A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries, and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently, he is a consultant at Jain PharmaBiotech.

Prof. Jain's 470 publications include 28 books (5 as editor + 23 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. He has also written a textbook of gene therapy which is the first book on this subject to be translated into the Chinese language. A book on gene therapy companies was published in 2000 by John Wiley & Sons. Updated material from both these books have been included in 2017 edition of a special report on Gene Therapy published by Jain PharmaBiotech Publications. Prof. Jain has edited "Drug Delivery Systems" (Humana/Springer 2008; 2nd ed 2014) and "Drug Delivery to the Central Nervous System" (Humana/Springer 2010). His other recent books include "Handbook of Nanomedicine" (Springer 2008; Chinese edition, Peking University Press 2011, 2nd ed Springer 2012, 3rd ed 2017), "Textbook of Personalized Medicine" (Springer 2009; Japanese ed 2012; 2nd ed Springer, 2015), "Handbook of Biomarkers" (Springer 2010; Chinese edition, Chemical Industry Press 2016, 2nd ed Springer 2018, in press), "Handbook of Neuroprotection" (Springer 2011), "Application of Biotechnology in Cardiovascular Disorders" (Springer 2011), "Application of Biotechnology in Neurology" (Springer 2013), and "Application of Biotechnology in Oncology" (Springer 2014). Some of these books contain chapters on nitric oxide. He has edited "Applied Neurogenomics" (Springer 2015).

TABLE OF CONTENTS

0. Executive Summary	13
1. Introduction	15
Nitric oxide	15
Historical aspects.....	15
Free radicals	16
Nitrogen cycle and NO.....	16
Role of NO in biology and medicine	17
Nitric oxide synthase	18
Structure and function NOS.....	18
Inducible nitric oxide synthase.....	20
<i>iNOS gene</i>	20
<i>Regulation of iNOS</i>	20
Regulation of endothelial nitric oxide synthase.....	20
<i>Interaction between eNOS and other proteins</i>	21
<i>Tetrahydrobiopterin</i>	21
<i>eNOS gene</i>	22
NOS-independent NO generation and circulation	22
Entero-salivary circulation of nitrate.....	22
Methods of study of NO and NOS	23
Colorimetric determination of NO ₂ ⁻ using the Greiss reagent.....	23
Chemiluminescence.....	24
High performance liquid chromatography	24
Bioimaging of NO	24
Electrochemical methods using amperometry	25
Method using micro ion electrodes	25
Metabolomics approach to study of NO metabolism	25
2. Nitric Oxide Pathways	27
Introduction	27
Mechanisms action of NO	28
NO-cGMP pathway	28
Nitrate-nitrite-NO pathway.....	29
Soluble guanylyl cyclase as the NO receptor	29
Oxidative stress pathways	29
NO and oxidative stress.....	30
Oxidative stress and the NO-cyclic GMP signal transduction pathway	30
NO and platelets	32
Mitochondrial NO-cytochrome c oxidase signaling pathway.....	32
Nitric oxide and cytochrome c oxidase	33
Dual role of NO as a free radical and a scavenger	34
NO and carbon monoxide.....	34
NO signaling and apoptosis.....	35
3. Role of NO in Physiology.....	37
Homeostasis of NO	37
Role of NO in adaptation to high altitude	37
NO as a biomarker	38
Functions of NO in various systems of the body.....	38
NO and proteins.....	39
<i>A proteomic method for identification of cysteine S-nitrosylation sites</i>	39
<i>Protein S-nitrosylation and intracellular transport processes</i>	39
<i>Cellular inactivation NO by iNOS aggresome formation</i>	39
NO and mitochondria.....	40
<i>Mitochondrial permeability and reperfusion injury</i>	41
Endocrine role of NO	41
Role of NO in the cardiovascular system	41
<i>NO and atrial natriuretic peptide</i>	42
<i>NOS in the cardiac myocyte</i>	42
<i>NO and the autonomic control of the heart rate</i>	43
<i>NO and vascular system</i>	44
<i>NO and vasodilatation</i>	45
<i>NO and blood pressure</i>	46
<i>Role of NO in the plasma compartment</i>	46
<i>Measurement of NO as a biomarker of cardiovascular function</i>	47
Hemoglobin, oxygen and nitric oxide.....	47
<i>Myoglobin and NO</i>	48
NO and pulmonary circulation.....	49

<i>Role of NO in the regulation of hypoxic pulmonary vasoconstriction</i>	49
Role of NO in the lymphatic system.....	49
Role of NO in the nervous system.....	50
<i>Neurovascular coupling of COX-2 and nNOS</i>	51
<i>Neuroglobin</i>	51
<i>NO and blood-brain barrier</i>	52
<i>NO as a neurotransmitter</i>	52
<i>Role of NO in memory and learning</i>	52
<i>Role of NO in synaptic plasticity</i>	53
<i>Role of NO in the peripheral nervous system</i>	53
Role of NO in the cochlea.....	53
NO and neuroendocrine function.....	53
NO and pregnancy.....	54
Role of NO in penile erection.....	54
Role of NO in immune regulation.....	55
Role of NO in temperature regulation.....	55
Role of NO in gastrointestinal system.....	56
Role of NO in kidney function.....	56
Role of NO in liver.....	57
Role of NO in the skin.....	57
4. Role of NO in Diseases.....	59
Introduction.....	59
Cytotoxicity of reactive nitrogen species.....	59
Peroxynitrite, mitochondria and cell death.....	59
Diseases involving oxidative stress and nitric oxide.....	61
Stress-related disorders.....	62
Role of NO in allergic disorders.....	62
Inflammatory diseases.....	63
Autoimmune disorders.....	63
Role of NO in rheumatoid arthritis.....	64
Role of NO in infections.....	65
NO-mediated cytoprotection in bacteria.....	65
Nanoscale nanoparticle delivery for cutaneous infection.....	66
Leishmaniasis.....	66
Malaria and iNOS polymorphism.....	66
Susceptibility of <i>Mycobacterium leprae</i> to NO.....	67
Role of NO in the treatment of tuberculosis.....	67
Septic shock.....	67
Trypanosomiasis.....	68
Viral infections.....	68
Role of NO in anaphylactic shock.....	69
Role of NO in anemia and hypoxia.....	70
Role of NO in neurological disorders.....	70
Neurodegenerative diseases.....	70
<i>NO-induced mitochondrial dysfunction in neurodegeneration</i>	71
<i>White matter disorders</i>	71
<i>Amyotrophic lateral sclerosis</i>	71
<i>Alzheimer's disease</i>	72
<i>Role of NO in pathophysiology of Alzheimer's disease</i>	72
<i>Role of ApoE genotype</i>	75
<i>Parkinson's disease</i>	75
Traumatic brain injury.....	77
Epilepsy.....	78
Stroke.....	78
<i>Pathophysiology of cerebral ischemia</i>	78
<i>Role of NO in cerebral ischemia</i>	79
<i>eNOS gene polymorphisms as predictor of cerebral aneurysm rupture</i>	81
<i>Role of NO in assessment of cerebral and retinal blood flow</i>	81
<i>Role of NO in cerebral vasospasm after subarachnoid hemorrhage</i>	81
<i>Role of NO in neuroprotection</i>	82
<i>Stroke and heart disease</i>	82
Role of NO in peripheral neuropathy.....	83
<i>iNOS induction in experimental allergic neuritis</i>	83
<i>Role of NO in sciatica</i>	83
Role of NO in the pathogenesis of muscular dystrophy.....	83
Role of NO in neurological decompression sickness.....	84
Role of NO in psychiatric disorders.....	84
NO-dysregulation in schizophrenia.....	84
Role of NO in pathomechanism of cardiovascular disorders.....	85
Oxidative stress as a cause of cardiovascular disease.....	85

Role of NO in pathomechanism of cardiovascular diseases.....	85
<i>Role of iNOS in cardiovascular disease</i>	86
<i>Role of eNOS in cardiovascular disease</i>	86
<i>Role of nNOS in cardiac arrhythmia and sudden death</i>	87
NO and atherosclerosis.....	87
Role of NO in cardiopulmonary disorders.....	89
Role of NO in disturbances of vasodilation.....	89
<i>Caveolin-1 deficiency impairs NO synthesis and vasodilation</i>	89
Role of NO in hypercholesterolemia.....	90
NO and systemic hypertension.....	90
Coronary artery disease.....	92
Role of NO in the pathophysiology of angina pectoris.....	92
Congestive heart failure.....	92
<i>Calcium overload as a cause of heart failure</i>	93
<i>NO/redox disequilibrium in the failing heart</i>	93
Myocardial ischemia/reperfusion injury.....	93
NO pathway in cardiac hypertrophy.....	95
Role of NO in sickle cell disease.....	95
Role of NO in pulmonary disorders.....	95
Role of NO in the pathophysiology of asthma.....	95
<i>iNOS gene polymorphisms in asthma</i>	97
<i>Role of S-nitrosoglutathione in bronchodilation in asthma</i>	97
Monitoring of exhaled NO.....	98
Nasal NO as a biomarker of response to rhinosinusitis therapy.....	99
Elevated urinary NO as a biomarker of improved survival in ARDS.....	99
Pulmonary hypertension.....	99
Role of NO in renal disorders.....	100
Role of NOS in diabetic nephropathy.....	100
Role of NO in cancer.....	101
Inflammation, NO and colon cancer.....	102
Tumor hypoxia and NO.....	102
NO and p53 mutations.....	103
NO and matrix metalloproteinase.....	103
Role of NO in angiogenesis in cancer.....	103
Role of NO in diseases of the eye.....	104
Glaucoma.....	105
Role of NO in metabolic disorders.....	105
Metabolic syndrome.....	105
Obesity.....	105
Diabetes mellitus.....	105
Role of NO in gastrointestinal disorders.....	106
Role of L-arginine in intestinal adaptation.....	106
Role of NO in irritable bowel syndrome.....	106
Role of NO in inflammatory bowel diseases.....	107
Role of NO in celiac disease.....	107
Role of NO in diabetic gastroparesis.....	107
NO and diseases of the liver.....	108
Cirrhosis of liver.....	108
Hepatic encephalopathy.....	108
Role of NO in skin disorders.....	108
Role of NO and oxidative stress in the aging skin.....	108
Role of NO in wound healing.....	109
Role of NO in erectile dysfunction.....	110
Role of NO in pain.....	110
NO and pain of spinal cord origin.....	110
NO interaction with other receptors in pain.....	111
nNOS and pain.....	111
Role of NO in various types of pain.....	111
<i>Neuropathic pain</i>	111
<i>Role of NO in diabetic neuropathy</i>	111
<i>NO in oral and facial pain</i>	112
<i>Role of NO in migraine</i>	112
<i>Role of NO in osteoarthritis</i>	113
<i>NO and Fibromyalgia syndrome</i>	113
<i>Role of spinal NO in analgesic action</i>	114
Role of NO in nicotine addiction.....	114
Role of NO in carbon monoxide poisoning.....	115
Role of NO in chemically-induced toxicity.....	115
Peroxynitrite and drug-dependent toxicity.....	115
Paraquat neurotoxicity.....	115
Role of NO in radiation damage.....	116

5. Pharmacology of Nitric Oxide	117
Introduction Source: Fosen and Thom 2014	117
Cytotoxic vs cytoprotective role of NO	117
Antioxidants	117
<i>Ebselen</i>	118
<i>Nicaraven</i>	118
<i>Nitroxides</i>	119
Antioxidants in relation to NO	119
Nitric oxide as an antioxidant	119
NO-related drugs	120
Drugs that activate eNOS production.....	122
<i>Aspirin</i>	122
<i>Dehydroepiandrosterone</i>	122
Drugs that scavenge free radicals/NO.....	122
<i>Peroxynitrite scavengers</i>	122
<i>Ruthenium (III) polyaminocarboxylates</i>	123
<i>Nitrones</i>	123
Drugs that inhibit NO.....	123
<i>Ginko biloba</i>	123
<i>Epigallocatechin</i>	124
Delivery of nitric oxide.....	124
Targeted delivery of NO donors	125
Nitric oxide delivery by encapsulated cells.....	125
NO-lipid combination	125
NO-releasing coating to prevent infection of implanted devices	126
Nanoparticles for controlled/sustained release of NO	126
<i>Hydrogel/glass nanoparticles</i>	126
<i>Delivery of nanoparticles to vascular endothelium for release of NO</i>	126
Release of NO in tissues by extracorporeal shock wave application.....	126
Nitric oxide donors	127
Nitroglycerine/glycerine trinitrate.....	127
Isosorbide dinitrate	128
Sodium nitrite	128
Organic nitrites.....	128
NO-releasing NSAIDs	129
COX-inhibiting NO-donors	130
Grafting of NO-releasing structures on to existing drugs	131
Mesoionic Oxatriazoles	133
Cysteine-containing NO donors.....	133
Sodium nitroprusside.....	133
Syndnonimines	134
S-Nitrosothiols.....	134
Diazeniumdiolates.....	135
COX-2 inhibitors	135
NO hydrogels	136
Novel NO donors.....	136
NO mimetics	136
Comparison of classical nitrates, grafted NO donors, and NO mimetics	137
NO donors and soluble guanylate cyclase activation	137
NO donors for increasing the efficacy of chemotherapy	138
Factors that enhance availability of NO	138
Modulators of cyclic guanosine-3',5'-monophosphate-dependent protein kinases.....	139
NOS-modulating drugs.....	140
Drugs that activate eNOS.....	140
<i>Statins</i>	140
<i>Angiotensin converting enzyme inhibitors</i>	141
<i>17 Beta-estradiol</i>	141
<i>C-2431</i>	141
NOS inhibitors	141
<i>Rationale of NOS inhibitors</i>	141
<i>L-Arginine</i>	143
<i>Design of NOS inhibitors</i>	143
<i>Selective iNOS inhibitors</i>	144
<i>Non-amino acid-based inhibitors</i>	145
<i>Aminoguanidine</i>	145
<i>Heme ligands</i>	146
<i>Pterin antagonists</i>	146
<i>Fused-ring bio-isoteric models of arginine as NOS inhibitors</i>	146
<i>nNOS inhibitors</i>	146
<i>Lubeluzole</i>	148
<i>Neurotrophic factors</i>	148

<i>Therapies based on action of NOS as a paraquat diaphorase</i>	148
<i>Concluding remarks about NOS inhibiting drugs</i>	149
NO and stem cell-based therapy	149
Nitric oxide and gene therapy	150
NOS gene transfer	150
Inhibition of NOS by antisense technology	151
Drugs that modulate NO action on platelets	151
Action of NO and NO donors on platelets	152
NOS inhibitors and NO scavengers	152
Phosphodiesterase inhibitors	152
Activators of soluble guanylate cyclase	152
YC-1	152
A-350619	153
Cinaciguat	153
Secondary role of NO in the action of drugs	153
Selective serotonin reuptake inhibitors	153
P2Y receptors and NO	154
Calcium channel blockers and NO	154
Nitric oxide-based transdermal drug delivery	154
Mechanism of resistance of NO-based drugs	154
NO and nutraceuticals	155
L-arginine as a nutraceutical	155
Nitrate and nitrite	156
Oleuropein	156
Role of NO in beneficial effects of chocolate	156

6. Therapeutic Applications	157
Introduction	157
Role of NO in the management of pulmonary disorders	157
Manufacture of NO gas for inhalation	157
NO inhalation for acute respiratory distress syndrome	157
<i>NO inhalation for premature children with pulmonary dysplasia</i>	158
<i>NO inhalation for premature children with respiratory failure</i>	158
Pulmonary hypertension	159
<i>NO-based treatment of pulmonary hypertension</i>	159
<i>Pediatric pulmonary hypertension</i>	159
<i>Gene therapy for pulmonary hypertension</i>	160
<i>Clinical trials of NO therapies for pulmonary arterial hypertension</i>	161
Asthma	162
<i>iNOS inhibitors for asthma</i>	162
<i>NO for bronchodilation in asthma</i>	162
Role of NO in acute lung injury after smoke inhalation	162
Cardiovascular disorders	163
Role of NO in cardioprotection	163
Role of NO in the management of myocardial infarction	164
Role of NO in the management of hypertension	165
Role of NO in the management of angina pectoris	166
Role of NO in therapy of coronary heart disease	166
NO-releasing aspirin in patients undergoing CABG	167
Management of coronary restenosis	167
<i>Modified NO donors</i>	167
<i>NO-generating stent for coronary restenosis</i>	168
<i>eNOS gene therapy for restenosis</i>	169
NO-based management of cardiac hypertrophy	169
Congestive heart failure	170
<i>Limitation of antioxidant therapy in congestive heart failure</i>	170
<i>NO-based therapies for congestive heart failure</i>	170
<i>eNOS gene therapy for congestive heart failure</i>	170
<i>Gene transfer of nNOS in congestive heart failure</i>	170
NO-based therapy for management of cardiogenic shock	171
NO-based therapy for cardiac arrhythmias	171
Prophylaxis of cardiovascular disorders	171
<i>Prevention of atherosclerosis with aging</i>	172
Role of iNO in cardiac surgery	172
Strategies for increasing NO signaling in cardiovascular disorders	172
Peripheral vascular disorders	173
<i>Peripheral atherosclerotic arterial disease</i>	173
<i>Peripheral ischemic disease</i>	173
<i>An eNOS mutant as therapeutic for peripheral vascular ischemia</i>	174
<i>Sodium nitrite therapy for peripheral vascular ischemia</i>	174
<i>Raynaud's phenomenon</i>	174

Neurological disorders	175
Cerebrovascular ischemic disorders.....	175
<i>Attenuation of NO for neuroprotection in cerebral ischemia</i>	175
<i>Use of NO donors in cerebral ischemia</i>	176
<i>Use of NO donors in cerebral reperfusion injury</i>	176
<i>NO-based treatments for cerebral vasospasm due to SAH</i>	177
<i>NOS gene therapy for cerebral vasospasm</i>	177
Degenerative CNS disorders.....	178
<i>Statins for Alzheimer's disease</i>	178
<i>NO mimetics for Alzheimer's disease</i>	178
<i>iNOS inhibitors for treatment of Alzheimer's disease</i>	179
<i>NO-NSAIDs for Alzheimer's disease</i>	179
<i>Ginko biloba for Alzheimer's disease</i>	179
<i>Personalization of NO-based therapy for Alzheimer's disease</i>	180
Role of NO in the treatment of traumatic brain injury.....	180
Neuroinflammatory disorders.....	180
Role of NO-releasing sodium nitroprusside in the treatment of schizophrenia.....	181
Antidepressant effect of NOS inhibitors.....	181
Muscular dystrophy.....	181
Vestibulotoxicity.....	182
NO for opening the blood-brain barrier.....	182
Cochlear disorders	183
Cochlear ischemia.....	183
Role of NO in sensoryneural hearing loss.....	183
Ophthalmic disorders.....	183
<i>Glaucoma</i>	183
Pain	184
NO-based therapies for pain.....	184
Treatment of diabetic neuropathy with isosorbide dinitrate spray.....	184
NO-based therapies for migraine.....	185
NO-based therapy for fibromyalgia syndrome.....	185
NO-based therapies for inflammatory disorders	185
NO-based therapies for gastrointestinal disorders	185
Protection of gastrointestinal injury from NSAIDs.....	185
Role of NO in the treatment of inflammatory bowel disease.....	186
Topical nitroglycerin for chronic anal fissure.....	186
Cancer	187
Mechanism of action of NO in cancer.....	187
Antineoplastic effect of iNOS-expressing cells.....	187
Role of NO in drug resistance of cancer.....	187
Role of NO in treatment of brain tumors.....	188
NO-induced apoptosis.....	188
Role of NO in antiangiogenesis therapies in cancer.....	189
NO donors for the treatment of cancer.....	189
NO-releasing NSAIDs and colon cancer chemoprevention.....	189
Rationale of combining NO aspirin with cancer vaccines.....	190
NO-based cancer gene therapy.....	190
Transdermal nitroglycerine for prostate cancer.....	191
NO-based therapies for skin disorders	191
NO-based therapies for skin infections.....	191
Role of NO in the treatment of psoriasis.....	192
NO-based therapy for sickle cell anemia	192
Inhaled NO for acute respiratory distress syndrome in sickle cell disease.....	192
NO inhalation for pulmonary hypertension in sickle cell anemia.....	193
Role of NO in disorders associated with pregnancy	193
Pre-eclampsia and intra-uterine growth restriction.....	193
Use of NO donors in management of labor.....	194
Erectile dysfunction	194
Selective inhibitors of phosphodiesterase 5.....	194
Erectile dysfunction in diabetes.....	195
NO-donating substances for treatment of ED.....	195
NOS gene transfer for ED.....	196
Organ transplant rejection	196
Role of NO in the treatment of renal disorders	197
Role of NO in the treatment of hepatic disorders	198
Portal hypertension.....	198
NO inhalation for restoration of liver function following transplantation.....	198
Role of NO in blood transfusion	198
Role of NO in the treatment of osteoporosis	199
NO-based wound healing	199

7. Evaluation of NO-Based Drugs	201
Current status.....	201
Antioxidant vs. NO-based approaches	201
SWOT analysis of selected approaches for NO modulation.....	201
NO donors by grafting of NO-releasing structures	201
NOS modulation	202
Challenges of developing NO-based therapies	203
Concluding remarks and future prospects.....	203
8. Markets for NO-based Therapies.....	205
Introduction	205
Impact of NO-based therapies on international markets	205
Share of NO-based therapies in major therapeutic areas.....	205
Share of NO-based therapies in cardiovascular disorders	206
Hypercholesterolemia	206
Myocardial infarction	207
Angina pectoris/coronary artery disease	207
Heart failure.....	207
Coronary restenosis and stenting	207
Strategies for developing NO-based therapy markets.....	207
Addressing the unfulfilled needs.....	208
Multidisciplinary approaches.....	208
Collaboration between the academia and the industry	209
Education of the public	209
9. Companies	211
Introduction	211
Profiles of companies with focus on NO	213
Major pharmaceutical companies with involvement in NO	224
Smaller biotech and pharmaceutical companies involved in NO.....	228
Biopharmaceutical companies involved in antioxidant research	238
Companies supplying NO equipment for healthcare.....	242
Academic institutes with commercial collaboration in NO research	246
Companies supplying NO products for research.....	247
Collaborations.....	251
10. References.....	253
