A Jain PharmaBiotech Report

A U T H O R ' S B I O G R A P H Y

Professor K. K. Jain is a neurologist/neurosurgeon by training and has been working in the biotechnology/biopharmaceuticals industry for several years. He received graduate training in both Europe and USA, has held academic positions in several countries, and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently, he is a consultant at Jain PharmaBiotech.

Prof. Jain's 473 publications include 28 books (5 as editor + 23 as author) and 50 special reports which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. He has also written "The Textbook of Gene Therapy", which is the first book on this subject to be translated into the Chinese language in 2000. A book on gene therapy companies was published in 2000 by John Wiley & Sons and the updated version of it is incorporated in the 2013 edition of Gene Therapy published by Jain PharmaBiotech. The most recent books include "Handbook of Nanomedicine" (Humana/Springer 2008; Chinese edition, Peking University Press 2011, 2nd ed Springer 2012, 3rd ed April 2017), "Textbook of Personalized Medicine" (Springer 2009, Japanese ed 2012; 2nd ed Springer 2015), "Handbook of Biomarkers" (Springer 2010; Chinese edition, Chemical Industry Press 2016, 2nd ed Springer 2017), "Handbook of Neuroprotection" (Springer 2011), "Applications of Biotechnology in Cardiovascular Therapeutics" (Springer 2011), "Applications of Biotechnology in Neurology" (Springer 2013), and "Applications of Biotechnology in Oncology" (Springer 2014). He has edited "Applied Neurogenomics" (Springer 2015).

Prof. Jain has been interested in using biotechnology to develop personalized medicine since 1997. He has also lectured and conducted several workshops on personalized medicine worldwide.

A B O U T T H I S R E P O R T

Prof. Jain wrote the first report on Personalized Medicine in 1998, which was published by Decision Resources Inc, USA. The second edition was published in 2001 by Informa Publications, London. Since 2003, the report is published and continuously updated and rewritten at Jain PharmaBiotech.

TABLE OF CONTENTS

0. Executive Summary	25
1. Basic Aspects.....	27
Definition of personalized medicine.....	27
History of medical concepts relevant to personalized medicine	28
Ayurveda as a personalized healthcare system	30
Personalized aspects of ancient oriental systems of medicine	30
Evolution of modern personalized medicine	30
Molecular biological basis of personalized medicine	31
The human genome	31
<i>ENCODE</i>	31
Chromosomes	32
Genes.....	32
<i>The genetic code</i>	33
<i>Gene expression</i>	33
<i>DNA sequences and structure</i>	33
Genetic variations in the human genome	34
<i>Single nucleotide polymorphisms</i>	34
<i>Copy number variations in the human genome</i>	35
<i>Insertions and deletions in the human genome</i>	36
<i>Large scale variation in human genome</i>	37
<i>Structural variations in the human genome</i>	38
<i>Mapping and sequencing of structural variation from human genomes</i>	38
<i>1000 Genomes Project</i>	39
<i>Role of DNA sequencing in the development of personalized medicine</i>	40
<i>Human Variome Project</i>	41
<i>Interconnected genetic and genomic patterns in human diseases</i>	41
Mitochondrial tRNA and personalized medicine.....	42
Basics technologies for developing personalized medicine	42
Definitions of technologies relevant to personalized medicine	42
Problems with the ICH definitions of pharmacogenomics and pharmacogenetics	43
'Omics' and personalized medicine	43
Relationship of various technologies to personalized medicine	44
Conventional medicine versus personalized medicine	44
Personalized medicine and evidence-based medicine	45
Role of genetics in future approaches to healthcare	45
Genetic medicine	45
Human disease and genes.....	46
Genetic and environmental interactions in etiology of human diseases.....	46
Role of genetics in development of personalized medicines	47
<i>Genetic databases</i>	47
<i>Clinical Genomic Database</i>	47
<i>Genetic epidemiology</i>	48
<i>Limitations of medical genetics</i>	48
<i>Genetics vs. epigenetics</i>	49
Role of systems biology in personalized medicine	49
Systems pharmacology.....	50
Systems medicine	51
Synthetic biology and development of personalized medicines.....	52
Role of bioelectronics in development of personalized medicine	53
A personalized approach to environmental factors in disease.....	53
Reclassification of diseases	53
Translational science and personalized medicine.....	54
Personalization of multimodal therapies.....	55
2. Molecular Diagnostics in Personalized Medicine	57
Introduction	57
Molecular diagnostic technologies	57
PCR-based methods	58
<i>DirectLinear™ Analysis</i>	58
<i>Denaturing high-performance liquid chromatography</i>	59
<i>Multiplex Allele-Specific Diagnostic Assay</i>	59
<i>Representational oligonucleotide microarray analysis</i>	59
<i>Restriction fragment length polymorphism (RFLP)</i>	59
<i>Real-time PCR for detection of CNVs</i>	60
Non-PCR methods.....	60
<i>Arrayed primer extension (APEX)</i>	60
<i>Enzymatic Mutation Detection (EMD)</i>	60

DNA sequencing	60
<i>Sanger-sequencing technology</i>	61
<i>ABI PRISM® 310 Genetic Analyzer</i>	62
<i>High-throughput paired end transcriptome sequencing</i>	62
Emerging sequencing technologies.....	62
<i>4300 DNA analyzer</i>	63
<i>Apollo 100</i>	63
<i>"Color blind" approach to DNA sequencing</i>	64
<i>Cyclic array sequencing</i>	64
<i>CEQ™ 8000</i>	64
<i>DeepCAGE sequencing</i>	64
<i>Electron microscope-based DNA sequencing</i>	65
<i>Genometrica™ sequencer</i>	65
<i>GS-FLEX system (Roche/454)</i>	66
<i>IBS sequencing technology</i>	67
<i>Illumina's sequencing technology</i>	67
<i>MegaBACE 500</i>	68
<i>Microdroplet-based PCR for large-scale targeted sequencing</i>	68
<i>Multiplex amplification of human DNA sequences</i>	69
<i>Nanoscale sequencing</i>	69
<i>Polonator sequencer</i>	69
<i>RainStorm™ microdroplet technology</i>	70
<i>Sequential DEXAS</i>	70
<i>SOLiD technology</i>	71
<i>Sequencing by hybridization</i>	72
<i>Whole genome sequencing</i>	72
<i>Bioinformatic tools for analysis of genomic sequencing data</i>	73
<i>Clinical Genomicist Workspace for managing NGS-based clinical tests</i>	73
<i>Detection of single molecules in real time</i>	73
<i>Direct observation of nucleotide incorporation</i>	73
<i>Molecular Combing</i>	74
<i>Nanopore sequencing</i>	74
<i>DNA sequence by use of nanoparticles</i>	74
<i>Zero-mode waveguide nanostructure arrays</i>	74
<i>Future prospects of sequencing</i>	75
<i>Role of DNA sequencing in development of personalized medicine</i>	75
<i>Role of RNA sequencing in development of personalized medicine</i>	77
Biochips and microarrays	77
Role of biochip/microarray technology in personalized medicine.....	78
Applications of biochip/microarray technology in personalized medicine	79
Standardizing the microarrays	80
Biochip technologies.....	80
<i>GeneChip</i>	80
<i>AmpliChip CYP450</i>	81
Microfluidics	82
<i>Lab-on-a-chip</i>	83
<i>Micronics' microfluidic technology</i>	83
<i>LabCD</i>	83
<i>Microfluidic automated DNA analysis using PCR</i>	83
<i>Integrated microfluidic bioassay chip</i>	84
Electronic detection of nucleic acids on microarrays.....	84
Strand displacement amplification on a biochip	85
Rolling circle amplification on DNA microarrays.....	85
Universal DNA microarray combining PCR and ligase detection reaction	85
Protein biochips	85
<i>ProteinChip</i>	86
<i>LabChip for protein analysis</i>	87
<i>TRINECTIN proteome chip</i>	87
<i>Protein expression microarrays</i>	87
<i>Microfluidic devices for proteomics-based diagnostics</i>	88
<i>New developments in protein biochips/microarrays</i>	88
<i>Protein biochips/microarrays for personalized medicine</i>	89
SNP genotyping	89
Genotyping and haplotyping.....	90
<i>Haplotype Specific Extraction</i>	91
<i>Computation of haplotypes</i>	91
<i>HapMap project</i>	91
<i>Haplotyping for whole genome sequencing</i>	92
<i>Predicting drug response with HapMap</i>	94
<i>Companies developing haplotyping technology</i>	94
Technologies for SNP analysis.....	94

Biochip and microarray-based detection of SNPs	95
<i>SNP genotyping by MassARRAY</i>	95
<i>BeadArray technology</i>	95
<i>SNP-IT primer-extension technology</i>	96
<i>Use of NanoChip for detection of SNPs</i>	96
Electrochemical DNA probes	96
Laboratory Multiple Analyte Profile	96
PCR-CTPP (confronting two-pair primers).....	97
TaqMan real-time PCR	97
Locked nucleic acid	98
Molecular inversion probe based assays	98
Pyrosequencing	98
Smart amplification process version 2	99
Zinc finger proteins	99
Mitochondrial SNPs.....	99
Limitations of SNP in genetic testing.....	100
Concluding remarks on SNP genotyping.....	100
Companies involved in developing technologies/products for SNP analysis	100
Impact of SNPs on personalized medicine	102
Detection of copy number variations	102
CNVer algorithm for CNV detection.....	102
CNVnator for discovery of CNVs and genotyping	103
Study of rare variants in pinpointing disease-causing genes	103
Optical Mapping	104
Proteomics in molecular diagnosis.....	104
Proteomic strategies for biomarker identification.....	105
<i>Proteomic technologies for detection of biomarkers in body fluids</i>	105
Protein patterns.....	105
Layered Gene Scanning	106
Comparison of proteomic and genomic approaches in personalized medicine.....	106
Role of nanobiotechnology in molecular diagnostics.....	107
Cantilevers for personalized medical diagnostics	107
Role of biomarkers in personalized medicine.....	108
Role of biosensors in personalized medicine.....	110
Biomarkers for diagnostics	111
Biomarkers for drug development	111
Gene expression profiling	111
DNA microarrays.....	112
Analysis of single-cell gene expression.....	112
Gene expression profiling based on alternative RNA splicing	113
Whole genome expression array	114
Tangerine™ expression profiling	114
Gene expression analysis on biopsy samples	115
Profiling gene expression patterns of white blood cells.....	115
Serial analysis of gene expression (SAGE).....	115
Multiplexed Molecular Profiling	116
Gene expression analysis using competitive PCR and MALDI TOF MS	116
Companies involved in gene expression analysis	117
Monitoring in vivo gene expression by molecular imaging	118
Molecular imaging and personalized medicine.....	118
Combination of diagnostics and therapeutics	118
Use of molecular diagnostics for stratification in clinical trials	119
Companion diagnostics	119
Companies involved in companion diagnostics	120
Point-of-care diagnosis.....	122
Companies developing point-of-care diagnostic technologies	123
Point-of-care diagnosis of infections	125
Advantages versus disadvantages of point-of-care diagnosis	125
Future prospects of point-of-care diagnosis	126
Genetic testing for disease predisposition	126
Preventive genetics by early diagnosis of mitochondrial diseases	127
Direct-to-consumer genetic services.....	127
Role of diagnostics in integrated healthcare	128
Concept of integrated healthcare	128
Components of integrated healthcare	129
<i>Screening</i>	129
<i>Disease prediction</i>	129
<i>Early diagnosis</i>	129
<i>Prevention</i>	130
<i>Therapy based on molecular diagnosis</i>	130
<i>Monitoring of therapy</i>	130

Advantages and limitations of integrated healthcare.....	130
Commercially available systems for integrated healthcare.....	131
Future of molecular diagnostics in personalized medicine	131

3. Pharmacogenetics **133**

Basics of pharmacogenetics..... **133**

Role of molecular diagnostics in pharmacogenetics..... **134**

Role of pharmacogenetics in pharmaceutical industry..... **135**

Study of the drug metabolism and pharmacological effects 135

Causes of variations in drug metabolism 135

Enzymes relevant to drug metabolism 136

Pharmacogenetics of phase I metabolism..... 136

CYP450..... 136

P450 CYP 2D6 inhibition by selective serotonin reuptake inhibitors..... 138

Cytochrome P450 polymorphisms and response to clopidogrel..... 139

Lansoprazole and cytochrome P450..... 139

Glucose-6-phosphate dehydrogenase 139

Pharmacogenetics of phase II metabolism..... 140

N-Acetyltransferase..... 140

Uridine diphosphate-glucuronosyltransferase..... 141

Measurement of CYP isoforms 141

Polymorphism of drug transporters 142

Genetic variation in drug targets..... 142

Polymorphisms of kinase genes 143

Effect of genetic polymorphisms on disease response to drugs 143

Ethnic differences in drug metabolism 144

Gender differences in pharmacogenetics 144

Role of pharmacogenetics in drug safety 145

Adverse drug reactions..... 145

Adverse drug reactions in children 146

Adverse drug reactions related to toxicity of chemotherapy..... 146

Genetically determined adverse drug reactions..... 146

Malignant hyperthermia..... 148

Pharmacogenetics of clozapine-induced agranulocytosis..... 148

Role of pharmacogenetics in warfarin therapy..... 149

Role of pharmacogenetics in antiplatelet therapy 150

Role of pharmacogenetics in carbamazepine therapy 151

Role of pharmacogenetics in statin therapy 151

FDA consortium linking genetic biomarkers to serious adverse events 152

Therapeutic drug monitoring, phenotyping, and genotyping 153

Therapeutic drug monitoring 153

Phenotyping 154

Genotyping 155

Genotyping vs phenotyping 155

Phenomics 156

Limitations of genotype-phenotype association studies 156

Molecular toxicology in relation to personalized medicines..... 156

Toxicogenomics 157

Biomarkers of drug toxicity 157

Drug-induced mitochondrial toxicity 157

Companies involved in molecular toxicology..... 158

Gene expression studies..... 158

Pharmacogenetics in clinical trials 159

Postmarketing pharmacogenetics..... 159

Clinical implications of pharmacogenetics **160**

Application of CYP450 genotyping in clinical practice 160

Genotype-based drug dose adjustment..... 160

Pharmacogenomic biomarker information in drug labels..... 160

Standardized terminology for clinical pharmacogenetic test results..... 164

Use of pharmacogenetics in clinical pharmacology..... 164

Application of CYP2C19 pharmacogenetics for personalized medicine..... 164

Genotyping for identifying responders to sulfasalazine..... 164

HLA alleles associated with lumiracoxib-related liver injury 165

Pharmacogenetic basis of thiopurine toxicity 165

Tranilast-induced hyperbilirubinemia due to gene polymorphism..... 166

Linking pharmacogenetics with pharmacovigilance 166

Genetic susceptibility to ADRs..... 166

Linking genetic testing to postmarketing ADR surveillance 166

Recommendations for the clinical use of pharmacogenetics 167

Limitations of pharmacogenetics **167**

Pharmacoepiggenomics vs pharmacogenetics in drug safety **168**

Future role of pharmacogenetics in personalized medicine	168
4. Pharmacogenomics.....	169
Introduction	169
Basics of pharmacogenomics	170
Pharmacogenomics and drug discovery	170
<i>Preclinical prediction of drug efficacy</i>	<i>172</i>
Pharmacogenomics and clinical trials	172
Impact of genetic profiling on clinical studies	173
Limitations of the pharmacogenomic-based clinical trials.....	174
Pharmacogenomic aspects of major therapeutic areas	175
Oncogenomics	175
<i>Oncogenes</i>	<i>175</i>
<i>Tumor suppressor genes.....</i>	<i>176</i>
Cardiogenomics	177
Neuropharmacogenomics.....	179
<i>Pharmacogenomics of Alzheimer's disease</i>	<i>179</i>
<i>Pharmacogenomics of depression.....</i>	<i>180</i>
<i>Pharmacogenomics of bipolar disorder.....</i>	<i>180</i>
<i>Pharmacogenomics of schizophrenia.....</i>	<i>181</i>
<i>Companies involved in neurogenomics-based drug discovery.....</i>	<i>182</i>
Current status and future prospects of pharmacogenomics	182
5. Role of Pharmacoproteomics	183
Basics of proteomics.....	183
Proteomic approaches to the study of pathophysiology of diseases	183
Single cell proteomics for personalized medicine	184
Diseases due to misfolding of proteins	184
<i>Therapies for protein misfolding.....</i>	<i>185</i>
Significance of mitochondrial proteome in human disease	185
Proteomic technologies for drug discovery and development	186
Proteins and drug action	186
Role of reverse-phase protein microarray in drug discovery.....	186
Role of proteomics in clinical drug safety.....	186
Toxicoproteomics	187
Applications of pharmacoproteomics in personalized medicine	188
6. Role of Metabolomics in Personalized Medicine	189
Metabolomics and metabonomics	189
Metabolomics bridges the gap between genotype and phenotype	189
Metabolomics, biomarkers and personalized medicine	190
Metabolomic technologies	190
Urinary profiling by capillary electrophoresis.....	191
Lipid profiling	191
Role of metabolomics in biomarker identification and pattern recognition.....	192
Validation of biomarkers in large-scale human metabolomics studies.....	192
Pharmacometabonomics.....	193
Metabonomic technologies for toxicology studies.....	193
Metabonomics/metabolomics and personalized nutrition.....	194
7. Personalized Biological Therapies.....	195
Introduction	195
Recombinant human proteins	195
Therapeutic monoclonal antibodies	195
Cell therapy	196
Autologous tissue and cell transplants	196
Stem cells.....	196
<i>iPSCs for personalized cell therapy</i>	<i>196</i>
<i>Role of stem cells derived from unfertilized embryos</i>	<i>197</i>
Cloning and personalized cell therapy	197
Use of stem cells for drug testing.....	197
Gene therapy	197
Gene editing by CRISPR/Cas9 system.....	198
Personalized gene therapy for cancer	198
<i>Stem cell-based personalized gene therapy for cancer</i>	<i>199</i>
Personalized vaccines.....	199
Personalized vaccines for viral diseases	199
Personalized cancer vaccines.....	199
Antisense therapy.....	199
RNA interference.....	200

MicroRNAs	201
8. Personalized Non-pharmacological Therapies.....	203
Introduction	203
Acupuncture	203
Personalized acupuncture therapy	203
Personalized hyperbaric oxygen therapy	204
Personalized nutrition.....	204
Nutrigenomics	205
<i>Evolutionary basis of nutrigenomics</i>	<i>206</i>
<i>Genomics of vitamin D and calcium supplementation.....</i>	<i>206</i>
<i>Nutrigenomics and functional foods</i>	<i>207</i>
<i>Nutrigenomics and personalized medicine</i>	<i>207</i>
<i>Nutriproteomics</i>	<i>207</i>
Nutrigenetics and personalized medicine.....	208
Personalized diet prescription	208
<i>Personalized nutrition and aging</i>	<i>209</i>
<i>Personalized diet for diabetics.....</i>	<i>210</i>
Role of systems medicine in personalized nutrition.....	210
Companies involved in personalized nutrition	210
Personalized physical exercise	210
Variations in response to aerobic exercise	211
Variations in exercise-induced muscle hypertrophy and strength.....	211
Personalized surgery	211
9. Personalized Medicine in Major Therapeutic Areas	213
Introduction	213
Personalized management of infections	214
Genetic susceptibility to infections.....	214
Management of HIV	214
<i>CD4 counts as a guide to drug therapy for AIDS</i>	<i>214</i>
<i>Drug-resistance in HIV</i>	<i>214</i>
<i>Genetics of human susceptibility to HIV infection</i>	<i>216</i>
<i>Measurement of Replication Capacity.....</i>	<i>216</i>
<i>Personalized vaccine for HIV.....</i>	<i>217</i>
<i>Prevention of adverse reactions to antiviral drugs</i>	<i>217</i>
<i>Pharmacogenetics and HIV drug safety.....</i>	<i>218</i>
<i>Pharmacogenomics of antiretroviral agents</i>	<i>218</i>
<i>Role of diagnostic testing in management of HIV</i>	<i>218</i>
<i>Role of genetic variations in susceptibility to HIV-1</i>	<i>219</i>
<i>Role of personalized HIV therapy in controlling drug resistance.....</i>	<i>219</i>
<i>PhenoSense® to test HIV drug resistance.....</i>	<i>220</i>
<i>Sequencing for detecting mutations to personalize HIV therapy</i>	<i>220</i>
Personalized treatment of hepatitis B	221
Personalized treatment of hepatitis C	221
<i>Responders vs non-responders to treatment for hepatitis C.....</i>	<i>222</i>
<i>Drug resistance in hepatitis C.....</i>	<i>223</i>
Personalized management of tuberculosis	223
Personalized management of fungal infections.....	224
Psychiatric disorders	224
Psychopharmacogenetics/psychopharmacodynamics	225
<i>Serotonin genes.....</i>	<i>225</i>
<i>Calcium channel gene.....</i>	<i>225</i>
<i>Dopamine receptor genes</i>	<i>225</i>
<i>COMT genotype and response to amphetamine.....</i>	<i>225</i>
<i>Methylenetetrahydrofolate reductase.....</i>	<i>226</i>
<i>Genetic loci associated with risk of major depressive disorder.....</i>	<i>226</i>
<i>Role of gene mutations in ADHD</i>	<i>226</i>
<i>Genotype and response to methylphenidate in children with ADHD</i>	<i>227</i>
<i>GeneSight tests for individualized therapy of psychiatric disorders</i>	<i>227</i>
Personalized antipsychotic therapy.....	227
Personalized antidepressant therapy	229
<i>Biomarkers of response to antidepressant treatment.....</i>	<i>230</i>
<i>EEG to predict adverse effects and evaluate antidepressant efficacy.....</i>	<i>231</i>
<i>GeneSight pharmacogenomic test</i>	<i>232</i>
<i>Individualization of SSRI treatment</i>	<i>232</i>
<i>Role of protein sFRP3 in predicting response to antidepressants.....</i>	<i>233</i>
<i>Treatment resistant depression.....</i>	<i>234</i>
<i>Vilazodone with a test for personalized treatment of depression.....</i>	<i>234</i>
Neurological disorders	234
Introduction to personalized neurology	234

Personalized management of Alzheimer's disease	235
Personalized management of Parkinson's disease.....	236
<i>Direct-to-consumer genetic testing in PD</i>	237
<i>Discovery of subgroup-selective drug targets in PD</i>	237
<i>Personalized cell therapy for PD</i>	238
Personalized management of amyotrophic lateral sclerosis	238
Personalized management of epilepsy	238
<i>Adverse effects of AEDs</i>	239
<i>An algorithm for personalized management of epilepsy</i>	239
<i>Biomarkers of epilepsy</i>	240
<i>Drug resistance in epilepsy</i>	241
<i>Genetics/genomics of epilepsy</i>	243
<i>Pharmacogenomics of epilepsy</i>	244
<i>Selection of the right AED</i>	245
<i>Future of management of epilepsy</i>	245
Personalized management of migraine.....	246
<i>Individualization of use of triptans for migraine</i>	246
<i>Multitarget therapeutics for personalized treatment of headache</i>	247
<i>Personalized strategy for prevention of migraine attacks</i>	247
Personalized management of intracranial aneurysms	248
<i>Personalized management of cerebral vasospasm following SAH</i>	248
Personalized management of stroke	249
<i>Anticoagulation for stroke prevention</i>	249
<i>Application of proteomics for personalizing stroke management</i>	250
<i>Brain imaging in trials of restorative therapies for stroke</i>	250
<i>Personalized management of intracerebral hemorrhage</i>	251
<i>Revascularization procedures in chronic post-stroke stage</i>	252
<i>Personalized cell therapy for management of stroke</i>	252
<i>Management of stroke according to stage</i>	252
Personalized treatment of multiple sclerosis	253
<i>Autologous bone marrow stem cell therapy for multiple sclerosis</i>	254
<i>Fusokine method of personalized cell therapy of multiple sclerosis</i>	254
<i>Immunopathological patterns of demyelination for assessing therapy</i>	254
<i>Personalizing mitoxantrone therapy of multiple sclerosis</i>	255
<i>Pharmacogenomics of IFN-β therapy in multiple sclerosis</i>	255
<i>Preclinical detection of multiple sclerosis in children</i>	256
<i>T cell-based personalized vaccine for MS</i>	257
Personalized management of traumatic brain injury	257
<i>Biomarkers of TBI</i>	257
<i>Comparative effectiveness research for management of TBI</i>	258
<i>CT scores for prognosis and risk stratification of TBI</i>	258
Personalized management of myasthenia gravis	258
Personalized management of pain	258
<i>Genetic factors in response to pain</i>	259
<i>Genetic mutations with loss of pain</i>	259
<i>Genetic mutations and painful conditions</i>	260
<i>Pharmacogenetics/pharmacogenomics of pain</i>	260
<i>Personalized management of pain with opioids</i>	261
<i>Pharmacogenetics of NSAIDs</i>	262
<i>Mechanism-specific management of pain</i>	262
<i>Preoperative testing to tailor postoperative analgesic requirements</i>	263
<i>Personalized analgesics</i>	263
<i>Signature of pain on brain imaging</i>	263
<i>Concluding remarks on personalized management of pain</i>	264
Personalized management of sleep disorders.....	265
<i>Personalized therapy of insomnia</i>	265
Future of personalized neurology	265
Personalized management of ophthalmic disorders.....	265
Proteomics-based personalized management of uveitis.....	266
Combining cell and gene therapies for retinal disorders	266
Cardiovascular disorders	266
Role of diagnostics in personalized management of cardiovascular disease.....	266
<i>Cardiovascular disorders with a genetic component</i>	266
<i>Gene mutations associated with risk of coronary heart disease</i>	268
<i>Gene variant as a risk factor for sudden cardiac death</i>	269
<i>KIF6 gene test as a guide to management of heart disease</i>	269
<i>NGS sequencing for management of cardiovascular disorders</i>	270
<i>Personalized antiplatelet therapy after PCI</i>	270
Assessing patients with coronary heart disease.....	271
Assessing coronary artery disease for percutaneous coronary interventions.....	272
Companion diagnostics for therapy of cardiovascular disorders	273

Biomarkers and personalized management of cardiovascular disorders	273
Pharmacogenomics of cardiovascular disorders.....	274
Nanotechnology-based personalized therapy of cardiovascular diseases.....	274
Personalized management of chronic myocardial ischemia	275
<i>Management of chronic angina pectoris</i>	275
Personalized management of myocardial infarction	276
Management of heart failure	276
<i>β-blockers</i>	276
<i>Bucindolol</i>	276
<i>BiDil</i>	277
Management of atrial fibrillation.....	277
Management of hypertension	279
<i>Adjusting therapy of hypertension to fluctuations of blood pressure</i>	280
<i>Choice of drugs for hypertension</i>	280
<i>Control of blood pressure with vagal nerve stimulation</i>	280
<i>Correction of causes and risk factors of hypertension</i>	281
<i>Genes and hypertension</i>	281
<i>Improving management of HPN by targeting new pathways</i>	282
<i>Individualized therapy of HPN based on risk factors of heart disease</i>	282
<i>Personalized management of hypertensive patients with albuminuria</i>	283
<i>Personalized management of hypertension in the elderly</i>	283
<i>Personalized management of hypertension in women</i>	284
<i>Pharmacogenomics of diuretic drugs</i>	284
<i>Pharmacogenomics of ACE inhibitors</i>	284
<i>Prediction of antihypertensive activity of rosfuroxin</i>	285
<i>Role of pharmacogenetics in management of hypertension</i>	285
<i>Scheme for management of hypertension by personalized approach</i>	286
Personalized lipid-lowering therapies	286
<i>NIR spectroscopy of plaques to guide cholesterol-lowering therapy</i>	287
<i>Polymorphisms in genes involved in cholesterol metabolism</i>	287
<i>Role of eNOS gene polymorphisms</i>	288
<i>Prediction of response to statins</i>	288
<i>Personalized management of women with hyperlipidemia</i>	289
<i>Therapeutic alternatives in patients with statin intolerance</i>	289
<i>Treatment of familial hypercholesterolemia</i>	290
<i>PCSK9 inhibitors</i>	290
Thrombotic disorders.....	291
<i>Factor V Leiden mutation</i>	291
<i>Anticoagulant therapy</i>	291
<i>Antiplatelet therapy</i>	293
Personalized management of aortic aneurysms.....	293
Clinical trials of personalized therapy of cardiovascular diseases	294
Project euHeart for personalized management of heart disease	294
Modification of life style factors in management of cardiovascular disorders	295
Systems biology approach to personalized cardiology	295
Concluding remarks on personalized management of cardiovascular diseases.....	296
Personalized management of pulmonary disorders	296
Role of genetic ancestry in lung function	296
Targeted drug delivery for personalized management of pulmonary disorders	297
Personalized therapy of asthma	297
<i>Asthma phenotyping for improving therapeutic precision</i>	298

<i>DNA damage, repair and cancer</i>	336
<i>Gene mutations and cancer</i>	337
<i>Telomeres and cancer</i>	338
Systems biology of cancer.....	338
Relationships of technologies for personalized management of cancer	338
Impact of molecular diagnostics on the management of cancer	339
A universal NGS-based oncology test system	340
Analysis of RNA splicing events in cancer	340
Analysis of chromosomal alterations in cancer cells	341
Cancer classification using microarrays	341
Cancer gene panel for detection of genetic alterations	342
Companion diagnostics for cancer	342
Circulating tumor cells isolation and characterization	342
Circulating cell-free DNA for monitoring personalized cancer therapy	343
Detection of loss of heterozygosity	343
Diagnostics for detection of minimal residual disease.....	344
DNA repair biomarkers	344
Fluorescent in situ hybridization.....	344
Gene expression profiling.....	345
<i>Gene expression profiles predict chromosomal instability in tumors</i>	346
<i>OnkoMatch tumor genotyping</i>	346
<i>Synthetic dosage lethality predicts tumor growth and patient survival</i>	346
GPS Cancer test.....	347
Modulation of CYP450 activity for cancer therapy	347
NanoFlares for detection of CTCs	347
Pathway-based analysis of cancer	347
<i>Conversion of gene-level information into pathway-level information</i>	347
<i>Personalized therapies based on oncogenic pathways signatures</i>	348
Quantum dot-based test for DNA methylation.....	348
Role of molecular imaging in personalized therapy of cancer	349
<i>Functional diffusion MRI</i>	349
<i>FDG-PET/CT for personalizing cancer treatment</i>	350
<i>Image-guided personalized drug delivery in cancer</i>	350
<i>Optoacoustic imaging and nanoparticles in cancer management</i>	350
<i>Tumor imaging and elimination by targeted gallium corrole</i>	351
<i>Future prospects of molecular imaging in management of cancer</i>	351
Unraveling the genetic code of cancer	352
Cancer prognosis	352
Personalized cancer prevention	352
Detection of mutations for cancer risk assessment and prevention	353
Impact of biomarkers on management of cancer.....	354
HER-2/neu oncogene as a biomarker for cancer.....	354
L-asparaginase treatment of cancer guided by a biomarker	354
miRNA biomarkers for personalized management of cancer.....	355
Oncogene GOLPH3 as a cancer biomarker	355
Predictive biomarkers for efficacy of anticancer therapy	355
Sequencing to discover biomarkers to personalize cancer treatment.....	355
VeraTag™ assay system for cancer biomarkers.....	356
Determination of response to therapy	356
Biomarker-based assays for predicting response to anticancer therapeutics	357
Ex vivo testing of tumor biopsy for chemotherapy sensitivity	357
Genomic approaches to predict response to anticancer agents.....	358
<i>Gene expression patterns to predict response of cancer to therapy</i>	358
<i>Genomic analysis of tumor biopsies</i>	358
<i>Genotype-dependent efficacy of pathway inhibition in cancer</i>	358
<i>Mutation detection at molecular level</i>	359
<i>RNA Disruption Assay™</i>	359
<i>Role of genetic variations in susceptibility to anticancer drugs</i>	359
Non-genetic factors for variations in response of cancer cells to drugs.....	359
Profiling of cancer therapy in zebrafish xenografts to predict response.....	360
Proteomic analysis of tumor biopsies to predict response to treatment	360
Real-time apoptosis monitoring	360
Serum nucleosomes as indicators of sensitivity to chemotherapy	361
Targeted microbubbles to tumors for monitoring anticancer therapy.....	361
PET imaging for determining response to chemotherapy	362
<i>PET imaging with tyrosine kinase inhibitors</i>	362
Concluding remarks about predicting response to anticancer therapy	362
Molecular diagnostics combined with cancer therapeutics.....	363
Aptamers for combined diagnosis and therapeutics of cancer	363
Combining diagnosis and therapy of metastatic cancer	363
Detection and destruction of CTCs with nanoparticles and X-rays.....	364

Molecular profiling of cancer	365
Targeted cancer therapies	365
Targeting glycoproteins on cell surface	365
Targeting pathways in cancer	365
Targeted personalized anticancer medicines in clinical use	365
Immunotherapy of cancer	366
Monoclonal antibodies for personalized management of cancer	366
Targeted MAb-based immune therapy of cancer.....	368
<i>MAbs targeted to alpha fetaprotein receptor</i>	368
<i>MAbs targeted to tumor blood vessels</i>	368
<i>MAbs that selectively target cancer</i>	368
<i>Velociximab</i>	369
MAbs for immune activation	369
Functional MAb-based therapies.....	369
Immunotherapy of dormant cancer	370
Combined use of MAbs and cytokines	371
Combining diagnostics with therapeutics based on MAbs.....	371
<i>Radiolabeled antibodies for detection and targeted therapy of cancer</i>	371
Cancer immunotherapy based on suppression of enzymes	373
Personalized cancer vaccines	373
Antigen-specific vaccines	373
<i>Active immunotherapy based on antigen specific to the tumor</i>	373
Tumor-derived vaccines.....	374
<i>FANG vaccine</i>	375

Concluding remarks about the future of personalized medicine	576
12. Ethical, Legal and Regulatory Aspects of Personalized Medicine. 579	
Introduction to ethical issues	579
Ethical issues of pharmacogenetics	579
Ethical aspects of genetic information	579
<i>Ethical issues of whole genome analysis</i>	579
<i>Ethical aspects of direct-to-consumer genetic services</i>	580
<i>Privacy issues in personalized medicine</i>	581
<i>Genetic Information Nondiscrimination Act in the US</i>	582
<i>UNESCO and ethical aspects of personalized medicine</i>	582
Genotype-specific clinical trials	582
Social issues in personalized medicine	583
<i>Race and personalized medicine</i>	583
Legal issues of personalized medicine	585
Gene patents and personalized medicine	586
Regulatory aspects	586
FDA and personalized medicine	587
<i>FDA oversight of NGS for personalized medicine</i>	587
FDA and molecular diagnostics in relation to personalized medicine	588
<i>CLSI guideline for the use of RNA controls in gene expression assays</i>	588
<i>Evaluation of companion diagnostics/therapeutic</i>	589

<i>FDA oversight of laboratory developed tests</i>	590
<i>FDA regulation of multivariate index assays</i>	591
<i>IVD device and drug co-development</i>	592
Regulatory aspects of pharmacogenetics.....	593
Regulation of direct-to-consumer genetic testing	593
<i>Need for regulatory oversight of DTC</i>	594
FDA and pharmacogenomics	596
<i>FDA guidance for pharmacogenomic data submissions</i>	597
<i>Joint guidelines of the FDA and EU regulators for pharmacogenomics</i>	598
<i>Pharmacogenomic/pharmacogenetic information in drug labels</i>	598
<i>FDA guidelines for pharmacogenomics-based dosing</i>	599
<i>FDA and validation of biomarkers</i>	599
FDA and predictive medicine	600
13. Commercial Aspects of Personalized Medicine	601
Introduction	601
Perceived financial concerns.....	601
Personalized medicine and orphan drug syndrome	601
Commercial aspects of pharmacogenomics.....	601
Cost of DNA testing.....	601
Cost of sequencing the human genome	602
Cost of genotyping	604
Cost of pharmacogenomics-based clinical trials.....	605
Business development of pharmacogenomic companies	605
Cost of personalized healthcare.....	605
The rising healthcare costs in the US.....	605
<i>Genetic testing and cost of healthcare</i>	606
Reducing healthcare costs by combining diagnostics with therapeutics	607
<i>Cost-effectiveness of pharmacogenetic testing</i>	607
<i>Cost-effectiveness of CYP genotyping-based pharmacotherapy</i>	608
<i>Cost effectiveness of HIV genotyping in treatment of AIDS</i>	608
<i>Cost-effectiveness of warfarin pharmacogenomics</i>	609
<i>Cost-benefit analysis of KRAS and BRAF screening in CRC</i>	609
<i>Lowering the high costs of cancer chemotherapy</i>	609
Overall impact of personalized medicine on healthcare	610
Drivers for the development of personalized medicine	610
Evolution of medicine as a driver for personalized therapy markets	611
Collaboration between the industry and the academia	611
Personalized medicine and drug markets	612
Segmentation of therapeutic drug markets.....	612
Reasons for increase of market values of personalized medicines.....	612
Growth of markets relevant to personalized medicine	613
<i>Biochips for diagnosis</i>	613
<i>Pharmacogenetics</i>	614
<i>Pharmacogenomics</i>	614
<i>Pharmacoproteomics</i>	614
<i>Point-of-Care</i>	614
<i>SNP market</i>	614
Markets for personalized medicines according to therapeutic areas	614
<i>Market for personalized cancer therapy</i>	615
Markets for personalized medicines according to geographical regions.....	615
Market opportunities for personalization of medicine	615
Impact of personalized medicine on other industries.....	616
Strategies for developing and marketing personalized medicine	617
<i>Education of the public</i>	617
<i>Role of the Internet in development of personalized medicine</i>	618
<i>Marketing companion diagnostics for personalized medicine</i>	618
14. References.....	621
