SNP genotyping .....	141
QD nanobarcode for multiplexed gene expression profiling .....	142
Biobarcode assay for proteins.....	142
Single-molecule barcoding system for DNA analysis .....	144
<b>Nanoparticle-based colorimetric DNA detection method.....</b>	<b>144</b>
<b>Nanoparticle-based up-converting phosphor technology .....</b>	<b>145</b>
<b>Surface-Enhanced Resonant Raman Spectroscopy.....</b>	<b>145</b>
<b>Near-infrared (NIR)-emissive polymersomes .....</b>	<b>146</b>
<b>Nanobiotechnology for detection of proteins .....</b>	<b>146</b>
Captamers with proximity extension assay for proteins.....	146
Immunoliposome-PCR .....	147
<b>Nanobiosensors .....</b>	<b>147</b>
Cantilevers as biosensors for molecular diagnostics .....	147
<i>Advantages of cantilever technology for molecular recognition.....</i>	<i>148</i>
<i>Antibody-coated nanocantilevers for detection of microorganisms .....</i>	<i>149</i>
Carbon nanotube biosensors .....	149
<i>Carbon nanotube sensors coated with ssDNA and electronic readout .....</i>	<i>150</i>
<i>Carbon nanotubes sensors wrapped with DNA and optical detection .....</i>	<i>150</i>
FRET-based DNA nanosensor.....	151
Graphene biosensor based on Raman spectroscopy .....	151
Ion channel switch biosensor technology.....	151
Electrochemical nanobiosensor .....	151
Electronic nanobiosensors .....	152
Metallic nanobiosensors .....	152
Nanomaterial-based sensors for diagnosis from exhaled breath .....	153
Quartz nanobalance biosensor .....	153
Viral nanosensor .....	153
PEBBLE nanosensors .....	154
Detection of cocaine molecules by nanoparticle-labeled aptasensors.....	154
Nanosensors for glucose monitoring .....	154
Nanobiosensors for protein detection.....	155
Optical biosensors.....	155
<i>Laser nanosensors .....</i>	<i>155</i>
<i>Interferometric reflectance imaging sensors .....</i>	<i>156</i>
<i>Nanoshell biosensors.....</i>	<i>156</i>
<i>Plasmonics and SERS nanoprobe.....</i>	<i>156</i>
<i>Optical mRNA biosensors .....</i>	<i>157</i>
<i>Surface Enhanced Microoptical Fluidic Systems .....</i>	<i>157</i>
<i>Nanoparticle-enhanced sensitivity of fluorescence-based biosensors.....</i>	<i>158</i>
Nanowire biosensors .....	158
<i>Nanowire biosensors for detection of cancer biomarkers .....</i>	<i>159</i>
<i>Nanowire biosensors for detection of single viruses .....</i>	<i>160</i>
<i>Nanowires for detection of genetic disorders.....</i>	<i>160</i>
<i>Nanowires biosensor for detecting biowarfare agents.....</i>	<i>160</i>
<i>Concluding remarks and prospects of nanowire biosensors.....</i>	<i>160</i>
Future issues in the development of nanobiosensors .....	161
<b>Applications of nanodiagnosics.....</b>	<b>161</b>
Nanotechnology for detection of biomarkers .....	161
Nanotechnology for genotyping of single-nucleotide polymorphisms .....	162
<i>Nanoparticles for detecting SNPs.....</i>	<i>162</i>
<i>Nanopores for detecting SNPs.....</i>	<i>162</i>
Nanobiotechnologies for single molecule detection .....	163
Protease-activated QD probes .....	163
Labeling of MSCs with QDs.....	164
Nanotechnology for point-of-care diagnostics .....	164
<i>Nanoswitch-linked immunosorbent assay.....</i>	<i>165</i>
<i>Nanotechnology-based biochips for POC diagnosis .....</i>	<i>165</i>
<i>Carbon nanotube transistors for genetic screening .....</i>	<i>165</i>
<i>POC monitoring of vital signs with nanobiosensors .....</i>	<i>166</i>
<i>Nanodiagnosics for the battle field and biodefense .....</i>	<i>166</i>
<i>NANOANTENNA project of European Commission .....</i>	<i>167</i>
Nanodiagnosics for integrating diagnostics with therapeutics .....	167
<b>Concluding remarks about nanodiagnosics.....</b>	<b>167</b>
<b>Clinical trials of nanodiagnosics .....</b>	<b>168</b>
<b>Future of nanodiagnosics .....</b>	<b>169</b>

<b>5. Nanopharmaceuticals .....</b>	<b>170</b>
<b>Introduction .....</b>	<b>170</b>
<b>Nanobiotechnology for drug discovery .....</b>	<b>170</b>
Nanofluidic devices for drug discovery .....	171
Gold nanoparticles for drug discovery .....	172
<i>Tracking drug molecules in cells.....</i>	<i>172</i>
<i>SPR with colloidal gold particles.....</i>	<i>172</i>
Use of QDs for drug discovery .....	172
<i>Advantages of the use of QDs for drug discovery .....</i>	<i>172</i>
<i>Drawbacks of the use of QDs for drug discovery .....</i>	<i>173</i>
<i>QDs for imaging drug receptors in the brain .....</i>	<i>174</i>
Lipoparticles for drug discovery .....	174
<i>Biosensor for drug discovery with Lipoparticles.....</i>	<i>174</i>
Magnetic nanoparticles assays.....	175
Analysis of small molecule-protein interactions by nanowire biosensors .....	175
Cells targeting by nanoparticles with attached small molecules .....	175
Role of AFM for study of biomolecular interactions for drug discovery .....	176
Nanoscale devices for drug discovery .....	176
<i>Laboratories-on-a-chip .....</i>	<i>176</i>
<i>Lab-on-Bead .....</i>	<i>176</i>
<i>Nanotechnology for drug design at cellular level .....</i>	<i>177</i>
Role of nanobiotechnology in the future of drug discovery.....	177
<b>Nanobiotechnology-based drug development .....</b>	<b>177</b>
Dendrimers as drugs .....	177
Fullerenes as drug candidates.....	178
Nanobodies .....	179
<i>RANbodies .....</i>	<i>180</i>
<i>Companies involved in nanobodies.....</i>	<i>181</i>
<b>Preclinical studies of nanoparticles in animals and humans .....</b>	<b>181</b>
<b>Manufacture of nanomedicines .....</b>	<b>182</b>
Role of nanobiotechnology in microbial biofabrication .....	182
<b>Nanobiotechnology in drug delivery .....</b>	<b>182</b>
Ideal properties of material for drug delivery .....	182
Improved absorption of drugs in nanoparticulate form .....	183
Interaction of nanoparticles with human blood.....	183
Nanoscale devices delivery of therapeutics .....	183
Nanobiotechnology solutions to the problems of drug delivery .....	183
Nanocomposites for protein delivery.....	184
Nanocomposite membranes for magnetically triggered drug delivery .....	184
Nanosuspension formulations .....	184
Nanotechnology-based refilling of drug delivery depots through circulation .....	185
Self-assembled nanostructures with hydrogels for drug delivery .....	186
Nanomaterials and nanobiotechnologies used for drug delivery .....	186
<b>Viruses as nanomaterials for drug delivery.....</b>	<b>187</b>
<b>Bacteria-mediated delivery of nanoparticles and drugs into cells .....</b>	<b>187</b>
Bacterial viral membranes.....	188
<b>Cell-penetrating peptides .....</b>	<b>189</b>
<b>Nanoparticle-based drug delivery .....</b>	<b>189</b>
Cationic nanoparticles.....	190
Ceramic nanoparticles .....	190
Cyclodextrin nanoparticles for drug delivery .....	190
Dendrimers for drug delivery.....	191
<i>DNA-assembled dendrimers for drug delivery .....</i>	<i>191</i>
DNA tetrahedron-based drug delivery system.....	192
Exosomes for drug delivery .....	192
Fullerenes for drug delivery.....	193
<i>Amphiphilic fullerene derivatives.....</i>	<i>193</i>
<i>Fullerene conjugates for intracellular delivery of peptides.....</i>	<i>193</i>
Gold nanoparticles as drug carriers .....	193
Layered double hydroxide nanoparticles .....	194
Micelles for drug delivery .....	194
Nanocrystals .....	195
<i>Nanocrystalline silver .....</i>	<i>195</i>
<i>Elan's NanoCrystal technology .....</i>	<i>195</i>
<i>Biorise system.....</i>	<i>196</i>
Nanodiamonds.....	197
Polymer nanoparticles .....	197
<i>Biodegradable PEG nanoparticles for penetrating the mucus barrier .....</i>	<i>198</i>
<i>PLGA-based nanodelivery technologies .....</i>	<i>198</i>
<i>Polymeric micelles.....</i>	<i>198</i>
<i>Chitosan nanoparticles.....</i>	<i>199</i>

<i>Micelles for drug delivery in cancer</i> .....	273
<i>Minicells for targeted delivery of nanoscale anticancer therapeutics</i> .....	274
<i>Protein nanocages for penetration of airway mucous and tumors</i> .....	275
<i>Nanoconjugates for subcutaneous delivery of anticancer drugs</i> .....	275
<i>Nanomaterials for delivery of poorly soluble anticancer drugs</i> .....	276
<i>Nanoparticle formulation for enhancing anticancer efficacy of cisplatin</i> .....	276
<i>Nanoparticle formulations of paclitaxel</i> .....	276
<i>Nanoparticles containing albumin and antisense oligonucleotides</i> .....	277
<i>Nanorobots for anticancer drug delivery</i> .....	277
<i>Niosomes for anticancer drug delivery</i> .....	278
<i>Pegylated nanoliposomal formulation</i> .....	278
<i>Peptide-linked nanoparticle delivery</i> .....	278
<i>Poly-2-hydroxyethyl methacrylate nanoparticles</i> .....	279
<i>Polypeptide-doxorubicin conjugated nanoparticles</i> .....	279
<i>Porous silicon nanoparticles for cancer drug delivery</i> .....	279
<i>Protosphere nanoparticle technology</i> .....	280
<i>siRNA delivery in combination with nanochemotherapy</i> .....	280
<i>Zinc oxide nanoparticles for drug delivery in cancer</i> .....	280
Nanoparticles for targeted delivery of anticancer therapeutics .....	281
<i>Aptamer nanoformulations for targeted anticancer therapy</i> .....	281
<i>Bacteriophage capsid-based nanoparticles for targeted cell-delivery</i> .....	282
<i>Canine parvovirus as a nanocontainer for targeted drug delivery</i> .....	282
<i>Carbon nanotubes for targeted drug delivery to cancer cells</i> .....	283

Carbon magnetic nanoparticles for targeted drug delivery in cancer .....	283
Chitosan nanoparticles for targeted anticancer drug delivery .....	284
CRLX101 for targeted anticancer drug delivery .....	284
Cycloset system for targeted delivery of anticancer therapeutics.....	284
Fullerenes for enhancing tumor targeting by antibodies .....	284
Gold nanoparticles for targeted drug delivery in cancer .....	285
Hepatic artery infusion of LDL-DHA nanoparticles for liver cancer.....	286
Hyaluronic acid nanocarriers for targeted anticancer therapeutics .....	287
Magnetic nanoparticles for remote-controlled drug delivery to tumors .....	287
Mesoporous silica nanoparticles .....	288
Monitoring of targeted delivery by nanoparticle-peptide conjugates.....	288
Nanobees for targeted delivery of cytolytic peptide melittin .....	288
Nanobody-shell polymeric micelles for targeted drug delivery .....	289
Nanocarrier-based targeted delivery of RNAi-based therapy .....	289
Nanoformulations of monoclonal antibodies for targeted drug delivery.....	289
Nanogel-based stealth cancer vaccine targeting macrophages .....	290
Nanovehicles for targeted delivery of paclitaxel.....	290
Nanocell for targeted drug delivery to tumor .....	291
Nanodiamonds for local delivery of chemotherapy at site of cancer .....	291
Nanoimmunoliposome-based system for targeted delivery of siRNA .....	292
Nanoparticle-mediated targeting of MAPK signaling pathway .....	292
Nanoparticles for targeted antisense therapy of cancer .....	292
Nanoparticles for delivery of suicide DNA to prostate tumors .....	293
Nanoparticles for targeted delivery of concurrent chemoradiation.....	293
Nanoparticle-based therapy targeted to cancer metastases .....	293
Nanoparticle-mediated delivery of multiple anticancer agents .....	294
Nanostructured hyaluronic acid for targeted drug delivery in cancer .....	294
Perfluorocarbon emulsion for targeted chemotherapeutic delivery .....	294
Polymer nanoparticles for targeted drug delivery in cancer .....	295
Polymersomes for targeted cancer drug delivery .....	296
Quantum dots and quantum rods for targeted drug delivery in cancer .....	296
Remote controlled drug delivery from magnetic nanocrystals.....	297
Targeted delivery of nanoparticulate drugs into lymphatic system .....	297
Targeted drug delivery with nanoparticle-aptamer bioconjugates .....	297
Use of T cells for delivery of gold nanoparticles to tumors .....	298
Dendrimers for anticancer drug delivery .....	298
Application of dendrimers in boron neutron capture therapy .....	299
Application of dendrimers in photodynamic therapy.....	300
Dendrimer-based synthetic vector for targeted cancer gene therapy .....	300
Poly-L-lysine dendrimer as antiangiogenic agent .....	301
RNA nanotechnology for delivery of cancer therapeutics .....	301
Delivery of siRNAs for cancer.....	301
Combination delivery systems for nanoparticle penetration into tumor tissue .....	302
<b>Nanotechnology-based cancer therapy .....</b>	<b>302</b>
Devices for nanotechnology-based cancer therapy .....	302
Convection-enhanced delivery with nanoliposomal CPT-11 .....	302
Nanoengineered silicon for brachytherapy.....	303
Anticancer effect of nanoparticles.....	303
Antiangiogenic therapy using nanoparticles .....	303
Cytotoxic effects of cancer nanoparticles.....	303
Gold nanoparticles for inhibiting tumor growth.....	304
Nanoshell-based cancer therapy .....	304
Nanobody-based cancer therapy .....	304
Nanosecond pulsed electric fields for cancer therapy .....	305
Nanoparticles combined with physical agents for tumor ablation .....	305
Boron neutron capture therapy using nanoparticles .....	305
Gold nanoparticles combined with radiation therapy .....	306
Laser-induced cancer destruction using nanoparticles.....	306
Nanoparticle-mediated thermal ablation of cancer.....	308
Temperature-sensitive liposomes for cancer destruction .....	310
Ultrasound radiation of tumors combined with nanoparticles .....	310
Nanomedicines combined with molecular targeted anticancer therapeutics.....	311
Bispecific nanobioconjugate for targeted cancer immunotherapy.....	311
Impact of nanotechnology-based imaging in management of cancer .....	311
Cornell dots for cancer imaging.....	311
Nanoparticles and optoacoustic imaging in management of cancer .....	312
Nanoparticle-MRI for tracking dendritic cells in cancer therapy .....	313
Nanoparticle-CT scan.....	313
Nanosensor device as an aid to cancer surgery.....	313
Nanoparticle-based imaging in oncology clinical trials .....	314
QDs aid lymph node mapping in cancer .....	314

<i>Single wall carbon nanotubes for targeted imaging of tumors</i> .....	314
Nanoparticles for targeted therapy of tumors .....	315
Nanocarriers with TGF- $\beta$ inhibitors for targeting cancer.....	315
Nanobombs for cancer.....	315
Nanoparticle-based anticancer drug delivery to overcome MDR.....	316
<i>Time-delayed, dual-drug nanoparticle delivery system</i> .....	316
Combination of diagnostics and therapeutics for cancer .....	317
<i>Aptamer conjugated magnetic nanoparticles</i> .....	317
<i>Biomimetic nanoparticles targeted to tumors</i> .....	317
<i>Dendrimer nanoparticles for targeting and imaging tumors</i> .....	318
<i>Gold nanoparticle plus bombesin for imaging and therapy of cancer</i> .....	318
<i>Gold nanorods for diagnosis plus photothermal therapy of cancer</i> .....	318
<i>Gold nanotubes for diagnosis plus photothermal therapy of cancer</i> .....	319
<i>Magnetic nanoparticles for imaging as well as therapy of cancer</i> .....	319
<i>Micelles for targeted drug delivery and PET imaging in cancer</i> .....	320
<i>Nanobialys for combining MRI with delivery of anticancer agents</i> .....	320
<i>Nanoparticles, MRI and thermal ablation of tumors</i> .....	320
<i>pHLIP nanotechnology for detection and targeted therapy of cancer</i> .....	321
<i>QD conjugates combine cancer imaging, therapy and sensing</i> .....	321
<i>Silica nanoparticles for combining diagnosis with cancer therapy</i> .....	321
<i>Squalene-based nanocomposites for tumor imaging and therapy</i> .....	322
<i>Radiolabeled carbon nanotubes for tumor imaging and targeting</i> .....	322
<i>Ultrasonic tumor imaging and targeted chemotherapy by nanobubbles</i> .....	322
Role of nanobiotechnology in cancer immunology .....	323
Nanorobotics for management of cancer .....	324
<i>Bacterial nanorobots for targeting cancer</i> .....	324
<i>DNA robots for targeting cancer</i> .....	324
Fullerenes for protection against chemotherapy-induced cardiotoxicity .....	325
Concluding remarks and future of nanooncology .....	325

## **9. Nanoneurology ..... 327**

### **Introduction ..... 327**

### **Nanobiotechnology for neurophysiological studies ..... 327**

Nanoelectrodes in neurophysiology .....	327
Chronic EEG recording .....	327
Nanoscale devices for network-level electrophysiology.....	327
Chronic subcellular recording from implanted electrodes .....	328
Nanowires for monitoring brain activity via blood vessels .....	328
Gold nanoparticles for in vivo study of neural function .....	329

### **Nanodiagnosis and nanoparticle-based brain imaging ..... 329**

Applications of nanotechnology in molecular imaging of the brain .....	329
Nanoparticles and MRI for macrophage tracking in the CNS.....	330
Nanoparticles for tracking stem cells for therapy of CNS disorders .....	330
Multifunctional NPs for diagnosis and treatment of brain disorders .....	331

### **Nanotechnology-based drug delivery to the CNS ..... 331**

Nanotechnology-based drug delivery for neurodegenerative disorders .....	331
<i>Nanoencapsulation for delivery of vitamin E for Alzheimer disease</i> .....	331
<i>Selegiline-PEG nanoparticles targeting A<math>\beta</math> fibrils in Alzheimer disease</i> .....	331
Nanoparticles for drug delivery across BBB .....	331
<i>Carbon nanotubes for drug delivery to the CNS</i> .....	332
<i>Nanoagonists of adenosine receptor for delivery across BBB</i> .....	333
<i>Nanovesicles for transport across BBB</i> .....	333
<i>Polymeric nanoparticles as carriers for CNS drug delivery</i> .....	334
Mechanism of the nanoparticle-mediated transport of the drugs across the BBB .....	334
<i>Transcytosis of transferrin-containing nanoparticles across the BBB</i> .....	334
Nanotechnology-based strategies for drug delivery across BBB .....	334
<i>G-Technology®</i> .....	334
<i>LipoBridge™ technology</i> .....	335
Nanotechnology-based drug delivery to brain tumors .....	335
<i>Intravenous gene delivery with nanoparticles into brain tumors</i> .....	335
<i>Micelles for delivery of chemotherapy to brain tumors</i> .....	335
<i>Multifunctional nanoparticles for treating brain tumors</i> .....	336
<i>Nanoparticles for delivery of drugs to brain tumors across BBB</i> .....	336
<i>NP delivery across the BBB for imaging and therapy of brain tumors</i> .....	337
<i>NP-based targeted delivery of chemotherapy across the BBB</i> .....	337
<i>PLA nanoparticles for controlled delivery of BCNU to brain tumors</i> .....	338
Nanoparticles as nonviral vectors for CNS gene therapy.....	338
<i>Silica nanoparticles for CNS gene therapy</i> .....	338
<i>Cationic lipids for CNS gene therapy</i> .....	339
<i>Polyethylenimine-based nanoparticles for CNS gene therapy</i> .....	339
<i>Dendrimers for CNS gene therapy</i> .....	339

<i>Carbon nanotubes for CNS gene therapy</i> .....	339
Nanoparticle-based drug delivery to the inner ear .....	340
Nanotechnology-based devices and implants for CNS .....	340
<b>Nanobiotechnology and neuroprotection .....</b>	<b>340</b>
Neuroprotection due to antioxidant effect of nanoparticles .....	341
Neuroprotective nanoparticles that inhibit neuroinflammation .....	342
Neuroprotective nanoparticles that inhibit A $\beta$ formation .....	342
<b>Nanobiotechnology for regeneration and repair of the CNS .....</b>	<b>342</b>
Nanowire neuroprosthetics with functional membrane proteins .....	342
Nanotube-neuron electronic interface .....	343
Role of nanobiotechnology in regeneration and repair following CNS trauma .....	343
<i>Nanofibers as an aid to CNS regeneration by neural progenitor cells</i> .....	343
<i>Peptide nanostructures for repair of the CNS</i> .....	344
Nanobiotechnology for repair and regeneration following TBI.....	344
Nanoparticles for repair following SCI .....	344
<i>Repair of SCI by nanoscale micelles</i> .....	345
Nanobiotechnology-based devices for restoration of neural function .....	345
<i>Nanobiotechnology-based artificial retina</i> .....	345
<b>Role of nanomedicine in treatment of neurodegenerative disorders.....</b>	<b>346</b>
<b>Nanopsychiatry .....</b>	<b>346</b>
<b>Nanoneurosurgery .....</b>	<b>346</b>
Bucky balls for brain cancer .....	347
Electrospun nanofiber tubes for regeneration of peripheral nerves.....	347
Femtolasers for neurosurgery .....	347
Graphene technology for neurosurgery .....	348
Nanofiber brain implants.....	348
<i>Nanoparticles as an aid to neurosurgery</i> .....	348
Nanoscaffold for CNS repair .....	349
<b>Application of nanobiotechnology to pain therapeutics.....</b>	<b>349</b>
<b>10. Nanocardiology .....</b>	<b>351</b>
<b>Introduction .....</b>	<b>351</b>
<b>Nanotechnology-based cardiovascular diagnosis.....</b>	<b>351</b>
Detection of biomarkers of myocardial infarction in saliva by a nanobiochip.....	351
Nanobiosensors for detection of cardiovascular disorders .....	351
Use of magnetic NPs as MRI contrast agents for cardiac imaging .....	351
Perfluorocarbon NPs for combining diagnosis with therapy in cardiology.....	352
Cardiac monitoring in sleep apnea.....	352
Detection and treatment of atherosclerotic plaques in the arteries .....	352
Monitoring for disorders of blood coagulation.....	353
<b>Nanotechnology-based therapeutic delivery in cardiology.....</b>	<b>353</b>
Combination of diagnostics with therapeutics .....	353
Controlled delivery of nanoparticles to injured vasculature .....	354
Nanobiotechnology-based therapeutic delivery in myocardial ischemia .....	354
<i>IGF-1 delivery by nanofibers for cell therapy of myocardial infarction</i> .....	355
<i>Injectable peptide nanofibers for myocardial ischemia</i> .....	355
Liposomal nanodevices for targeted cardiovascular drug delivery .....	355
Low molecular weight heparin-loaded polymeric nanoparticles.....	356
Magnetic antibody-linked nanoparticles to deliver cells to the heart.....	356
Nanoparticles for cardiovascular imaging and targeted drug delivery .....	356
Nanofiber-based scaffolds with drug-release properties .....	357
NP-based systemic drug delivery to prevent cardiotoxicity .....	357
Targeted nanoparticle-DNA delivery to the cardiovascular system .....	357
<b>Nanotechnology-based therapeutics for cardiovascular diseases .....</b>	<b>358</b>
Nanolipoblockers for atherosclerotic arterial plaques.....	358
Nanoparticle-mediated drug delivery for atherosclerotic heart disease .....	358
Nanotechnology approach to the vulnerable plaque as cause of cardiac arrest .....	358
<b>Nanotechnology for regeneration of the cardiovascular system .....</b>	<b>359</b>
Nanotechnology for cardiac revascularization .....	359
Nanocomposite hydrogels for myocardial tissue engineering.....	359
<b>Nanotechnology-based stents.....</b>	<b>360</b>
Restenosis after percutaneous coronary angioplasty.....	360
<i>Drugs encapsulated in biodegradable nanoparticles</i> .....	361
<i>Magnetic nanoparticle-coated DES</i> .....	361
<i>Magnetic nanoparticles encapsulating paclitaxel targeted to stents</i> .....	362
<i>Nanocoated DES</i> .....	362
<i>Nanopores to enhance compatibility of DES</i> .....	363
<b>Application of nanotechnology in cardiac catheterization .....</b>	<b>363</b>
<b>11. Nanopulmonology .....</b>	<b>365</b>
<b>Introduction .....</b>	<b>365</b>

<b>Nanoparticles for pulmonary drug delivery .....</b>	<b>365</b>
Systemic drug delivery via pulmonary route .....	365
Nanoparticle drug delivery for effects on the respiratory system .....	365
Fate and toxicology of nanoparticles delivered to the lungs .....	366
Nanoparticle drug formulations for spray inhalation .....	366
Nanobiotechnology for improving insulin delivery in diabetes.....	367
<i>Inhalation of glucose-sensitive NP for regulated release of insulin</i> .....	367
<i>Pulmonary delivery of insulin by surface acoustic wave technology</i> .....	367
Nanotechnology-based pharmaceuticals for pulmonary disorders .....	367
<b>Nanotechnology-based treatment of pulmonary disorders .....</b>	<b>369</b>
Management of cystic fibrosis.....	369
Nanobiotechnology-based gene transfer in CF .....	369
<i>Nonviral DNA nanoparticle-mediated CFTR gene transfer</i> .....	369
<i>Liposome-mediated CFTR gene transfer</i> .....	370
<i>Magnetofection for enhancing nonviral gene transfer to the airways</i> .....	370
NP-based delivery of antibiotics for treatment of pulmonary infections in CF.....	370
Nanotechnology-based treatment of chronic obstructive pulmonary disease .....	371
Nanotechnology-based treatment of pulmonary inflammation.....	371
<b>12. Nanoorthopedics.....</b>	<b>373</b>
<b>Introduction .....</b>	<b>373</b>
Application of nanotechnology for bone research.....	373
Reducing reaction to orthopedic implants .....	373
Enhancing the activity of bone cells on the surface of orthopedic implants .....	374
Synthetic nanomaterials as bone implants.....	374
<i>NanoBone implants</i> .....	374
<i>NanoBone versus BioOss</i> .....	375
Nanoparticles for repairing bone cracks .....	375
Nanotechnology-based bone regeneration .....	375
<i>Delivery of growth factors for bone repair and regeneration</i> .....	375
<i>Role of nanoparticles in regenerative therapy for osteoporosis</i> .....	376
Aligning nanotubes to improve artificial joints.....	376
Carbon nanotubes as scaffolds for bone growth .....	376
Nanoparticle-based hydrogels for cartilage regeneration .....	377
Nanotechnology for engineering of cartilage replacement.....	377
Cartilage disorders of knee joint .....	378
<i>Nanotechnology as an aid to arthroscopy</i> .....	378
<i>Nanotechnology-based therapy for osteoarthritis</i> .....	379
<b>13. Nanoophthalmology.....</b>	<b>381</b>
<b>Introduction .....</b>	<b>381</b>
Nanocarriers for ocular drug delivery .....	381
<i>Dendrimers for drug delivery in ophthalmology</i> .....	382
<i>DNA nanoparticles for nonviral gene transfer to the eye</i> .....	382
<i>Nanoparticle-based topical drug application to the eye</i> .....	382
<i>Lipid nanoparticles for ocular drug delivery</i> .....	383
<i>Nanoparticles for intraocular drug delivery</i> .....	383
Nanoparticles impregnated ocular inserts for drug delivery to the eye .....	384
Ophthalmic drug delivery through nanoparticles in contact lenses .....	384
Nanotechnology-based therapeutics for eye disorders.....	384
<i>Nanotechnology for prevention of neovascularization</i> .....	385
<i>Nanoparticles as nonviral vectors for gene therapy of retinal disorders</i> .....	386
<i>Nanobiotechnology for treatment of glaucoma</i> .....	386
<i>Nanotechnology for treatment for age-related macular degeneration</i> .....	387
<b>14. Nanomicrobiology.....</b>	<b>389</b>
<b>Introduction .....</b>	<b>389</b>
<b>Nanodiagnosis of infections .....</b>	<b>389</b>
Detection of viruses .....	389
<i>Cantilever beams for detection of single virus particles</i> .....	389
<i>Carbon nanotubes-based detection of viruses</i> .....	389
<i>Electric fields for accelerating detection of viruses</i> .....	390

<b>20. Nanobiotechnology Markets</b> .....	<b>478</b>
<b>Introduction</b> .....	<b>478</b>
<b>Markets according to areas of applications</b> .....	<b>479</b>
Markets for nanomedicine .....	480
Markets for nanodiagnostics .....	480
Markets for biochips/microarrays .....	480
Imaging agents .....	481
Pharmaceuticals .....	481
<i>Role of nanobiotechnology in drug delivery market</i> .....	481
Nanobiotechnology in life sciences research market .....	482
<b>Markets according to technologies</b> .....	<b>482</b>
Markets for nanomaterials .....	482
Markets for biomedical nanodevices .....	482
<i>Markets for nanosensors</i> .....	483
Markets for nanotools .....	483
<b>Geographical distribution of markets</b> .....	<b>483</b>
<b>Nanobiotechnology in the US</b> .....	<b>484</b>
<b>Nanobiotechnology in the European Union</b> .....	<b>484</b>
Nano2Life .....	486
European Technology Platform on NanoMedicine .....	486
<b>Nanobiotechnology in Australia</b> .....	<b>487</b>

<b>Nanobiotechnology in Asia.....</b>	<b>487</b>
Japan .....	487
South Korea .....	488
China .....	488
Taiwan .....	489
India .....	490
<b>Nanobiotechnology in Russia .....</b>	<b>491</b>
<b>Nanobiotechnology in the developing world .....</b>	<b>491</b>
<b>Venture capital investment in nanotechnology .....</b>	<b>491</b>
<b>Big pharma and nanotechnology.....</b>	<b>492</b>
Impact of nanobiotechnology on markets for current pharmaceuticals .....	492
Unmet needs in nanobiotechnology .....	492
<b>Drivers for the development of nanobiotechnology markets.....</b>	<b>493</b>
<b>Strategies for developing markets for nanobiotechnology .....</b>	<b>493</b>
Collaborations of industry with academic research centers .....	494
Collaborations of pharmaceutical and nanotechnology companies .....	494
Collaboration of chemical industry and the government .....	494
Cost-benefit of nanotechnology-based drug delivery.....	495
Education of healthcare professionals .....	495
Education of the public .....	495
