A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries, and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently, he is a consultant at Jain PharmaBiotech.

Prof. Jain's 478 publications include 30 books (6 as editor + 24 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. He has also written a textbook of gene therapy which is the first book on this subject to be translated into the Chinese language. A book on gene therapy companies was published in 2000 by John Wiley & Sons. Updated material from both these books have been included in 2017 edition of a special report on Gene Therapy published by Jain PharmaBiotech Publications. Prof. Jain has edited "Drug Delivery Systems" (Humana/Springer 2008; 2nd ed 2014, 3rd edn 2019 in preparation) and "Drug Delivery to the Central Nervous System" (Humana/Springer 2010). His other recent books include "Handbook of Nanomedicine" (Springer 2008; Chinese edition, Peking University Press 2011, 2nd ed Springer 2012, 3rd ed 2017), "Textbook of Personalized Medicine" (Springer 2009; Japanese ed 2012; 2nd ed Springer, 2015), "Handbook of Biomarkers" (Springer 2010; Chinese edition, Chemical Industry Press 2016, 2nd ed Springer 2018, in press), "Handbook of Neuroprotection" (Springer 2011, 2nd edn 2019, in preparation), "Application of Biotechnology in Cardiovascular Disorders" (Springer 2011), "Application of Biotechnology in Neurology" (Springer 2013), and "Application of Biotechnology in Oncology" (Springer 2014). Some of these books contain chapters on nitric oxide. He has edited "Applied Neurogenomics" (Springer 2015).

TABLE OF CONTENTS

0. Executive Summary	13
1. Introduction	15
Nitric oxide	15
Historical aspects.....	15
Free radicals	16
Nitrogen cycle and NO.....	17
Role of NO in biology and medicine	17
Nitric oxide synthase	18
Structure and function NOS.....	18
Inducible nitric oxide synthase.....	20
<i>iNOS gene</i>	20
<i>Regulation of iNOS</i>	21
Regulation of endothelial nitric oxide synthase.....	21
<i>Interaction between eNOS and other proteins</i>	21
<i>Tetrahydrobiopterin</i>	22
<i>eNOS gene</i>	23
NOS-independent NO generation and circulation	23
Entero-salivary circulation of nitrate.....	23
Methods of study of NO and NOS	23
Colorimetric determination of NO ₂ ⁻ using the Greiss reagent.....	24
Chemiluminescence.....	24
High performance liquid chromatography	25
Bioimaging of NO	25
Electrochemical methods using amperometry	25
Method using micro ion electrodes	26
Metabolomics approach to study of NO metabolism	26
2. Nitric Oxide Pathways	27
Introduction	27
Mechanisms action of NO	28
NO-cGMP pathway	28
Nitrate-nitrite-NO pathway.....	29
Soluble guanylyl cyclase as the NO receptor	29
Oxidative stress pathways	29
NO and oxidative stress.....	30
Oxidative stress and the NO-cyclic GMP signal transduction pathway	30
NO and platelets	32
Mitochondrial NO-cytochrome c oxidase signaling pathway.....	32
Nitric oxide and cytochrome c oxidase	33
Dual role of NO as a free radical and a scavenger	34
NO and carbon monoxide.....	34
NO signaling and apoptosis.....	35
3. Role of NO in Physiology.....	37
Homeostasis of NO	37
Role of NO in adaptation to high altitude	37
NO as a biomarker	38
Functions of NO in various systems of the body.....	38
NO and proteins.....	39
<i>A proteomic method for identification of cysteine S-nitrosylation sites</i>	39
<i>Protein S-nitrosylation and intracellular transport processes</i>	39
<i>Cellular inactivation NO by iNOS aggresome formation</i>	39
NO and mitochondria.....	40
<i>Mitochondrial permeability and reperfusion injury</i>	41
Endocrine role of NO	41
Role of NO in the cardiovascular system	41
<i>NO and atrial natriuretic peptide</i>	42
<i>NOS in the cardiac myocyte</i>	42
<i>NO and the autonomic control of the heart rate</i>	43
<i>NO and vascular system</i>	44
<i>NO and vasodilatation</i>	45
<i>NO and blood pressure</i>	46
<i>Role of NO in the plasma compartment</i>	46
<i>Measurement of NO as a biomarker of cardiovascular function</i>	47
Hemoglobin, oxygen and nitric oxide	47
<i>Myoglobin and NO</i>	48
NO and pulmonary circulation.....	49

<i>Role of NO in the regulation of hypoxic pulmonary vasoconstriction</i>	49
Role of NO in the lymphatic system	49
Role of NO in the nervous system	50
<i>Neurovascular coupling of COX-2 and nNOS</i>	51
<i>Neuroglobin</i>	51
<i>NO and blood-brain barrier</i>	52
<i>NO as a neurotransmitter</i>	52
<i>Role of NO in consciousness</i>	52
<i>Role of NO in memory and learning</i>	53
<i>Role of NO in synaptic plasticity</i>	53
<i>Role of NO in the peripheral nervous system</i>	53
Role of NO in the cochlea.....	54
NO and neuroendocrine function.....	54
NO and pregnancy.....	54
Role of NO in penile erection.....	54
Role of NO in immune regulation.....	55
Role of NO in temperature regulation.....	56
Role of NO in gastrointestinal system.....	56
Role of NO in kidney function.....	56
Role of NO in liver.....	57
Role of NO in the skin.....	57
4. Role of NO in Diseases.....	59
Introduction.....	59
Cytotoxicity of reactive nitrogen species.....	59
Peroxynitrite, mitochondria and cell death.....	59
Diseases involving oxidative stress and nitric oxide.....	61
Stress-related disorders.....	62
Role of NO in allergic disorders.....	62
Inflammatory diseases.....	63
Autoimmune disorders.....	63
Role of NO in rheumatoid arthritis.....	64
Role of NO in infections.....	65
NO-mediated cytoprotection in bacteria.....	65
Nanoscale nanoparticle delivery for cutaneous infection.....	66
Leishmaniasis.....	66
Malaria and iNOS polymorphism.....	66
Susceptibility of <i>Mycobacterium leprae</i> to NO.....	67
Role of NO in the treatment of tuberculosis.....	67
Septic shock.....	67
Trypanosomiasis.....	68
Viral infections.....	68
Role of NO in anaphylactic shock.....	69
Role of NO in anemia and hypoxia.....	70
Role of NO in neurological disorders.....	70
Neurodegenerative diseases.....	70
<i>NO-induced mitochondrial dysfunction in neurodegeneration</i>	71
<i>White matter disorders</i>	71
<i>Amyotrophic lateral sclerosis</i>	71
<i>Alzheimer's disease</i>	72
<i>Role of NO in pathophysiology of Alzheimer's disease</i>	72
<i>Role of ApoE genotype</i>	75
<i>Parkinson's disease</i>	75
Traumatic brain injury.....	77
Epilepsy.....	78
Stroke.....	78
<i>Pathophysiology of cerebral ischemia</i>	78
<i>Role of NO in cerebral ischemia</i>	79
<i>eNOS gene polymorphisms as predictor of cerebral aneurysm rupture</i>	81
<i>Role of NO in assessment of cerebral and retinal blood flow</i>	81
<i>Role of NO in cerebral vasospasm after subarachnoid hemorrhage</i>	81
<i>Role of NO in neuroprotection</i>	82
<i>Stroke and heart disease</i>	82
Role of NO in peripheral neuropathy.....	83
<i>iNOS induction in experimental allergic neuritis</i>	83
<i>Role of NO in sciatica</i>	83
Role of NO in the pathogenesis of muscular dystrophy.....	83
Role of NO in neurological decompression sickness.....	84
Role of NO in psychiatric disorders.....	84
NO-dysregulation in schizophrenia.....	84
Role of NO in pathomechanism of cardiovascular disorders.....	85

Oxidative stress as a cause of cardiovascular disease	85
Role of NO in pathomechanism of cardiovascular diseases.....	85
<i>Role of iNOS in cardiovascular disease</i>	86
<i>Role of eNOS in cardiovascular disease</i>	86
<i>Role nNOS in cardiac arrhythmia and sudden death</i>	87
<i>Role of NO in atherosclerosis</i>	87
<i>Therapeutic stimulation of the nitrate-nitrite-NO pathway</i>	89
Role of NO in cardiopulmonary disorders.....	89
Role of NO in disturbances of vasodilation.....	89
<i>Caveolin-1 deficiency impairs NO synthesis and vasodilation</i>	90
Role of NO in hypercholesterolemia	90
NO and systemic hypertension.....	91
Coronary artery disease.....	92
Role of NO in the pathophysiology of angina pectoris.....	92
Congestive heart failure.....	93
<i>Calcium overload as a cause of heart failure</i>	93
<i>NO/redox disequilibrium in the failing heart</i>	93
Myocardial ischemia/reperfusion injury	94
NO pathway in cardiac hypertrophy.....	95
Role of NO in sickle cell disease.....	95
Role of NO in pulmonary disorders	96
Role of NO in the pathophysiology of asthma.....	96
<i>iNOS gene polymorphisms in asthma</i>	97
<i>Role of S-nitrosoglutathione in bronchodilation in asthma</i>	97
Monitoring of exhaled NO.....	98
Nasal NO as a biomarker of response to rhinosinusitis therapy	99
Elevated urinary NO as a biomarker of improved survival in ARDS	99
Pulmonary hypertension	100
Role of NO in renal disorders	100
Role of NOS in diabetic nephropathy	101
Role of NO in cancer	101
Inflammation, NO and colon cancer.....	102
Tumor hypoxia and NO	102
NO and p53 mutations.....	103
NO and matrix metalloproteinase.....	103
Role of NO in angiogenesis in cancer	103
Role of NO in diseases of the eye.....	105
Glaucoma	105
Role of NO in metabolic disorders.....	105
Metabolic syndrome	105
Obesity.....	106
Diabetes mellitus	106
Role of NO in gastrointestinal disorders	106
Role of L-arginine in intestinal adaptation	107
Role of NO in irritable bowel syndrome	107
Role of NO in inflammatory bowel diseases	107
Role of NO in celiac disease.....	107
Role of NO in diabetic gastroparesis	108
NO and diseases of the liver	108
Cirrhosis of liver	108
Hepatic encephalopathy.....	108
Role of NO in skin disorders.....	109
Role of NO and oxidative stress in the aging skin	109
Role of NO in wound healing.....	109
Role of NO in erectile dysfunction.....	110
Role of NO in pain.....	111
NO and pain of spinal cord origin	111
NO interaction with other receptors in pain	111
nNOS and pain	111
Role of NO in various types of pain.....	111
<i>Neuropathic pain</i>	111
<i>Role of NO in diabetic neuropathy</i>	112
<i>NO in oral and facial pain</i>	112
<i>Role of NO in migraine</i>	112
<i>Role of NO in osteoarthritis</i>	113
<i>NO and Fibromyalgia syndrome</i>	114
<i>Role of spinal NO in analgesic action</i>	114
Role of NO in nicotine addiction.....	115
Role of NO in carbon monoxide poisoning.....	115
Role of NO in chemically-induced toxicity.....	115
Peroxynitrite and drug-dependent toxicity.....	115

Paraquat neurotoxicity.....	116
Role of NO in radiation damage	116

5. Pharmacology of Nitric Oxide	117
Introduction	117
Cytotoxic vs cytoprotective role of NO	117
Antioxidants	117
<i>Ebselen</i>	118
<i>Nicaraven</i>	118
<i>Nitroxides</i>	119
Antioxidants in relation to NO.....	119
Nitric oxide as an antioxidant	119
NO-related drugs	120
Drugs that activate eNOS production.....	122
<i>Aspirin</i>	122
<i>Dehydroepiandrosterone</i>	122
Drugs that scavenge free radicals/NO.....	122
<i>Peroxynitrite scavengers</i>	122
<i>Ruthenium (III) polyaminocarboxylates</i>	123
<i>Nitrones</i>	123
Drugs that inhibit NO.....	123
<i>Ginko biloba</i>	123
<i>Epigallocatechin</i>	124
Delivery of nitric oxide.....	124
Targeted delivery of NO donors	125
Nitric oxide delivery by encapsulated cells.....	125
NO-lipid combination	125
NO-releasing coating to prevent infection of implanted devices	126
Nanoparticles for controlled/sustained release of NO	126
<i>Hydrogel/glass nanoparticles</i>	126
<i>Delivery of nanoparticles to vascular endothelium for release of NO</i>	126
Release of NO in tissues by extracorporeal shock wave application.....	126
Nitric oxide donors	127
Nitroglycerine/glycerine trinitrate.....	127
Isosorbide dinitrate	128
Sodium nitrite	128
Organic nitrites.....	128
NO-releasing NSAIDs	129
COX-inhibiting NO-donors	130
Grafting of NO-releasing structures on to existing drugs	131
Mesoionic Oxatriazoles	133
Cysteine-containing NO donors.....	133
Sodium nitroprusside.....	133
Syndnonimines	134
S-Nitrosothiols.....	134
<i>Cavosonstat</i>	135
Diazoniumdiolates.....	135
COX-2 inhibitors	135
NO hydrogels	136
Novel NO donors.....	136
NO mimetics	136
Comparison of classical nitrates, grafted NO donors, and NO mimetics	137
NO donors and soluble guanylate cyclase activation	137
NO donors for increasing the efficacy of chemotherapy	138
Factors that enhance availability of NO	138
Modulators of cyclic guanosine-3',5'-monophosphate-dependent protein kinases.....	139
NOS-modulating drugs.....	140
Drugs that activate eNOS.....	140
<i>Statins</i>	140
<i>Angiotensin converting enzyme inhibitors</i>	141
<i>17 Beta-estradiol</i>	141
<i>C-2431</i>	141
NOS inhibitors	141
<i>Rationale of NOS inhibitors</i>	141
<i>L-Arginine</i>	143
<i>Design of NOS inhibitors</i>	143
<i>Selective iNOS inhibitors</i>	144
<i>Non-amino acid-based inhibitors</i>	145
<i>Aminoguanidine</i>	145
<i>Heme ligands</i>	146
<i>Pterin antagonists</i>	146

<i>Fused-ring bio-isoteric models of arginine as NOS inhibitors</i>	146
<i>nNOS inhibitors</i>	146
<i>Lubeluzole</i>	148
<i>Neurotrophic factors</i>	148
<i>Therapies based on action of NOS as a paraquat diaphorase</i>	148
<i>Concluding remarks about NOS inhibiting drugs</i>	149
NO and stem cell-based therapy	149
Nitric oxide and gene therapy	150
NOS gene transfer	150
Inhibition of NOS by antisense technology	151
Drugs that modulate NO action on platelets	151
Action of NO and NO donors on platelets.....	152
NOS inhibitors and NO scavengers	152
Phosphodiesterase inhibitors	152
Activators of soluble guanylate cyclase	152
YC-1.....	152
A-350619	153
Cinaciguat.....	153
Secondary role of NO in the action of drugs	153
Selective serotonin reuptake inhibitors	153
P2Y receptors and NO.....	154
Calcium channel blockers and NO.....	154
Nitric oxide-based transdermal drug delivery.....	154
Mechanism of resistance of NO-based drugs.....	154
NO and nutraceuticals	155
Diet and endogenous production of NO	155
L-arginine as a nutraceutical	156
Nitrate and nitrite	156
Oleuropein	156
Role of NO in beneficial effects of chocolate.....	156

6. Therapeutic Applications 159

Introduction	159
Role of NO in the management of pulmonary disorders	159
Manufacture of NO gas for inhalation.....	159
NO inhalation for acute respiratory distress syndrome	159
<i>NO inhalation for premature children with pulmonary dysplasia</i>	160
<i>NO inhalation for premature children with respiratory failure</i>	160
Pulmonary hypertension	161
<i>NO-based treatment of pulmonary hypertension</i>	161
<i>Pediatric pulmonary hypertension</i>	161
<i>Gene therapy for pulmonary hypertension</i>	162
<i>Clinical trials of NO therapies for pulmonary arterial hypertension</i>	163
Asthma.....	164
<i>iNOS inhibitors for asthma</i>	164
<i>NO for bronchodilation in asthma</i>	164
Role of NO in acute lung injury after smoke inhalation	164
Cardiovascular disorders	165
Role of NO in cardioprotection	165
Role of NO in the management of myocardial infarction	166
Role of NO in the management of hypertension	167
Role of NO in the management of angina pectoris	168
Role of NO in therapy of coronary heart disease.....	168
NO-releasing aspirin in patients undergoing CABG	169
Management of coronary restenosis	169
<i>Modified NO donors</i>	169
<i>NO-generating stent for coronary restenosis</i>	170
<i>eNOS gene therapy for restenosis</i>	171
NO-based management of cardiac hypertrophy.....	171
Congestive heart failure.....	172
<i>Limitation of antioxidant therapy in congestive heart failure</i>	172
<i>NO-based therapies for congestive heart failure</i>	172
<i>eNOS gene therapy for congestive heart failure</i>	172
<i>Gene transfer of nNOS in congestive heart failure</i>	172
NO-based therapy for management of cardiogenic shock	173
NO-based therapy for cardiac arrhythmias	173
Prophylaxis of cardiovascular disorders.....	173
<i>Prevention of atherosclerosis with aging</i>	174
Role of iNO in cardiac surgery.....	174
Strategies for increasing NO signaling in cardiovascular disorders	174
Peripheral vascular disorders.....	175

<i>Peripheral atherosclerotic arterial disease</i>	175
<i>Peripheral ischemic disease</i>	175
<i>An eNOS mutant as therapeutic for peripheral vascular ischemia</i>	176
<i>Sodium nitrite therapy for peripheral vascular ischemia</i>	176
<i>Raynaud's phenomenon</i>	176
Neurological disorders	177
Cerebrovascular ischemic disorders	177
<i>Attenuation of NO for neuroprotection in cerebral ischemia</i>	177
<i>Use of NO donors in cerebral ischemia</i>	178
<i>Use of NO donors in cerebral reperfusion injury</i>	178
<i>NO-based treatments for cerebral vasospasm due to SAH</i>	179
<i>NOS gene therapy for cerebral vasospasm</i>	179
Degenerative CNS disorders	180
<i>Statins for Alzheimer's disease</i>	180
<i>NO mimetics for Alzheimer's disease</i>	180
<i>iNOS inhibitors for treatment of Alzheimer's disease</i>	181
<i>NO-NSAIDs for Alzheimer's disease</i>	181
<i>Ginko biloba for Alzheimer's disease</i>	181
<i>Personalization of NO-based therapy for Alzheimer's disease</i>	181
Role of NO in the treatment of traumatic brain injury	182
Neuroinflammatory disorders	182
Role of NO-releasing sodium nitroprusside in the treatment of schizophrenia	182
Antidepressant effect of NOS inhibitors	183
Muscular dystrophy	183
Vestibulotoxicity	184
NO for opening the blood-brain barrier	184
Cochlear disorders	185
Cochlear ischemia	185
Role of NO in sensoryneural hearing loss	185
Ophthalmic disorders	185
<i>Glaucoma</i>	185
Pain	186
NO-based therapies for pain	186
Treatment of diabetic neuropathy with isosorbide dinitrate spray	186
NO-based therapies for migraine	187
NO-based therapy for fibromyalgia syndrome	187
NO-based therapies for inflammatory disorders	187
NO-based therapies for gastrointestinal disorders	187
Protection of gastrointestinal injury from NSAIDs	187
Role of NO in the treatment of inflammatory bowel disease	188
Topical nitroglycerin for chronic anal fissure	188
Cancer	189
Mechanism of action of NO in cancer	189
Antineoplastic effect of iNOS-expressing cells	189
Role of NO in drug resistance of cancer	189
Role of NO in treatment of brain tumors	190
NO-induced apoptosis	190
Role of NO in antiangiogenesis therapies in cancer	191
NO donors for the treatment of cancer	191
NO-releasing NSAIDs and colon cancer chemoprevention	191
Rationale of combining NO aspirin with cancer vaccines	192
NO-based cancer gene therapy	192
Transdermal nitroglycerine for prostate cancer	193
NO-based therapies for skin disorders	193
NO-based therapies for skin infections	193
Role of NO in the treatment of psoriasis	194
NO-based therapy for sickle cell anemia	194
Inhaled NO for acute respiratory distress syndrome in sickle cell disease	194
NO inhalation for pulmonary hypertension in sickle cell anemia	195
Role of NO in disorders associated with pregnancy	195
Pre-eclampsia and intra-uterine growth restriction	195
Use of NO donors in management of labor	196
Erectile dysfunction	196
Selective inhibitors of phosphodiesterase 5	196
Erectile dysfunction in diabetes	197
NO-donating substances for treatment of ED	197
NOS gene transfer for ED	198
Organ transplant rejection	198
Role of NO in the treatment of renal disorders	199
Role of NO in the treatment of hepatic disorders	200
Portal hypertension	200

NO inhalation for restoration of liver function following transplantation	200
Role of NO in blood transfusion	201
Role of NO in the treatment of osteoporosis	201
NO-based wound healing	202
7. Evaluation of NO-Based Drugs	203
Current status.....	203
Antioxidant vs. NO-based approaches	203
SWOT analysis of selected approaches for NO modulation.....	203
NO donors by grafting of NO-releasing structures	203
NOS modulation	204
Challenges of developing NO-based therapies	205
Concluding remarks and future prospects.....	205
8. Markets for NO-based Therapies.....	207
Introduction	207
Impact of NO-based therapies on international markets	207
Share of NO-based therapies in major therapeutic areas.....	207
Share of NO-based therapies in cardiovascular disorders	208
Hypercholesterolemia	208
Myocardial infarction	209
Angina pectoris/coronary artery disease	209
Heart failure.....	209
Coronary restenosis and stenting	209
Strategies for developing NO-based therapy markets.....	209
Addressing the unfulfilled needs.....	210
Multidisciplinary approaches.....	210
Collaboration between the academia and the industry	211
Education of the public	211
9. Companies	213
Introduction	213
Profiles of companies with focus on NO	215
Major pharmaceutical companies with involvement in NO	225
Smaller biotech and pharmaceutical companies involved in NO.....	229
Biopharmaceutical companies involved in antioxidant research	239
Companies supplying NO equipment for healthcare.....	243
Academic institutes with commercial collaboration in NO research	247
Companies supplying NO products for research.....	248
Collaborations.....	252
10. References.....	253
